51 [a] Formation of new Department of Human Resources Development commenced in November 1968. Transition completed and new de-
52 partment effective October 31, 1969. To simplify presentation and provide comparability the 1968–69 expenditures are reflected as
53 if the new organization had been in existence for the entire fiscal year.
54 [b] Expenditures July 1, 1968 to March 31, 1969 reflected in Department of Rehabilitation budget.
55 [c] Actual expenditures for 1968–69 are reported in budgets of parent organization. Amounts shown in parentheses are for information
56 only and are not included in budget totals.

84 [a] Section 12, Article V of the Constitution prohibits change in compensation of several constitutional officers during their term in
85 office. Salary increase to $42,500 effective January 1971 concurrent with beginning of new term reflects increase authorized in
86 Chapter 1600, Statutes of 1969.

[a] Separate Audit Section abolished and general auditor II transferred to Administrative Services Section.
[b] Records Unit established within Systems and Management Planning Section using positions transferred from Administrative Services Section (1 sr file clerk, 1 clerk-typist II, 2 clerk II) and from Land Records and Information Unit (2 clerk-typist II, 1 clerk II).
[c] Delineator position reclassified from vacant oil gauger position.
[d] Associate budget analyst position reclassified to assistant manager, state lands program.
[e] Land Title Information Unit established using positions from Land Records and Information Unit (1 associate title officer) and from Land Transactions Unit (1 land title searcher) plus new positions.
[f] Special Boundary Projects Unit enlarged using positions transferred from Land Records and Information Unit (1 supervisor, land records and information) and from Cadastral Unit (1 civil engineering technician II) plus new positions.
[g] Number of positions in temporary help reduced to 0.8 to more accurately reflect budgeted dollar amount.

19 [a] Governor's reorganization plan number 2 established the Department of Navigation and Ocean Development and abolished the De-
20 partment of Harbors and Watercraft, effective November 10, 1969. The departments have been combined in this schedule in
21 order to facilitate the presentation of the budget.

Ronald Reagan

RONALD REAGAN, Governor

State Budget of California for CAPITAL OUTLAY AND FIVE-YEAR CONSTRUCTION PROGRAM 1970-71

Submitted by

RONALD REAGAN

Governor

to the

CALIFORNIA LEGISLATURE

1970 Regular Session

Capital Outlay Budget
and
Five-year Construction Program

General Analysis

Schedules

1. Comparative Statement of Expenditures by Program Function, Organization Unit and Fund.
2. Comparative Statement of Expenditures of Federal Aid Granted to the State of California.
3. Summary of Proposed Expenditures by Method of Appropriation.
4. Comparative Statement of Expenditures Authorized by the Budget Act and Expenditures Required by the Constitution or Other Statutes.
5. Reconciliation of Changes from Previous Budget Estimates.

Detailed Budgets and Programs

1970-71 Capital Budget
and
Five-Year Construction Program

The 1970–71 Capital Budget and the Five-Year Construction Program covering the budget year, plus four additional years, is presented in this volume. The total recommended expenditures from governmental cost funds for the coming fiscal year are $355.2 million. Of this amount, expenditures from the General Fund amount to $47.7 million, and expenditures from special revenue funds make up for the balance of $307.5 million. Table 1 below summarizes proposed expenditures by major program.

Table 1

RECOMMENDED EXPENDITURES FOR CAPITAL OUTLAY BY MAJOR PROGRAMS
1970–71
(In Thousands)

Program	*Governmental cost funds*	*Bond issues*	*Total*
State Building Program	$66,700	$4,755	$71,455
District and county fairs	1,192	–	1,192
Wildlife Conservation	–1,286	1,066	–220
Parks and Recreation	4,048	135	4,183
Highways	283,447	–	283,447
Water facilities	1,120	321,279	322,399
Totals, Capital Outlay	$355,221	$327,235	$682,456

So that the capital budget can be viewed in a comprehensive manner, all proposed outlays have been included in the detailed budgets without regard to source of funds. In keeping with accepted principles of governmental accounting, however, expenditures from bond proceeds, other nongovernmental cost funds, loans from state funds, and expenditures from federal funds and other nonstate sources are excluded from the budget totals.

Projections of all pertinent factors point to a need for continuing investments in capital improvements in this and foreseeable future budgets. Current trends in college enrollments, vehicle registrations, usage of recreational areas, water utilization, and other indices used in planning for physical facilities furnish clear evidence of the necessity for annual outlays of significant amounts based on past utilization standards.

The entire Five-Year Construction Program should be viewed as a tentative plan based on currently approved programs and levels of service, existing standards of space allowances and utilization, and present concepts of how program objectives are to be achieved. When any of these factors change, related adjustments in the capital outlay program must be made.

The individual proposals in the five-year plan for the fiscal years 1971–72 through 1974–75 represent the current departmental request and not a program approved by the administration. Additional studies will be made prior to the final recommendations.

STATE BUILDING PROGRAM

The State Building Program encompasses the projected capital outlay requirements for publicly supported higher education, mental hygiene, corrections, and for office space. It also includes the forecast of the funding needs for such agencies as the Department of Conservation, Military Department, and Department of General Services.

The significant characteristics of each principal component of the State Building Program are discussed below.

EDUCATION—SUMMARY

SUMMARY OF FIVE-YEAR PROGRAM
(In Thousands)

	1970–71	1971–72	1972–73	1973–74	1974–75	Total
University of California	$25,391	$234,548	$163,431	$133,242	$130,047	$686,659
California State Colleges	78,510	185,104	189,514	103,820	89,978	646,926
California Maritime Academy	77.4	380	485	235	–	1,177.4
Community Colleges	18,970	54,000	54,000	54,000	54,000	234,970
Department of Education	145.4	3,095	733	8,241	450	12,664.4
TOTAL	$123,093.8	$477,127	$408,163	$299,538	$274,475	$1,582,396.8
General Fund	*222.8*	*3,475*	*1,218*	*8,476*	*450*	*13,841.8*
Capital Outlay Fund for Public Higher Education and unfunded	*50,913*	*291,365*	*262,247*	*172,455*	*148,849*	*925,829*
State Construction Program Fund (Reserve Account) and unfunded	*(19,064)* [1]	*25,000*	*25,000*	*25,000*	*25,000*	*100,000*
Federal, University overhead, or other nonstate funds	*71,958*	*157,287*	*119,698*	*93,607*	*100,176*	*542,726*

[1] This amount is treated as an expenditure in current year when transferred from General Fund and is therefore not included in overall budget totals.

HIGHER EDUCATION

Proposed expenditures during 1970–71 for capital outlay for the University of California and the California State Colleges are approximately $51 million which will be funded from the Capital Outlay Fund for Public Higher Education. The Capital Outlay Fund for Public Higher Education is comprised of transfers from the General Fund in the amount of $31 million and some existing and anticipated tidelands revenues. The transfer from the General Fund to the Capital Outlay Fund for Public Higher Education is proposed so that the appropriations will be payable from one source thereby simplifying the appropriation and accounting procedures.

University of California

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$25,391	$234,548	$163,431	$133,242	$130,047	$686,659
16,120 [2]	*133,081*	*97,367*	*87,784*	*77,278*	*411,630* [2]
9,271	*101,467*	*66,064*	*45,458*	*52,769*	*275,029* [3]

[2] Capital Outlay Fund for Public Higher Education for 1970–71 and unfunded.
[3] Federal, University overhead, and other nonstate funds.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

The 1970–71 Capital Outlay Program for the University of California totals $25,391,000. Of this amount $16,120,000 is to be financed from the Capital Outlay Fund for Public Higher Education; $3,583,000 is from federal sources; $1,052,000 is derived from University overhead funds; and $4,636,000 is from other nonstate sources.

State Colleges

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$78,510	$185,104	$189,514	$103,820	$89,978	$646,926
34,793	*157,399*	*164,880*	*84,671*	*66,671*	*508,414* [2]
43,717	*27,705*	*24,634*	*19,149*	*23,307*	*138,512* [3]

[2] Capital Outlay Fund for Public Higher Education for 1970–71 and unfunded.
[3] Federal and other nonstate funds.

The Board of Trustees of the California State Colleges is vested with the powers, duties and functions relative to the administration of the state colleges. One of the major functions of this board of trustees and its administrative staff is the planning for 19 physical plants, including the new campus in Kern County. It is anticipated that in the period 1970–71 through 1974–75 the statewide enrollments, excluding earned FTE, will rise from 166,057 to 219,832. The Five-Year Capital Outlay Building Program estimates the facilities needed to provide properly for this increase of 53,775 FTE.

It should also be noted that the last four years of the five-year building program is the State Colleges current estimate of need and does not represent a program approved by the administration.

The 1970–71 Capital Outlay Program for the State Colleges provides for an expenditure of $78,510,000, of this total $34,792,600 is proposed from the Capital Outlay Fund for Public Higher Education, and $43,717,400 from nonstate sources.

Maritime Academy

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$77.4 [4]	$380	$485	$235	--	$1,177.4

[4] General Fund.

The Maritime Academy is located in Vallejo near the north end of the Carquinez Bridges and will have an average enrollment of 250 students in 1970–71. The campus occupies 67 acres, and permanent facilities consist of two classroom buildings, engineering building, library, administration building, seamanship building, messhall, residence hall, and a gymnasium with pool.

The 1970–71 budget proposes an expenditure from the General Fund of $77,400.

Community Colleges (Junior Colleges)

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$18,970	$54,000	$54,000	$54,000	$54,000	$234,970
(19,064)	*25,000*	*25,000*	*25,000*	*25,000*	*100,000* [5]

15,570	*25,000*	*25,000*	*25,000*	*25,000*	*115,570* [7]

[5] State Construction Program Fund for 1970–71 and unfunded.
[6] Federal funds.
[7] District funds.

The Legislature in 1965 recognizing that pressures generated by rising enrollments, increasing costs and the great differences in the ability of local junior college districts to provide a well balanced educational program, enacted SB 318, which provided the vehicle for a shared state and local district junior college capital outlay program on a continuing basis.

State Construction Program Bond funds in the amount of $50 million for the junior colleges were approved in the 1964 general election. Of this amount, $25,122,000 was appropriated in the 1965–66 Budget subject to the enactment of SB 318. Because of the timing involved, this amount was appropriated to the Department of Education in a lump sum for allocation without legislative review.

In 1966 the junior college capital outlay projects were itemized in the budget for the first time. That budget provided for an appropriation of $7,955,973 to the Department of Education to be allocated to the junior college districts in accordance with the schedule noted in the detail of that budget.

A total $19,617,300, the balance remaining from the $50 million in State Construction Bond Act funds, was appropriated for the 1967–68 fiscal year.

Looking forward to the continuing need for state support of a community college capital outlay program, the Legislature enacted and the electorate approved the Junior College Construction Bond Act of 1968 which provided $65,000,000 solely for community college capital outlay projects.

The 1968–69 Budget Act appropriated $15,609,533 to be paid out of the State Construction Program Fund.

The 1969–70 Budget provided an appropriation of $29,307,662 from the State Construction Program Fund to the Board of Governors of the California

Community Colleges to be allocated to the junior college districts in accordance with the schedule noted in the detail of this budget. Subsequent to this action by the Legislature, Chapter 784, Statutes of 1969, was passed and this legislation authorized the transfer of certain surpluses from the State School Fund to the State Construction Program Fund. Chapter 784, in addition, indicated that $26,914,886 of these funds were to be used in lieu of bond funds previously appropriated by the Community Colleges capital outlay 1969–70 appropriation.

The 1970–71 Budget proposes an appropriation of $19,064,322 from this source deposited in the State Construction Program Fund (Reserve Account) to the Board of Governors of the California Community Colleges to be allocated to the junior college districts in accordance with the schedule noted in this budget.

Department of Education

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$145.4	$3,095	$733	$8,241	$450	$12,664.4

The Department of Education administers special schools for handicapped children: one for education of the blind, two for the education of the deaf, and two for diagnosis and education of neurologically handicapped children. The 1970–71 budget for the special schools totals $145,400 with funding proposed from the General Fund. Projects proposed include: one minor project for each of the diagnostic schools totaling $13,800; two minor projects totaling $16,900 for the School for the Deaf, Berkeley; one major project for $85,000 to provide working drawings for a permanent facility for multihandicapped children, and one minor project for $29,700 at the School for the Deaf at Riverside.

It should be noted that the last four years of the five-year building program is the Department of Education's current estimate of need and the estimates do not represent a program approved by the administration.

HUMAN RELATIONS

Mental Hygiene

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$2,408	$15,996	$5,956	$4,167	$3,647	$32,174

The Department of Mental Hygiene capital outlay program in the budget year totals $2,408,430. This amount represents $1,008,000 in major projects and $1,400,430 in minor projects.

Major projects include: Agnews — remodel wards for mentally retarded patients, $125,000, and air conditioning the receiving and treatment facility, $250,000. Mendocino—air condition ward buildings, $292,900. Stockton—air condition ward building, $190,000. Porterville—air condition ward building, $142,100.

Proposed minor capital outlay expenditures provide for various alteration, improvement, and maintenance projects.

The Lanterman-Petris-Short Mental Health Act of 1968 has reduced significantly the bed requirements at the state hospitals for the treatment of mentally ill patients. This reduction will permit the deactivation of bed capacities that are older, and less efficient to operate.

Projected five-year proposals for this department total $32 million. This projection includes projects which will provide an upgrading of existing facilities, and consideration of additional facilities of a specialized nature in coping with the problems of mental retardation and mental illness. Significant among these projects is the replacement of the acute medical-surgical center at Sonoma State Hospital.

The individual proposals in the five-year plan for the fiscal years 1970–71 through 1973–74 represent the Department of Mental Hygiene's current requests. The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

CORRECTIONS

Department of Corrections

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$1,270	$4,637	$1,072	$1,295	$350	$8,624

Three major construction projects are included in this budgt for 1970–71 in addition to numerous minor projects. A portion of the old cotton textile mill at San Quentin will be converted to a laundry and a second appropriation will be added to a prior appropriation to remodel San Quentin's sewage treatment process as prescribed by the state water pollution control board. Part one of a two-part project will provide the initial replacement of the boiler plant at Folsom.

Projects proposed in future years include the 2nd and 3rd phase of barracks replacement at the Institution for Men, an education, library, chapel complex at Folsom and an administration building also at Folsom. Minor projects will provide necessary alterations and improvements to the physical plant in keeping with the existing program of the several institutions.

The projects in the 1971–72 to 1974–75 fiscal years are subject to additional policy determination by the administration.

Youth Authority

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$1,380	$11,658	$1,881	$769	$339	$16,027

The proposed expenditure program for the budget and ensuing four fiscal years totals $16,030,305. Major expnditures during this period include the funding of the Medical-Psychiatric Institution at the Southern California Youth Center, equipment for the Older Boys Reception Center, renovation of the hospital at Fred C. Nelles School and smaller additions and remodeling in keeping with the program at the respective institutions. The projects in the 1971–72 to 1974–75 fiscal years are subject to additional policy determination by the administration. In the budget year provision is made for an Industrial Arts Shop and the remodeling and expansion of the Auto Instruction Shop at Paso Robles School. At Preston

School four projects are proposed to replace worn out and hazardous utility systems.

Minor projects included in the total capital expenditures will provide necessary alterations and improvements to the physical plants of the several institutions.

OFFICE BUILDINGS AND RELATED FACILITIES

General Administration

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$1,551	$7,781	$1,350	$750	$7,350	$18,782

The Capital Outlay program for the Department of General Services provides funds for projects currently under construction with a limited amount provided for required alterations and minor projects.

Vehicle Regulation

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$5,765	$4,799	$2,800	$2,698	$2,780	$18,843

The 1970–71 Capital Outlay Budget for the Department of the California Highway Patrol totals $2,229,914. Major items include funds for construction of a portion of the new Highway Patrol Academy and for a new field office in Los Angeles. Funds are also provided for the purchase of field office facilities in San Diego and Los Banos.

The Department of Motor Vehicles will require $3,535,330 for major and minor capital outlay needs in 1970–71. New field offices will be constructed in Sacramento, Westminster, Whittier, Anaheim, and Salinas. The budget also provides site acquisition money for a new office in Hawthorne.

Air Pollution Control

The 1970–71 budget of the Air Resources Board provides $1,575,627 from the Motor Vehicle Fund for constructing and equipping a new air resources laboratory to be used for motor vehicle pollution control testing and development work. The new laboratory will be located in El Monte.

Parks and Recreation

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$4,183	$34,728	$25,392	$21,165	$11,012	$96,480

The ever-expanding population and increasing leisure time in California results in a constantly growing demand for recreational outlets. To meet this demand the state, through the Department of Parks and Recreation, carries on a constant planning effort which culminates in the identification and development of specific projects.

The basic parameters which determine the projects to be included in the development program are: the demand for facilities, the existing facility supply, the ability of each park unit to meet the demand for facility development, the estimated cost of development of each unit, the planning requirements of each project, the effect of construction by other agencies, the cost of operating the proposed facilities, the anticipated level of funding available and the department's development policy.

The State Beach, Park, Recreational and Historical Facilities Bond Act of 1964 has provided funds to meet a major portion of the need for recreational facilities. The 1970–71 fiscal year budget, however, does not include any projects to be funded from the State Beach, Park, Recreational and Historical Facilities Fund. This is due to past inability to sell bonds and the backlog of authorized projects. Funds are, however, included to continue the planning effort.

Of the $4 million requested in the 1970–71 fiscal year, funds are provided for overnight camping and day use facilities at San Clemente State Beach, sanitary facilities at Silverwood Lake, working drawings for recreational facilities at Cuyamaca Rancho State Park, maintenance at Hearst San Simeon State Historic Monument, various minor capital outlay projects throughout the state and for repayment of funds to the Department of Water Resources for recreation work accomplished in conjunction with the State Water Project.

The projects in the 1971–72 to 1974–75 fiscal years are subject to additional policy determination by the administration.

Department of Conservation—Division of Forestry

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$645	$645	$645	$645	$645	$3,225

The Division of Forestry operates 232 forest fire stations, 77 look outs, 13 primary air attack stations and 14 secondary air attack stations. It also maintains 29 ranger unit headquarters, 6 district headquarters and 33 conservation camps. The 1970–71 Budget proposes a total of $170,893 for one major construction project and land acquisition for five forest fire stations. The budget also includes $474,107 for various minor projects required by the Division of Forestry's field activities.

Wildlife Conservation

Five-Year Program
(In Thousands)

	1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
W	$750	$750	$750	$750	$750	$3,750
F	231	987	1,200	1,770	895	5,083
	$981	$1,737	$1,950	$2,520	$1,645	$8,833

W=Wildlife Conservation Board.
F=Fish and Game.

The total proposed 1970–71 capital outlay expenditure for the Wildlife Conservation Program is $981,000. This program for the protection, propagation, and management of the state's fish and wildlife resources is administered by the Department of Fish and Game and the Wildlife Conservation Board. Proposed expenditures of $231,000 in the budget year for the Department of Fish and Game are for minor projects including construction of fish screens, various fish hatchery improvements, and the relocation and expansion of the Newell Creek Fish Planting Base.

The Wildlife Conservation Board proposes to spend $750,000 in 1970–71 for continuation of the program of providing new hunting and fishing access, game

and fish habitat development, and fish hatchery stocking projects.

The five-year program proposes expenditures of $8,833,000 to continue replacements of patrol boats, office facilities, and additional fish hatchery facilities related to the fish and wildlife enhancement program of the Department of Fish and Game, and the Wildlife Conservation Board.

Navigation and Ocean Development

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$518	$500	$500	$500	$500	$2,518

One of the recreational needs which relates to the ever-expanding population and the increasing leisure time in California is that of boating facilities. This need can be measured by the growing boat population and the increasing use of our water resources at locations where boating facilities now exist. The development program of the department has, in the past, been primarily accomplished through assistance to other governmental entities. The 1970–71 fiscal year budget includes funds for the development of facilities through capital outlay as well as assistance. This approach represents the shifting of capital outlay responsibility for planning and development of boating facilities from the Department of Parks and Recreation to the Department of Navigation and Ocean Development as provided in the Governor's Reorganization Plan No. 2 of 1969. The 1970–71 fiscal year includes funding for boating and parking facilities at Castaic Reservoir, boating facilities at Silverwood Lake, acquisition for development of three Mokelumne River islands, minor projects at Oroville Reservoir and San Luis Reservoir and for repayment of funds to the Department of Water Resources for boating facility work accomplished in conjunction with the State Water Project. Projected requirements reflect only the continuation of the funding level previously available to the Department of Parks and Recreation under provisions of Section 85.2 of the Harbors and Navigation Code.

MISCELLANEOUS

District Fair Construction

Included in this budget is a total of $1,191,700 for construction of facilities for district agricultural associations. The detail of these projects will be found in the budget supplement containing the budgets of the individual fair.

Department of Water Resources
California Water Facilities

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$321,279	$192,516	$162,340	$150,206	$142,374	$968,715

As the State Water Project enters its ninth year of construction, work under contract or completed represents approximately 90 percent of the total project. The Oroville Dam embankment, the keystone of the entire project, was completed in November 1967 and is currently storing water towards its ultimate 3,500,000 acre-feet capacity. A contract has been executed with three private utilities for the sale of power to be generated at the Oroville and Thermalito power plants. $16,150,000 will be paid annually by the utility companies to the state.

The State Water Project expenditures will reflect a gradual lowering in the level of expenditures as facilities are completed and the project reaches operational capability.

Major construction emphasis during 1970–71 will continue to be located in the Tehachapi Mountains and southern California. Land acquisition activity will also be concentrated in the southern half of the state.

Flood Control-Reclamation Board Services

Five-Year Program
(In Thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$1,120	$3,500	$3,500	$3,500	$5,000	$16,620

The Reclamation Board was created in 1911 with regional responsibility of controlling floodwaters of the Sacramento-San Joaquin River systems. In 1957 the Legislature placed the board in the Department of Water Resources but authorized it to retain its independent responsibilities and jurisdiction. The board is part of the Resources Agency. It consists of seven members appointed by the Governor.

During 1969–70 most of the Reclamation Board staff and project activities were transferred to the Department of Water Resources pursuant to Item 276.5 of the 1969 Budget Act. This consolidation was for the purpose of developing a statewide flood control program. Policy responsibilities of the board were continued and administrative personnel continue to serve the board.

The major activities of the board are the acquisition of lands, easements and rights-of-way necessary for construction of U.S. Army Corps of Engineers major flood control projects, design and construction of necessary relocations of roads, bridges and utilities required by construction, and the provision of other necessary assurances required for the project. In any project in which the board gives assurance to the United States before funds are expended, a public agency, other than the board, must assume the project maintenance obligation and provide hold-harmless assurances to the United States regarding damages resulting from construction; or, by binding agreement with the board, agree to assume such obligations and hold the state and the Reclamation Board harmless from such claims.

In addition the board controls encroachment construction in the project floodways and exercises responsibility for flood plain management within its jurisdiction.

Methods of Financing

The sources from which the capital outlay budget is funded are described below:

1. Current revenues and any accumulated balances in governmental cost funds. These are moneys collected in the form of taxes, license and permit fees, interest on investments, and similar items of income.
2. The proceeds from the sale of general obligation bonds which bonds are secured by the "full faith and credit" of the state. Outstanding bonds of this kind are (a) State Construction Program bonds, and (b) State Beach, Park, Recreational, and Historical Facilities bonds. The repayment of principal and interest on such indebtedness constitutes a preferred claim on the financial resources of the state. Within this classification falls a special category referred to as "self-liquidating" bonds. Bonds in this category are the California Water Resources development bonds. In the case of this special grouping, such bonds although legally possessed by the characteristics of general obligation bonds are serviced from the revenues produced by the ventures or projects financed in this manner.
3. Revenue bonds are those that are secured solely by the income derived from the use or operation of the facilities funded by this method.
4. Trust certificates represent a form of capital financing which makes use of the large balances accumulated in trust accounts or funds of the state. Because such funds are dedicated to meet future obligations, sound fiscal management dictates the investment of the currently unneeded cash in these accounts and funds. One way of investing these moneys is by the purchase of trust certificates issued by the state for the construction of general purpose office buildings.
5. Nonstate funds such as endowments, grants, and certain other funds as payments of overhead charges on research projects conducted by the University represent yet another source of capital financing.

To provide a complete and comprehensive picture of the state's capital outlay program all proposed projects are included in the capital budget regardless of the source of financing.

Following the generally accepted principles of governmental accounting, however, only expenditures from governmental cost funds are included in the budget totals. Expenditures from bond proceeds and other forms of borrowing are excluded—such expenditures are reported as expenditures of the fiscal years in which the payments on principal and interest are made.

Schedule 1—Capital Outlay

GENERAL ANALYSIS

The State Building Construction Act of 1955 provides that the State Public Works Board may issue revenue bonds or certificates to provide funds to acquire or construct state public buildings when authorized by a separate act or appropriation of the Legislature. By definition "public building" includes automobile parking lots. The facilities so acquired or constructed are to be leased by state agencies at a rental rate that will retire the bonds or certificates and provide for the payment of interest. In addition the rental rates shall cover the cost of operation and maintenance of the public buildings authorized.

The State Public Works Board has entered into an agreement with the Board of Administration of the Public Employees' Retirement System whereby that agency will purchase certificates to finance the construction of office buildings and the Los Angeles garage authorized by Chapter 1687, Statutes of 1955, as amended by Chapter 1647, Statutes of 1957, and by various subsequent budget act items.

The following is a summary of the facilities financed under this authority:

	Program amount authorized	Estimated principal balance June 30, 1970
Buildings:		
Facilities Completed:		
Fresno State Building	$3,575,000	$2,461,180
Los Angeles State Building	11,240,000	7,788,953
Los Angeles Garage	2,057,000	1,486,529
Oakland State Building	3,976,000	2,753,025
Sacramento Retirement Building	15,532,000	13,129,441
San Francisco State Building Annex	8,150,000	5,394,541
San Diego State Building	4,296,000	3,402,349
Stockton State Building	2,187,556	1,799,158
San Bernardino State Building	3,563,494	3,240,010
Other:		
Fund Available for Contingencies	413,968	–
Totals	$54,991,018	$41,455,186

In 1959 the Legislature created the Capitol Building and Planning Commission to establish a master plan for the orderly development of future state buildings and other facilities in the Capitol area of Sacramento. A formal plan was adopted in 1961 and initial funds were made available for acquisition. Since that time, there have been a number of appropriations from various fund sources to acquire land to meet requirements of the plan. A total of $25,588,081 was appropriated, all of which has been spent or encumbered except for $800,000 remaining.

Current estimates indicate that additional appropriations of $3,833,000 will be required to complete all acquisitions for the currently approved Capitol Building Plan, not including the two blocks between 17th and 18th Streets and the two half-blocks between Seventh and Ninth and south of L Streets.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

1970–71 Program

No new building projects are proposed in the program for the budget year. A lump sum appropriation of $300,000 is proposed for alterations throughout the state to provide for occupancy changes brought about by legislative and organizational changes and minor space recovery programs.

A total of $100,000 is proposed for essential alterations in the Library and Courts Building to make fire and life safety corrections.

A total of $150,000 is requested for alterations in San Francisco to the State Building and Annex, at 350 McAllister and 455 Golden Gate Avenue.

It is estimated that the remaining balance of $800,000 for the Sacramento Capitol land acquisition program will be expended during the 1970–71 fiscal year.

Minor projects consist of essential repair items, accommodations to known tenancy changes, plus provisions for installing a canopy over the loading dock and an enclosure around the trash receptacle at Office Buildings 8 and 9.

STATE EXPOSITION AND FAIR EXECUTIVE COMMITTEE

A new California Exposition and Fair opened on a 600-acre tract in Sacramento, near the American River in June 1968. The State Exposition and Fair Executive Committee is composed of five ex officio members: the State Controller, the Director of Finance, the Director of Public Works, the Director of General Services and the Director of Agriculture; plus 14 members appointed by the Governor. In addition, there are two Members of the Senate and two Members of the Assembly that are also members of the executive committee.

One minor project is proposed for the 1970–71 fiscal year.

MAJOR PROJECTS

Grants to the Exposition and Fair Corporation for preliminary plans, working drawings, construction and services and bond interest and selling expense	$1,906,967		
General Fund	1,509,967		
Public Building Construction Fund	397,000		

MINOR PROJECTS

Totalizator installation (State Fair Fund)	–	$12,500	$12,500

GENERAL ANALYSIS

The work of this department is of a regulatory and service nature. It is headquartered in Sacramento and has offices, field crews, advisors, and consultants operating throughout the state. A major portion of the departmental responsibility is accomplished in cooperation with the 52 offices of the county agricultural commissioners.

Current and past year expenditures meet the following needs:

Plant Quarantine—One of the objectives of this program element is preventing new and economically important pests from entering the state by monitoring and regulating produce entering the state via highways. A new section of freeway at the Winterhaven Inspection Station is scheduled to open in 1970. To effectively accomplish the above objective, with a minimum of inconvenience to inbound traffic, it was necessary to relocate the existing facility with the new roadway. The relocated facility is an off-highway inspection operation and will be a part of the joint use program for California and Arizona at this border location.

An Arizona Inspection Station financed by the State of Arizona, is being constructed in California. Construction is being accomplished by contracts between Arizona and the applicable contractors, with this department acting as an intermediary. Both Arizona and California programs will jointly use the facility. It will be located across the freeway from the Winterhaven Inspection Station.

Veterinary Laboratory Services—Minor construction projects totalling $28,750 were approved in the current year for an air-conditioning system in the diagnostic laboratory on Meadowview Road. This is in the Agricultural Pest and Disease Prevention Program, under the Veterinary Laboratory Services element. The basic need for this element is the prompt and accurate diagnosis of livestock and poultry diseases. The air-conditioning system was justified on the basis of the need to stabilize the atmospheric conditions in the laboratory building.

Construction proposed in the department's five-year plan is:

Plant Quarantine—The Hornbrook Inspection Station must be relocated because of highway construction. Interstate Highway 5 which is scheduled for completion in 1972 will bypass the existing inspection station.

The inspection station at Vidal was built in 1938 as a temporary structure. The building is in poor condition and repairs are no longer economically feasible. Trucks coming into the state from Mexico and Arizona are the main target of inspection; however, they are too large for the old type inspection stalls and must be inspected in the open.

Veterinary Laboratory Services—The objective of this program element is to provide complete diagnostic service in animal and poultry health control. To fulfill this objective it is necessary to be within reach of the animal and poultry industries. When the Southern California Diagnostic Laboratory was constructed it was in close contact with both the livestock and poultry industries; however, closure of the Lancaster Laboratory and urbanization of the Los Angeles area requires relocation to an outlying area which will serve the needs of the poultry and animal industry.

Weighing and Measuring Devices—One of the prime objectives of this program element is to assure consumers of true measures by testing the accuracy of weighing and measuring devices, including meters for fluids. The proposed fluid fuel test facility will enable the department to test newer and larger fluid fuel meters.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Facilities Financed by Loans From Treasury Funds

DEPARTMENT OF AGRICULTURE OFFICE BUILDING, SACRAMENTO

(Department of Agriculture Building Fund) [2]

The Department of Agriculture Building Fund is authorized by Section 601 through Section 628 of the Agricultural Code. Moneys are transferred from the Department of Agriculture Fund to the Department of Agriculture Building Fund on a loan basis to provide for construction of buildings. Rentals [illegible] being paid to the Department of Agriculture Building Fund and returned to the Department of Agriculture Fund.

The total cost of the building remodeling project is $199,994. The Department of Agriculture Building Fund is providing $122,744 as its share of the project and the balance of $77,250 has been contributed by the General Fund and is reflected under the Department of Agriculture Capital Outlay section.

Alterations to Department of Agriculture Building	–	$122,744	–

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

[1] In 1970–71, Division of Highways' acquisition of and payment for displaced Department of Agriculture facilities will offset the cost of Phase I of Hornbrook. Total cost of Hornbrook is estimated at $340,000. Phase I consists of $150,000. Phase II consists of $190,000 and is unfunded.

[2] A working capital and revolving fund. Neither receipts nor expenditures are included in overall budget totals.

GENERAL ANALYSIS

The California Museum of Science and Industry, located in Exposition Park, Los Angeles, contains permanent one-of-a-kind audio-visual educational exhibits dedicated to the purpose of educating and informing visitors. These exhibits, through use of advanced design techniques, dramatize industrial and scientific progress of the State of California, and illustrate and communicate the importance of industries, industrial enterprises and resources of every kind and nature as vital factors in the economy of the State of California. The state owns the 104 acres comprising Exposition Park, which includes parking facilities and the leasehold to: The Los Angles Memorial Coliseum, Los Angeles Memorial Sports Arena, the Los Angeles County Museum of Natural History, the City of Los Angeles Rose Garden, and the City of Los Angeles Swim Stadium.

The Legislature in 1959 authorized the museum to construct a Space Museum in the Armory Building in Exposition Park. Fund raising to meet the cost of these exhibits is now in process.

During the planning and fund raising stage, the Space Museum site is being utilized for temporary exhibits on space science and other subjects. These exhibits, furnished by NASA, the armed forces, other federal and state agencies and private industries have been effective in acquainting visitors with our national space program and science research efforts and the vital role of California in these fields.

Four minor capital outlay projects are proposed in the 1970–71 fiscal year.

GENERAL ANALYSIS

44 The Department of Corrections is responsible for the administration of the state's
45 correctional system for adults convicted of felonies and the nonfelon narcotic addict
46 program. It also houses and treats Youth Authority wards who have been deter-
47 mined by the Youth Authority as being best treated in an adult institution.
48 As a part of the correctional program, the department operates 13 institutions
49 and 33 camps which are distributed throughout the state. These institutions and
50 camps comprise a diversified correctional system, with facilities to provide varying
51 degrees of custodial control and provisions for emphasis on special or general
52 treatment programs. The heterogeneity of those committed to the department makes
53 it necessary to provide for widely diversified programs.
54 Custodial requirements range from maximum-close to minimum security facilities.
55 Programs include academic and vocational education, group therapy, group counsel-
56 ing, medical and psychiatric treatment, religious and recreational activities. Con-
57 structive work programs are provided by factories, maintenance and culinary
58 sections, farms, and forestry and road camps. A rapidly expanding work furlough
59 program is providing training and work with little or no cost to the state. A
60 program for the rehabilitation and control of nonfelon narcotic addicts is provided
61 at the rehabilitation center.
62 The type of prisoner committed to the department governs the type of major
63 construction project to provide institutional capacities. Maximum-close security
64 prisons are walled institutions where the majority of prisoners are housed in cells
65 and employed within the walls, and are so guarded and restricted as to minimize
the danger of escape. Medium security prisons are not walled—a wire chain-link fence sufficing for boundary restrictions. Most prisoners are housed in outside cells, in cell buildings or dormitories and employment may be inside or outside the enclosure. Personal supervision is emphasized for prevention of escapes. Minimum security prisoners are not under lock. They feature work outdoors or elsewhere under supervision of correctional officers and foremen.

When the Department of Corrections was created in 1944, there were three prisons for adult males and one for adult females. Prison population totaled 6,000 inmates. The tremendous increase in California population during the succeeding years has resulted in a corresponding increase in the prison population.

The estimated population increase for this department for the period 1970–75 is 5,745, an average increase of 1,149 inmates per year. A program is currently being developed jointly by the department and the Adult Authority to modify this projected increase in population by reducing the average length of stay in institutions before release to parole.

The program contemplates the housing of inmates in accordance with the standards of one bed and one inmate in each cell or room and one bed and one inmate per 50 square feet in dormitories.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

The Minor Construction Program for 1970–71 proposes projects to correct deficiencies and provide improvement in the physical plant of most institutions.

Correctional Training Facility

The Correctional Training Facility is a medium-minimum security institution located on 907 acres in the Salinas Valley approximately four miles north of Soledad. Agricultural, industrial, academic and vocational training programs are emphasized at this institution. The Central Facility is of permanent reinforced construction with a rated capacity of 1,527. The North Facility also of permanent construction, has a rated capacity of 1,225. The first two phases of a six-phase replacement program at South Facility have been completed and were occupied January 1, 1969. The South Facility, when completed, will have a rated capacity of 622.

The State Prison at Folsom is the second oldest facility in the State Prison System, having been established in 1880. It is a maximum security institution which houses inmates serving long sentences and those who are habitual criminals, recidivists, or severe disciplinary problems. The institution is programmed for an inmate capacity of 2,049. The facility is located on a 1,191 acre site, two miles northeast of the city of Folsom.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Institution for Men

The Institution for Men was opened in 1941 and is located within the southern limits of the city of Chino, San Bernardino County. This is primarily a minimum security prison with an extensive agricultural and industrial program. The facility has an inmate capacity of 1,176 inmates. The Southern Reception-Guidance Center, with a capacity of 536 inmates, is located on the Chino site.

The last four years of the five-year building program are the agency's current estimate need and do not represent a program approved by the administration.

Medical Correctional Institution

The Medical Correctional Institution, which was authorized by Chapter 1243, is proposed to provide for anticipated growth of the inmate population. This institution is planned as a medical correctional facility with a quota of 2,400 inmates. Projected population of the department indicates that unless positive steps to improve and change the current procedures are made there will be a potential need for added bed space, and programming similar to that provided by the present Medical Facility. It will be located near San Diego.

Medical Facility

The Medical Facility is the psychiatric, diagnostic and treatment center for the department and houses adult male felons who are mentally ill or have serious emotional or personality disorders. The facility is located in Solano County about 2 miles south of Vacaville, and consists of 903 acres of land, of which approximately 100 acres are used for inmate and employee building areas. The institution is a permanent medium security facility constructed of reinforced concrete and has a rated capacity of 1,462 inmates. The adjoining Reception-Guidance Center has a total capacity of 556 inmates. This Reception-Guidance Center receives all the adult male felon commitments from the 47 northern counties.

California Men's Colony

The California Men's Colony consists of the East and West Facilities.

The East Facility is a medium security institution of reinforced concrete construction. The rated capacity is 2,472 inmates. The institution is composed of four separate units of 600 capacity each. Housing, feeding, recreation, education, and counseling activities are provided in each unit. However, central facilities for visiting, medical treatment, and other services and supplies are used.

The West Facility is a minimum security institution which utilizes barracks-type wood buildings which were the hospital section of the army installation of Camp San Luis Obispo. The rated capacity is 1,362 elderly or chronically infirm inmates.

A conservation camp "Cuesta" operated in conjunction with the Division of Forestry is housed in the West Facility. It is the only camp which is not under the jurisdiction of a regular conservation center.

The Men's Colony is located on Highway 1, four miles west of the City of San Luis Obispo.

State Prison at San Quentin

San Quentin is the oldest prison in the California System and is located on 404 acres adjacent to the San Francisco Bay in Marin County, about three miles southwest of San Rafael. This is a close-medium security prison with extensive industrial, education and treatment programs. San Quentin is designated as the medical treatment center for major surgical and specialized medical treatment on a department-wide basis. A special unit houses inmates sentenced to death and provides for their execution under the death penalty. The prison has a rated capacity of 2,743.

This budget provides funds to convert the cotton textile mill to a laundry which will provide service to several Northern California Corrections and Mental Hygiene institutions. There are also funds which will be added to a prior year's appropriation to modify the sewage treatment system in accordance with specifications prescribed by the State Regional Water Pollution Control Board.

California Institution for Women

The California Institution for Women is located on a 115 acre site in San Bernardino County, seven miles northwest of Corona. This facility is programmed for a quota of 846 inmates, the Reception-Guidance Center is programmed for a quota of 116 inmates. The total capacity of the institution is 962 inmates.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

GENERAL ANALYSIS

This department is responsible for the custody and rehabilitation of delinquent youths committed by the juvenile and criminal courts. The department operates 15 institutions. These facilities include 1 reception center in Northern California for both boys and girls, 1 reception center in Southern California for boys only; 4 youth conservation camps, 7 training schools for boys and 2 training schools for girls. A reception center-clinic for girls in Southern California is operated as part of the Ventura School for Girls.

The O. H. Close School for Boys, the first 400-bed institution in the Northern California Youth Center complex in Stockton, was opened in July, 1966. The Karl Holton School for Boys was opened in July, 1967.

A reception center for older boys is now under construction at the Southern California Youth Center. These older, criminal court commitments are now being processed in the Department of Corrections, and with the opening of the older boys reception center, approximately 350 beds will revert to Department of Corrections for the housing of adult offenders.

These facilities will house an average population of 5,456 boys and girls during the 1970–71 fiscal year, with a year-end population of 5,456. In addition, an average of 875 of the older and more dangerous Youth Authority wards will be housed in Department of Corrections institutions during the budget year.

Consistant with accepted national practices, the department has developed institutions based upon a philosophy of working with homogeneous groups. In accordance with this principle, the department prefers to develop small institutions, 150–200 capacity for the youngest wards and 300–400 capacity for the older wards. Difficulties in financing state institutions have compelled the construction of institutions larger than these capacities. In order to achieve the economies of larger institutions together with the benefits derived from smaller institutions, the department has embarked upon a program of constructing the Northern California Youth Center and the Southern California Youth Center. These will be clusters of institutions with each unit providing a 400-ward capacity. Each cluster will be developed around a central administration and services core.

Tabulation of Five-year Projects by Categories

Category	*Amount*	*Percent of Total*
Additional Capacity:		
New institutions	$10,235,400	63.9
Replacement and Rehabilitation:		
Utilities and services	1,852,345	11.6
Auxiliary service buildings	477,000	3.0
Minor construction and improvements	3,465,560	21.5
Totals	$16,030,305	100

PROGRAM SUMMARY

The construction program for the 1970–75 period is designed to provide institution capacity of 6,868 beds plus 511 hospital and detention beds by June 30, 1975. This program, at a total estimated cost of $16,030,305 provides for initial development, construction and expansion of the Southern California Youth Center, and construction of essential auxiliary facilities at existing institutions, plus various minor projects.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Basic Factors Affecting Agency Program Population Estimates

Commitments are classified as juvenile court wards or as young persons convicted in the criminal courts, and include only persons who are at least 8 years of age or less than 21 years of age at the time of the offense which results in commitment to the department.

Commitments during the next five fiscal years, 1970–71 to 1974–75, will be under previous estimates. This can be attributed to Probation Subsidy Program, the Federal Anti-Poverty Programs and the Vietnam war effort.

It is believed the ultimate effect of the Probation Subsidy Program will be to channel most of the potentially better risks into county programs, leaving the Youth Authority to deal with only the more difficult delinquents. This will probably result in a longer length of stay for youths who are committed to the Youth Authority. The lower commitments to the department may cause a reduction in capital outlay needs during the next five years if the results of probation subsidy and other community based rehabilitative and preventive programs continue to be successful. The initial results of these community-based programs are encouraging. Recent population figures have indicated that the commitment rate to the Youth Authority has declined. While this is due in part to a number of socioeconomic factors such as full employment, and a high draft rate, it is also due in some measure to the effectiveness of these programs. While new facilities will eventually be needed as California's population continues to increase, the rate at which they will be needed should be much lower than has been true in the past.

The above mentioned factors are reflected in the population estimates and bed needs projected for the five-year period from 1970–71 to 1974–75. Reception processing time is estimated to average four weeks for both boys and girls, which is a shorter processing time made possible through an administrative reorganization of the reception centers. Average length of stay in institutions is estimated to average 9 months for boys and 7.7 months for girls. We anticipate that the lengths of stay will likely be longer as probation subsidy programs and community-based programs expand. In addition, when the number of Youth Authority wards now housed in Department of Corrections institutions are reduced to a 200 population level, the overall average length of stay will increase due to longer terms of these older, criminal court cases.

Another major factor affecting population estimates in reception centers is the increasing need for temporary detention, or, short-term confinement of wards who are on parole in lieu of revocation of parole. In addition, the apparent trend in court decisions concerning deprivation of freedom without "due process" has mandated the department to establish procedures to conduct revocation hearings for those wards alleged to be in violation of their conditions of parole. These revocation hearings are conducted in the reception centers and require the presence of the ward, resulting in the need for additional bed space.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PROGRAM SUMMARY—Continued

Budget Proposals for 1970–71

A project proposed for the Paso Robles School for Boys provides for construction of an industrial arts shop and remodeling of the existing auto shop.

Projects proposed for the Preston School of Industry provides for the third phase of the steam line replacement, security-sound and telephone distribution system replacement and construction funds for the first phase of the water distribution system rehabilitation, and a project for electrical distribution and emergency power system rehabilitation.

Minor construction projects are proposed for the Northern Reception Center-Clinic, Southern Reception Center-Clinic, Fred C. Nelles School for Boys, Northern California Youth Center, Paso Robles School for Boys, Preston School of Industry, and Los Guilucos School for Girls. These projects will provide for necessary alterations and improvements to correct deficiencies and improve the physical plant.

Departmental Administration

The amounts shown are for various minor capital outlay projects for facilities within the Department of the Youth Authority.

Detailed information relating to expenditures for major projects are reflected in the individual institution capital outlay budgets. Information relating to minor capital outlay is reflected in the Departmental Administration budget for the 1968–69 and subsequent years. Minor capital outlay project funds are not reflected by institutions for 1971–72 through 1974–75 but are shown here as expenditures.

Northern California Reception Center-Clinic

The purpose of this facility is to centralize the intake, processing and transfer of all boys and girls committed from Northern California to resident institutions. The center provides diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological and psychiatric treatment is given both for newly received wards and serious medical and psychiatric cases developing in the Youth Authority's northern California institutions.

The institution, located on a 17-acre site near Perkins approximately seven miles east of Sacramento, has a capacity of 313 living unit beds plus 20 hospital and detention beds.

There are no projects proposed for 1970–71. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

50–57	**Fricot Ranch School for Boys**							
	This school, with a bed capacity of 220 and 12 hospital beds, houses the youngest and most immature wards of the Youth Authority—primarily those between 8 and 13 years old. The program places emphasis on academic education and counseling. The school is located in a site of 1,090 acres in the foothills 11 miles from the City of San Andreas at an elevation of approximately 1,700 feet. In this location, the school carries on a program of scouting, hiking and outdoor living as part of its rehabilitation program. There are no projects proposed in 1970–71. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

Fred C. Nelles School for Boys

This institution was originally constructed at Whittier, in 1890. Remodeling and rebuilding of this institution began in the 1959–60 fiscal year, and will be completed when the hospital is either replaced or rehabilitated. Included in the Support Budget for the department is a project to demolish two 30 bed living units and reduce capacity from the existing 620 to 560 plus 35 hospital and detention beds.

There are no projects proposed for 1970–71. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

Northern California Youth Center

The Northern California Youth Center is the first of two such centers planned for California. It is planned that all of the department's capacity requirements for northern California in the next 20–25 years will be provided on a 952-acre site in San Joaquin County near Stockton. It is anticipated that 12 400-ward institutions served by a central administrative and business services unit will be constructed here. While each 400-ward institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenance, feeding, and hospital care will be provided by the central unit. Thus the operational economies of a large institution will be accomplished with the program benefits of small, 400-ward units.

The first three institutions and the central hospital now provide a total capacity of 1,179 plus 44 detention beds and 33 hospital beds.

There are no projects proposed in 1970–71.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Southern California Youth Center

The Southern California Youth Center is to be located near Ontario, adjacent to the Youth Training School. It is the second of two youth centers in California which are planned to handle the department's capacity requirements for the next 20–25 years. The first of these youth centers is the Northern California Youth Center located near Stockton. The Southern California Youth Center is planned to have a total capacity of approximately 4,800, including the Youth Training School which is presently operating with a capacity of 1,200 wards. In addition, there are 72 hospital and detention beds.

The center will follow the same basic plan as its northern counterpart. It will have a central administrative and services facility providing utilities, maintenance supply, food preparation, business and administrative services for the existing Youth Training School with a population of 1,200 and 9 future institutions of approximately 400 capacity each.

Initially, the central administrative and service facilities for the operation and support of the first two institutions will be provided by expansion of the existing Youth Training School and construction of a portion of the central facilities master plan.

The central administration facilities and the 375-bed older boys reception center are under construction and will be completed in August 1970. These projects were funded in 1966–67.

There are no projects proposed for 1970–71. Funds for the first phase of equipment provided in 1969–70 for the older boys reception center and central facilities will be extended.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

	Paso Robles School for Boys							
	The Paso Robles School for Boys is for boys primarily between 15 and 17 years of age. The school program is academic and prevocational in nature. All buildings are of single-story reinforced brick construction with radiant heating. The school is located near Paso Robles in San Luis Obispo County. The site covers 203 acres and the institution occupies an area of approximately 40 acres. The facility has a capacity of 452 plus a hospital and detention capacity of 38.							
	The major project for 1970–71 provides for construction of an industrial arts shop and remodeling of the auto shop. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

Preston School of Industry

The Preston School of Industry has a program of academic, vocational and agricultural education designed for boys between the ages of 17 and 21 years.

The facility was constructed in 1894 near Ione in Amador County. A reconstruction program to replace and relocate many condemned and inadequate facilities has been completed. The institution has a capacity of 850 living unit beds and 89 hospital and detention beds.

The major projects proposed for 1970–71 include the third phase of the steam line replacement projects, replacement of the sound security and telephone distribution system, the first phase of the water distribution rehabilitation, and a project for electrical distribution and emergency power system rehabilitation. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

Los Guilucos School for Girls

This school houses delinquent girls between the ages of 10 and 18 years. The program emphasis is on schooling with some prevocational classes and work experience opportunities.

Los Guilucos School for Girls is located near Santa Rosa, Sonoma County. The school property includes 420 acres of which the building area occupies approximately 40 acres. The total living capacity is 259 beds, plus 37 hospital and detention beds.

There are no projects proposed for 1970–71. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Ventura School for Girls

The Ventura School for Girls consists of a reception center and resident housing for delinquent girls of the 10–21-year-old age group. The residential program consists of primary, junior and senior high school academic and remedial training plus a vocational training program.

The institution is located in Oxnard, Ventura County. All buildings are of single-story reinforced concrete and brick construction. The school has a capacity of 100 reception beds, plus 4 detention beds, 450 residential beds and 66 hospital and detention beds. Each living unit houses 50 girls in single rooms.

There are no projects proposed for 1970–71. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

GENERAL ANALYSIS

The Department of Education administers five special schools for physically handicapped children, including one for the education of the blind, two for the education of the deaf, and two for the diagnosis and educational evaluation of the neurologically handicapped children. The projects proposed for the budget year are detailed in the Capital Outlay presentation for each school.

A comprehensive report on "Multihandicapped Blind and Deaf-Blind Children in California", has been completed and is now available. This report points out the need in the State of California to provide services for this group of children. A project for the establishment of a multiple-handicaped blind unit in northern California is shown in the five-year projection of the School for the Blind. The establishment of a multiple-handicapped deaf unit in southern California at the School for the Deaf, Riverside, is also shown in the five-year program. Projections for minor projects in the five-year plan are shown as unallocated.

School for the Blind, Berkeley

STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75

This residential school, located in Berkeley, has a capacity of 150 residential students and 10 day students. The school is situated on 14.5 acres of state-owned land in the Berkeley hills and consists of both single and multi-storied buildings of concrete construction. The physical plant includes an administration and classroom building, four residence halls which consist of bedrooms, bathrooms, study rooms, laundry and storage areas, an infirmary building with examination rooms, one dining room and kitchen facility and a gymnasium building with enclosed swimming pool. All maintenance shops and boiler plant facilities are located in the grounds of the School for the Deaf and these services are provided to the School for the Blind on a reimbursement basis.

The State Department of Education, the administration and the Legislature have, since about 1960, become increasingly aware of the need to provide services for that group of children who are considered to be multi-handicapped visually impaired. Studies have been undertaken to determine the extent of this need and to develop procedures to implement support programs and physical facilities to handle this change in the character of the school population.

The School for the Blind, has seen a dramatic change in the character of the population of the school since 1960. The ratio of multi-handicapped blind to the so-called "normal" blind child is about 10 multi-handicapped blind to one "normal" blind. All of these children are being housed in a facility designed to accommodate the "normal" blind child.

The public school districts currently enroll few of these multi-handicapped blind children, most of them being referred to the state residential school or to a state hospital for placement.

Long-range planning for these children is based on the philosophy that "normal" blind children should be educated in the local school programs wherever possible. For the proper development of services for the multi-handicapped blind, current information indicates a future need for a diagnostic center, a training and adjustment center, a deaf-blind center and guidance and counseling services.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Diagnostic School for Neurologically Handicapped Children—Northern California

This is a residential school for the diagnosis and treatment and the determination of an educational program for children crippled by cerebral palsy and other similar handicaps. The school is situated on approximately 2.8 acres and consists of a two-story building housing classrooms, dormitories, kitchen and dining rooms, playrooms, parent bedrooms, examination rooms, infirmary and administration offices. In addition, the grounds provide play areas for the children and a single-story building originally constructed for use as a garage but now used for storage.

The 1970–71 Capital Outlay budget proposes one minor project totaling $10,800 to construct an embankment retaining wall.

The school is situated on 115.13 acres of state-owned land in the Berkeley hills and consists of single- and multi-storied buildings of concrete construction. The entire plant consists of a single-story administration building, practice cottage, warehouse storage building, mechanical maintenance shop, and multistoried buildings for one vocational building, one dining and one kitchen area, one elementary school building, one junior high and high school building, one gymnasium and seven dormitory buildings. In addition, areas are provided for recreational activities, including swimming pool, football field, baseball diamond, running track, basketball and volleyball courts, baseball and softball diamonds, and playground areas for the smaller children. The 1970–71 Capital Outlay Budget proposes two minor projects totaling $16,900. The two proposed projects are: (1) Replace window sash, Crandall Building, $12,400; (2) Replace floors in dormitory, $4,500. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.*

School for the Deaf, Riverside

This residential school, located in Riverside, has a capacity of 462 residential students and 60 day students. The school is situated on 75.21 acres of state-owned land and consists of single-storied buildings of brick construction. The entire plant includes 15 dormitories with an average capacity of 31 children, one administration building, six buildings housing classrooms, buildings for vocational shops, gymnasium and exercise rooms, social hall, infirmary, kitchen, dining room, bakeshop, boiler plant, warehouse, plumbing and mechanical shops. In addition, areas are provided for recreational activities including a swimming pool, football field, baseball diamond, running track, basketball, handball and volleyball courts and playground areas for the small children. Included in the 75.21 acres on which the school is located are 13 acres of unimproved land.

The 1970–71 Capital Outlay budget proposes one major project; working drawings for a permanent facility for multihandicapped children. Also included is one minor project totaling $29,700 to provide for the reroofing of the vocational building, Palomar I dormitory and the administration building.

AUGMENTATION FOR HIGHER EDUCATION CAPITAL OUTLAY

Chapter 155 of the 1966 First Extraordinary Session established the Capital Outlay Fund for Public Higher Education. This fund will receive the revenue relating to the disposition of oil and dry gas from public lands after certain fixed charges have been provided for as specified in the original bill. The money deposited in this fund from any source whatsoever shall be available, when appropriated by the Legislature, for expenditure for capital outlay purposes relating to public higher education.

Funding for the 1970–71 University of California and State College Capital Outlay programs is dependent upon 2 sources, the General Fund and the Capital Outlay Fund for Public Higher Education. In order to simplify the accounting and budgeting procedures, $34,227,036 is to be transferred from the General Fund to the Capital Outlay Fund for Public Higher Education and, consequently, all appropriations made for Capital Outlay for the University and the State Colleges will then be made from the Capital Outlay Fund for Public Higher Education.

FIVE-YEAR BUILDING PROGRAM

GENERAL ANALYSIS

All critical capacity requirements of the University of California are being met to permit them to accept increased enrollments. Special efforts are made to maintain the planning and design activities which are essential to future growth. Through frugal allocation of resources on a priority basis, it has been possible to assure that the University will be able to fulfill its educational objectives.

Considerable attention has been and shall continue to be given to the utilization of University classrooms. The increasing enrollments, along with the difficulty of sellings bonds and the resulting slowdown in the construction program, requires that every reasonable effort be made to maximize the utilization of existing educational facilities. Studies made to date give every indication that increased utilization is possible.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the Administration. All projects reflected as funded from University overhead funds are nonstate funds are not reviewed by the Department of Finance or the Legislature.

Objectives

The University of California is a statewide institution of higher education with the following major functions:

1. *Instruction*
   a. Broadly based instruction leading to the baccalaureate degrees,
   b. Graduate programs leading to master's degrees and doctoral degrees, and programs of postdoctoral instruction,
   c. Instruction in professional fields,
   d. Programs for the preparation of teachers, and
   e. Joint doctoral programs with the state colleges.
2. *Research*
   The University is designated by the Master Plan for Higher Education in California as the primary state-supported academic agency for research, both basic and applied, and as the primary public repository for scarce documents and other unique library resources needed for the doctor's degree and for research programs.
3. *Public Service*
   Expert public service in areas related to the University's programs of instruction and research.

LAND AND FACILITIES

The University of California has nine campuses, including eight general campuses with wide ranges of academic programs and a specialized campus at San Francisco with schools of medicine, pharmacy, dentistry, and nursing.

The University's general campuses have facilities with a total area of 14,162,242 assignable square feet, excluding health sciences and residential facilities and the federal constructed radiation laboratories at Berkeley and Livermore. Following is a distribution of the total by type of room:

	Percent of Total
Classrooms	5.0
Class laboratories and service rooms	11.2
Research laboratories and service rooms	20.4
Offices and service rooms	22.4
Libraries	11.7
Gymnasia and auditoria	5.2
Shops and storage areas	9.4
Field buildings and greenhouses	4.6
Other (food service, student health, etc.)	10.1
	100.0

As the rooms in which scheduled class instruction is held, classrooms and class laboratories receive considerable attention, but they actually account for a minor proportion of the University's total space need.

[1] Nonstate funds as submitted by University of California.
[2] University overhead funds as submitted by University of California.

Laboratory work at the graduate level is conducted in research laboratories, without reference to class-change schedules which typify class laboratories. Graduate instruction per student requires four times as much laboratory and classroom space, together, as that for undergraduate instruction. As the University's enrollment is increasing relatively more rapidly at the graduate level, space needs per student in total are consequently increasing.

Facilities are converted or reassigned insofar as necessary and possible to accommodate shifts in the nature of the instructional load. One cannot infer the limits of feasible conversions from the foregoing distribution of space by types of room. The general campuses' total space of 14,162,242 assignable square feet extends in quality down through barns and storage space under bleachers.

Space needs per unit of instructional load vary widely by disciplines as well as by levels of instruction. Following is a distribution of the general campuses' assignable area among instructional disciplines other than agriculture, physical education, and military sciences:

	Percent of Total
Biological sciences	15.5
Mathematics	2.3
Physical sciences	25.5
Engineering	16.4
Social sciences	10.9
Humanities	16.9
Professions	12.5
	100.0

Engineering thus uses substantially more space than the social sciences, even though the instructional load in engineering is one-third of that in the social sciences. Total space per unit of instructional load in engineering is nearly five times that in the social sciences. Principally because of their relatively low requirements for laboratories, departments of mathematics, social sciences, and languages and literature have low space needs in relation to those of the biological sciences, physical sciences, and engineering.

Space needs of the University which are related to enrollment are projected on the basis of space allocations published in the *Restudy of the Needs of California in Higher Education* adjusted for classrooms and class laboratories to the standards approved by the Coordinating Council for Higher Education in September, 1966. The allocations differentiate among the disciplines and among the levels of instruction within each discipline. Budget controls are applied to total areas, in addition to which there are supplementary "cross-sectional" controls on classrooms, faculty offices, library seating, and such other facilities for which specific, workable policies can be established.

Space needs of organized research units (e.g., Berkeley's Virus Laboratory) are not relatable to enrollment, being far more dependent on the nature and magnitude of the research effort to be accommodated. No allowances are calculated for them with restudy standards, and their space is excluded from analyses of instructional capacity. Proposals for organized research units, as for other activities not covered by the restudy standards, are prepared and reviewed on the bases of whatever estimating guides and projections are appropriate.

In addition to its general campuses, the University of California owns and maintains outlying areas under the control of individual campuses, agricultural field stations and research stations, extension centers, storage facilities, and affiliated institutions. Following is a summary of University of California land areas which existed in July 1968. The county in which the area is located appears in parentheses after the name.

	Areas in acres:		
Campuses	*Main*	*Outlying*	*Total*
Berkeley (Alameda/Contra Costa)	1,239	591	1,830
Davis (Yolo/Solano)	3,772	–	3,772

UTILIZATION OF CLASSROOMS AND LABORATORIES

The following table indicates the effectiveness of the continued efforts of the University to improve the use of all types of instructional facilities.

HISTORICAL SUMMARY OF UTILIZATION RATES AND UNIT AREAS—GENERAL CAMPUSES [1] MONDAY–FRIDAY, 8 a.m.–5 p.m.—ALL BUILDINGS

Measurement	*Fall 1961*	*Fall 1962*	*Fall 1963*	*Fall 1964*	*Fall 1965*	*Fall 1966*	*Fall 1967*	*Fall 1968*
CLASSROOMS (Seminar rooms included)								
1. Number of scheduled rooms	652	679	689	772	803	927	921	945
2. Total stations in those rooms	40,778	41,201	40,647	44,821	45,795	52,165	51,659	52,256
3. Total ASF in scheduled rooms	520,379	530,957	524,858	571,287	583,836	673,632	674,636	688,253
4. Mean class size (WSH/WRH)	31.6	31.8	33.5	33.4	32.1	31.8	32.9	32.8
5. Mean room size (stations/rooms)	62.5	60.7	59.0	58.1	57.0	56.3	56.1	55.3
6. Sched. weekly room—hrs. per room	26.1	26.9	27.1	26.7	28.0	26.3	27.1	27.1
7. Station occupancy (4 as percent of 5)	51%	52%	57%	57%	56%	56%	59%	59%
8. Scheduled ASF per station	12.8	12.9	12.9	12.7	12.7	12.9	13.1	13.2
9. Scheduled ASF per 100 WSH	97	92	84	83	81	87	82	82
10. Total ASF, incl. service rooms [2]	534,713	542,446	556,323	594,313	607,377	703,945	740,248	726,305
11. Total ASF per scheduled station [3]	13.1	13.2	13.7	13.3	13.3	13.5	14.3	13.9
12. Total ASF per 100 WSH [3]	99	94	89	86	84	91	90	86
CLASS LABORATORIES (All levels)								
1. Number of scheduled rooms	521	534	534	582	574	585	575	435
2. Total stations in those rooms	12,956	13,296	13,543	15,776	15,564	15,993	15,989	12,523
3. Total ASF in scheduled rooms	548,164	575,213	566,150	639,038	633,931	641,915	638,764	482,777
4. Mean class size (WSH/WRH)	17.2	18.1	18.6	18.4	18.5	18.2	19.7	19.7
5. Mean room size (stations/rooms)	24.9	24.9	25.4	27.1	27.1	27.3	27.8	28.8
6. Sched. weekly room—hrs. per room	15.3	16.1	16.5	15.8	16.9	15.6	15.5	15.6
7. Station occupancy (4 as percent of 5)	69%	73%	73%	68%	68%	67%	71%	68%
8. Scheduled ASF per station	42.3	43.3	41.8	40.5	40.7	40.1	40.0	38.6
9. Scheduled ASF per 100 WSH	400	371	346	378	352	386	364	362
10. Total ASF, incl. service rooms [2]	929,701	968,306	955,080	949,925	1,016,928	1,184,649	1,210,264	971,883
11. Total ASF per scheduled station [3]	72	73	71	60	65	74	76	78
12. Total ASF per 100 WSH [3]	679	625	583	562	564	712	690	728
TOTAL ORGANIZED—CLASS FACILITIES (Above combined) [4]								
13. Scheduled ASF per 100 WSH	158	151	138	141	135	140	132	120
14. Total ASF per 100 WSH	217	206	192	180	180	201	196	174
15. Total ASF per 100 total SCH	– [6]	221	200	182	177	178	166	166 [5]

[1] UCB, UCLA, UCD, UCR, and UCSB in all years; UCSD in all years but 1961; UCI and UCSC in 1966 and later years.
[2] Unscheduled rooms of the indicated type are included with the related service rooms (lines 10–12, 14, and 15).
[3] Line 11 is based on lines 2 and 10; line 12 is based on line 10 and the same scheduled WSH as in line 9.
[4] Line 13 as line 9, but with classrooms and class-labs combined; similarly, line 14 as line 12, but combined. Line 15 as line 14, but with total student-credit-hours of *all* instruction (excluding Extension) as divisor.
[5] Line 15 (only) includes special and individual-study labs, separately classified in 1968 facilities inventory as in U.S. Office of Education's classification system and thus not included in 1968 class-lab data in lines 1–14.
[6] Correspondingly tabulated student-credit-hour data for Fall 1961 are not available.
[7] Optometry and Public Health enrollments included in the general campus enrollments through 1970–71, in health sciences thereafter.

UNIVERSITY OF CALIFORNIA—Continued

ENROLLMENT

The University's capital improvement needs are estimated by application of space standards to various projected units, the principal base being enrollment. Because of lead-time requirements of physical planning and construction, enrollments and estimates of enrollments for a period of 10 years are critical to the current capital improvement budget, and estimates much further into the future are necessary to ensure that projects currently budgeted will work well in each campus' long-range development.

The University's enrollment projections are based on potentials calculated by the population studies section of the State Department of Finance, which starts with historical data on enrollments back to the first grade, and projects them forward by means of grade-progression ratios. Adjustments are introduced as required for trends and complete coverage of the projections. The resulting projections are modified by the University (1) to achieve the 40:60 lower-division to upper-division ratio proposed in the Master Plan for Higher Education in California, (2) to reflect revised plans for year-round operation, and (3) to take into account physical limitations in growth.

The enrollments below for 1970–71 have been revised recently to reflect the actual enrollment experience for 1969–70 and the deferment of the use of the summer quarter for the full regular program. No such adjustments have yet been applied to the enrollments beyond 1970–71. Those enrollments shown for 1971–72 and beyond are the ones used as the basis for the University's proposed 1970–75 Capital Improvement Program. Enrollments for the summer quarter are expressed in terms of equivalent average enrollment for the other three quarters; the actual enrollments in the summer quarter would be three times the figures shown.

FULL-TIME EQUIVALENT STUDENT ENROLLMENT—UNIVERSITY OF CALIFORNIA

FUND SOURCES

State funds are extended as far as possible in the University's Capital Improvement Program by heavy dependence on assistance from nonstate sources. Maximum possible federal grants are assumed under the matching limitations of particular grant programs.

Projects whose nonstate sources are federal funds require some state funds because of fund-matching provisions of nearly all grant programs, but several types of projects are scheduled to be financed entirely from nonstate funds other than federal. Some are to be funded by loans, to be repaid by revenues from the users. Some are appropriately dependent upon gifts. Others, such as student health facilities, are scheduled for funding by students' incidental fees, possibly supplemented by gifts. Following are types of projects currently scheduled to be funded completely from nonstate sources:

- Residence halls and apartments
- Parking—surface and structures
- Cafeterias
- Student and faculty centers
- Athletic facilities beyond requirements for organized instruction
- Student health facilities

FEDERAL FUNDS

The University's five-year capital outlay projections include estimates of the amount of federal construction grant funds which potentially might be obtained for individual projects in the building program. The estimated amounts shown are based on matching requirements of all currently active federal construction grant programs. Each federal dollar figure shown in the "Actual" column represents a grant award, and each federal dollar figure shown in the "Estimated," "Proposed," or "Projected" column represents a potential federal grant for the project involved.

Among the federal sources currently available are the following programs: Higher Education Facilities Act, Title I, which provides up to one-half of the cost of constructing classrooms, laboratories, and other academic facilities to be used primarily for undergraduate instruction; Higher Education Facilities Act, Title II, which provides up to one-half of the cost of constructing graduate and faculty instructional and research facilities; National Science Foundation Graduate Science Facilities Program, which provides up to 50 percent of the cost of constructing graduate research facilities; the Health Professions Teaching Facilities Program, which provides grants up to two-thirds of the cost of constructing facilities for the training of physicians, dentists, pharmacists, optometrists, podiatrists, nurses, veterinarians, and public health personnel; and the Health Research Facilities Program, which provides grants for up to 50 percent of the cost of constructing facilities designed for research in the health science disciplines.

Applications procedures require that schematic plans for the project be completed prior to submittal of the proposal, and that strong justification of need for the facilities be provided. The institution must also show evidence that the required matching funds are available or firmly committed before a grant is made.

Over the past five years the University has obtained approximately $109 million in federal matching grants from the agency programs listed above. These grants reduced state fund requirements for general campus undergraduate and graduate facilities by approximately $56 million, and for health science instructional and research facilities by approximately $40 million. An additional $13 million in grants was received to aid in the construction of research facilities designed to accomplish specific research objectives.

FIVE-YEAR CAPITAL OUTLAY PROGRAM

It should be noted that the last four years of the five-year building program is the University's current estimate of need and does not represent a program approved by the administration.

The five-year Capital Outlay Program of the University of California is planned to accommodate a projected enrollment increase from 1970–71 to 1974–75 of 17,267 FTE students during the 3-quarter academic year. An additional 6,566 FTE student enrollment increase for the same period will be handled through increased utilization in the summer quarter afforded by further implementation of year-round operations.

Five-Year Program
(In thousands)

	1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
Total	$25,391	$234,548	$163,431	$133,242	$130,047	$686,659
State	16,120	133,966	97,367	87,784	82,178	417,415
Nonstate	9,271	100,582	66,064	45,458	47,869	269,244

Universitywide

The University of California is governed, in accordance with the State Constitution, by a corporate body titled The Regents of the University of California. The president of the University is the executive head of the University in all its departments and all its campuses. The president and his staff, with headquarters in University Hall at Berkeley, direct the development of major policy for the statewide University.

In recent years, with the growing size and complexity of the University, efforts have been made to delegate responsibility and decentralize as much administrative detail to the campus level as is possible.

Various statewide functions of the University are included in this section, including preliminary and general planning.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the Administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75

55	**Berkeley Campus**							
56								

57 The Berkeley campus looks westward upon San Francisco Bay and the Golden
58 Gate and extends into the wooded Berkeley Hills, and comprises just under 200
59 acres of flatland in the core area, over 1,000 in the hills, and over 500 acres
60 in outlying property. Fall 1969 enrollment at Berkeley was 26,062. Although the
61 campus is at its enrollment ceiling, its need for additional space continues to grow
62 as the student body shifts toward the graduate level. Berkeley now has 9,233
63 graduate students enrolled, but approximately one quarter of its graduate growth
64 is still ahead. Instruction spans nearly every field of human knowledge. Prominent
65 and productive authors, composers, artists and architects are numbered among
its faculty along with widely respected humanist scholars and world recognized
pioneers in the physical, biological and social sciences.

The last four years of the five-year building program are the agency's current estimates of need and do not represent a program approved by the Administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

MAJOR PROJECTS [k]							
Mathematical sciences building	–	–	$700,000 [B] 2,680,000 [F]	$350,000 [B]			
First increment to equip 107,894 assignable square feet of classrooms, class laboratories, offices, and a branch library for the departments of mathematics, statistics, and computer sciences. The project has been assisted by federal construction grants which provide an additional 46,526 asf for graduate instruction in mathematics and related fields. Project completion is scheduled for September 1970.							
Undergraduate library	–	$96,600 [C]	450,000 [B]				
To equip a building of 89,204 assignable square feet, including 81,626 asf for undergraduate open-stack collections of 150,000 volumes, with individual reader-stations, and 7,578 asf of classrooms and seminar rooms, including approximately 955 asf for the department of art history.							
Approximately 20 FTE professional staff and 22 FTE general assistance staff will provide service in the library facility.							
Life sciences building alterations	–	528,000 [C]	75,000 [B]				
To equip 8,188 assignable square feet of areas in this forty-year-old building, for the newly developed program of neurobiology in the department of bacteriology and immunology. Included are 2,680 asf of offices, 4,508 asf of class laboratories and research laboratories, and 1,000 asf of alterations to vivaria facilities as required to conform with current code regulations.							
Cory Hall alterations	–	77,000 [C]	17,000 [B]				
To equip five faculty offices and two double offices for seven faculty members; to equip part of a remote computer input/output facility for undergraduate and graduate students for the department of electrical engineering and computer sciences.							
Southside student housing	–	79,000 [2]	481,000 [2] 3,840,000 [1]				
Bodega marine laboratory addition	–	–	660,000 [F]				
Utilities and site development, 1971–72	–	–	–	438,000 [C]			
Forest products laboratory addition, Richmond Field Station	–	–	–	934,000 [C] 70,000 [B] 279,000 [F]			
Entomology and genetics facilities, Oxford Tract	–	–	–	149,000 [W]	$2,679,000 [C] 1,508,000 [F]	–	$402,000 [B]
Botany plant growth laboratory	$30,000 [W]	–	–	1,062,000 [C] 217,000 [B]

Unfunded projects							*6,293,000*

Davis Campus

Davis is a residential campus located 13 miles west of Sacramento in the heart of the farmland of the Central Valley. The college of letters and science, established in 1951, and the college of engineering, established in 1962, now accommodate approximately 80 percent of the Davis campus enrollment, while the campus continues to be one of the world's leading agricultural teaching and research centers.

Of the 10,708 students enrolled in fall, 1969, about half live in the campus' residential facilities. Approximately one-fourth of the students are graduates. Central campus areas are developing rapidly as agricultural and service activities are being relocated to the periphery. Construction has begun on new permanent facilities for the biological sciences and for physics. A large addition for the department of chemistry will be under construction before the end of fiscal year 1969-70.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the Administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
1–3			**Davis Campus—Continued**					
4	**MAJOR PROJECTS** [k]							
6–12	Physics Unit 1 First increment to equip a building of 73,101 assignable square feet with offices, classrooms, and teaching and research laboratories for the departments of physics and geology. The project has been assisted by a grant from the Higher Education Facilities Act, Title I. Building completion is scheduled for October, 1970.	–	–	$500,000 [E]	$500,000 [E]			
13–16	Campus storm drainage discharge To prepare working drawings for and construct a campus storm drainage discharge system to provide storm water drainage for the central campus area.	–	–	668,000 [C]				
17–22	Utilities and site development, 1970–71 To prepare working drawings for and construct utilities and site development, including extension of campus water, steam, power, and communication systems, and construction of campus storm drainage, road, and access facilities.	–	–	979,000 [C]	442,000 [C]			
23–35	Biological sciences unit 4 To provide the first increment of equipment for a building of 124,737 assignable square feet of classrooms, offices, laboratories, and related facilities for the departments of biochemistry, vegetable crops, entomology, and genetics. Of the total building areas, approximately 3,000 asf will provide general classrooms and seminar rooms, and approximately 9,000 asf will house agricultural extension, USDA, the California Department of Public Health, and postdoctorals attached to these departments. The project has been assisted by construction grants from Title II of the Higher Education Facilities Act, and from the National Institutes of Health.	$172,719 [C] 93,400 [2]	–	400,000 [E]	705,000 [E]			
36–41	Chemistry addition To provide the first increment of equipment for the chemistry addition, a building of 79,038 assignable square feet, with 44,571 for the department of chemistry, 10,080 asf for the department of engineering, and 24,387 asf for a physical sciences branch library.	4,185,000 [C]	–	334,000 [E]	625,000 [E]

Parking lots	77,000 [1]						
	10,100 [2]						
Relocate seed processing lab and garage	33,648 [1]						
Totals, Major Projects	$8,649,316	$824,000	$2,883,000	$6,451,000	$17,223,000	$4,598,000	$9,757,000

MINOR PROJECTS [k]

Wildlife and fisheries biology facility—Construct speedspace type building near Ecology Institute, with 2,800 assignable square feet of office, research, and teaching laboratory space for instruction and research in wildlife and fisheries biology, for the department of animal physiology	–	–	$65,000
Medical health sciences library addition—Construct 2,400 asf addition to present health sciences library facilities to meet the needs of the health science schools	–	–	65,000
Botany greenhouse—Construct greenhouse of 2,500 asf near Robbins Hall to provide facilities for growing quantities of expendable plant materials for undergraduate courses, and for holding experimental plant materials related to plant physiology courses, for department of botany	–	–	65,000
Ecology institute-fisheries biology research facilities—Install specialized aquarium-type facilities for hatching and rearing juvenile trout; includes a 5,000-gallon tank with controlled water supply, including pipe lines, aerator, five pumps, three filters, three coolers, and related electrical work to supply 50 plastic fish tanks, for teaching and research in fisheries biology	–	–	65,000
Agricultural toxicology building—Increase electrical power to accommodate required laboratory equipment, install electrical panel, capacitors and transformers to increase electrical power	–	$36,000	
Home economics building—Remove partitions, relocate equipment, install benches, cabinets and utilities where necessary	–	65,000	
Haring Hall clinic space—Remove partitions and cabinets and provide laboratory benches and utilities as needed to convert present clinic space into office and research laboratories	–	65,000	
Mezzanine addition to central storehouse—Provide 5,200 square feet of materials storage space to supplement the existing facility	–	55,500	
Entomology—Construct step II of bee-biology laboratory building	$65,000		

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Davis Medical

The new school of medicine on the Davis campus opened in fall, 1968, admitting its first class of 48 students. Classes will be conducted in interim temporary facilities until permanent buildings, now being planned, can be constructed. Clinical programs will initially be carried on at the Sacramento General Hospital. A basic sciences building, a campus hospital and a clinical sciences building are projected for future development in the health sciences area and will permit expansions of medical class size to 128 students. The medical complex will be constructed on the approximately 150 acres on the western periphery of the central campus area reserved for the health sciences in the Davis Long Range Development Plan.

The Davis campus affords a favorable environment for a school of medicine, with many opportunities for interaction with other schools, colleges, departments, and laboratories. The campus is outstanding in the breadth and depth of its teaching and research programs in the biological sciences. The new school will also benefit through integration of programs with the school of veterinary medicine, permitting research in the relationship of animal diseases and human diseases.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

46	**MAJOR PROJECTS** [k]							
48	Facilities at Sacramento General Hospital, step 2	–	$423,000 [C]	$135,000 [E]				
49–53	To equip a 9,600 assignable square foot surge-type building on land adjacent to Sacramento General Hospital to provide laboratory and support space for clinical faculty having their primary teaching and research functions at the hospital, and to provide specialized facilities for surgery training and research.							
54	Equipment for medical surge facilities	–	–	241,000 [E]	$169,000 [E]			
56–58	To equip 7,200 assignable square feet of clinical laboratory areas in speed-space type facilities required to meet the immediate needs of 18 FTE faculty, and clinical students at the Davis school of medicine.							
60	Veterinary medical facilities unit 1, experimental animal housing	–	1,373,000 [C] 939,000 [F]	75,000 [E]				
61–65	To equip 11 multidisciplinary research laboratories and laboratory service rooms for use in an experimental animal housing facility for large and small animals and poultry. The facility will consist of 43 separate one-story animal housing structures and appurtenances plus special-type							

poultry research unit, large animal research and quarantine units, small animal research units, a foaling unit, a stud barn, mare research buildings, feed storage, and a turkey research unit.

Irvine Campus

The 1,501-acre Irvine campus is located in Orange County, approximately three miles from the Pacific Ocean. It is one of the University's newest campuses, having begun operations in 1965 in facilities designed to accommodate 2,000 students. Fall 1969, enrollment was 3,804 students, including 574 medical students in the California College of Medicine. Irvine is scheduled to reach its planned maximum enrollment of 27,500 by 1990.

The opportunity to create new educational programs has drawn faculty members to Irvine from many leading institutions. The fine arts development, for example, contemplates the emergence of a "fine arts village" and represents a 20-year plan designed to thrust the campus into the forefront of fine arts education. The student is offered an excellent, individualized program of study through sound counseling, pass-fail options, credit by examination, and an array of instructional services. Emphasis is being placed on new uses of television, computers, language laboratories and other modern electronic and mechanical instruments.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

4	**MAJOR PROJECTS** [k]							
5–6	Engineering unit 1	$584,000 [E]	–	$200,000 [E]	$472,000 [E]			
7–15	To provide a second increment of equipment for engineering unit 1, a building with 106,600 asf of instructional and research areas for the departments of engineering (67,642 asf), information and computer science (10,294 asf), the campus computer facility (10,840 asf), classrooms and seminar rooms (9,277 asf), and federally funded areas (8,580 asf). The project has been assisted by grants under the higher education facilities act, Titles I and II.							
16	Natural sciences unit 1 conversion to biological sciences unit 1	825,000 [C]	–	200,000 [E]	184,000 [E]			
17–27	To provide an initial increment of equipment for 33,000 asf of reassigned and altered instruction and research areas as part of a 37,464 asf project to house the school of biological sciences in biological sciences unit 1 (formerly natural sciences). Areas to be equipped include seven undergraduate multi-disciplinary wet laboratories and 36 research laboratories and service rooms for studies in molecular and cell biology, organismic biology, population and environmental biology, and psychobiology. Included will be equipment for a machine shop, a student workshop, and for vivarium areas.							
28	Sewage disposal contract, 1970–71	–	–	237,000 [C]				
29–32	To construct sewage treatment and disposal facilities under a contractual obligation of the University to the Irvine Ranch Water District for the treatment and disposal of sewage from the Irvine campus.							
33	Utilities and site development, 1970–71	–	–	319,000 [C]	852,000 [C]			
34–41	To prepare working drawings for and construct utilities and site development, including extension of campus high temperature water supply and return, chilled water supply and return, natural gas, compressed air, domestic water, high voltage power, fire alarm, and communication systems, construction of a reclaimed water system, and construction of campus storm drainage, road, and access facilities.							
42	Humanities—social sciences unit 1 conversion for humanities	–	$10,000 [W]	242,000 [C] 100,000 [E]	30,000 [E]			
43–46	To construct alterations to adapt 14,900 asf of multidisciplinary space vacated by social science department for use by the school of humanities for general academic and departmental purposes.							
47	Greenhouse unit 2	–	–	–	83,000 [C] 9,000 [E]

Student center in humanities/fine arts	60,000 [1]						
North campus lab building unit 1	50,000 [1]						
Totals, Major Projects	$14,464,000	$6,101,400	$1,298,000	$15,686,000	$15,003,000	$10,188,000	$10,677,000

MINOR PROJECTS [k]

Physical sciences building modification—Enclose approximately 1,400 square feet of space under building overhang on the first floor to increase area of the physical sciences library, room 168, to a total of 3,850 square feet. The additional floor space will make it possible to increase the total book capacity from 14,000 to 24,000 volumes and expand reader stations from 32 to 60 to accommodate increased student enrollment	–	–	$40,000				
Science lecture hall alterations—Remodel the science lecture hall to provide a modernized teaching facility of approximately 350 seats for use by the schools of engineering, physical sciences, biological sciences, and social sciences. Included will be a small television control room, area for science visual projection equipment; auditorium to be equipped with television monitors; signaling devices at each seat will enable students to communicate with lecturer regarding pacing of material to maximize teaching effectiveness	–	–	43,400				
Outdoor aquatic pond growing facilities—Construct two cement-lined pools with appropriate source and drain facilities, each with an area of 600 sq. ft. and a depth of two feet maximum, for the culturing of aquatic plants for teaching and research as required by the department of organismic biology	–	–	11,000				

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Irvine Medical

The Long Range Development plan for the Irvine campus reserves approximately 150 acres on the western periphery of the campus in a contiguous extension of the biological sciences sector for the development of a major center for teaching, research, and public service in the medical and health sciences. The principal activity to be located initially in this area will be the California College of Medicine, which will be moved from its present site in Los Angeles as soon as interim facilities currently under construction on the Irvine campus can be completed. Medical class size will be maintained in such facilities at a 64-student level with total enrollment, including graduates and interns and residents, approximating 650–700, until the first permanent medical sciences unit is occupied, at which time class size will increase to 128 students and total enrollment in the medical school will increase to approximately 1,200.

Faculty and student facilities are also being arranged for at Orange County Medical Center and the college's clinical programs will initially be carried on at the center and other affiliated hospitals. Working drawings for the first permanent structure on campus for the medical school, Medical Sciences Unit I, to provide primarily basic science facilities for medical classes of 128 students each, were funded in 1968–69 and construction funding of this unit is scheduled for 1971–72. A campus hospital and a clinical sciences building are projected for near-term future development in the health sciences area to complete the permanent facilities required for the medical school at the 128-student class size level.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

	MAJOR PROJECTS [k]							
	Medical surge facilities	$100,000 [E]	$700,000 [E]	$342,000 [E]				
	To complete equipping step II of medical surge facilities, consisting of 54,000 assignable square feet, including student teaching facilities (26,600 asf), departmental space with offices and laboratories for 26 FTE faculty (14,700 asf); a biomedical library (7,500 asf); and miscellaneous storage areas, a central vivarium, a shop, AV/TV area, and a computer area (5,200 asf).	2,221,081 [C]

Los Angeles Campus

The Los Angeles campus is located on a 411-acre site in Westwood, a suburban community in west Los Angeles. Academically ranked among the leading universities in the United States, it has attracted distinguished scholars and research specialists from all over the world. The curricula include undergraduate and graduate instruction in all of the major arts, letters, and sciences as well as in a variety of fields in professional schools. Emphasis is given to studies in the health sciences, fine arts, languages, and science and engineering fields related to electronics and aerospace technology.

Los Angeles has reached its enrollment ceiling of 27,500. However, the percentage of the student body enrolled at the graduate level is increasing. Because graduate students require more space than undergraduates, the campus continues to need additional physical facilities.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

MAJOR PROJECTS k

Dickson Art Center alterations for architecture	–	–	$60,000 E

To equip approximately 300 student stations in the studio drafting rooms of the school of architecture. $103,000 was provided for equipment in 1966–67 in order that the newly formed school of architecture could function. Funds for construction were provided in the Budget Act of 1967. The first class in the Master of Architecture (Urban Design) program demonstrated the need for a more compact functional type of work station. Provided by this project will be units consisting of an adjustable drafting surface, a reference shelf/desk, and a drawing storage container.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Los Angeles Health Sciences

Development of a health sciences center at UCLA began in 1946, but permanent facilities on the campus did not become available until 1954–55, when the first units of the basic sciences and hospital facilities were completed. A 30-acre site in the southern portion of the main campus was reserved for the development of the medical school and related facilities. In addition, a 35-acre tract to the west of the main campus, designated as the West Medical Campus, was also reserved for health sciences development. The first major expansion of facilities for the center occurred in 1961 with the completion of the Neuropsychiatric Institute, Brain Research Institute, the Laboratory for Nuclear Medicine, and the Marion Davies Clinic. The new School of Dentistry Building was completed in fall of 1966 with capacity for 96 students. The Physical Rehabilitation Unit was also occupied in 1966 on the West Medical Campus.

Currently under construction are major expansions of the basic science facilities of the school of medicine and the University hospital and clinics. These expansions will enable the school of medicine to increase its class size to 128 students and to expand greatly its graduate and intern and resident training programs.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

Riverside Campus

The Riverside campus is situated in the foothills of the Box Spring Mountains, east of the City of Riverside. Undergraduate and graduate programs are offered in the college of letters and science and the school of agricultural sciences. The college of letters and sciences has been rated in a national survey as one of the 10 best liberal art institutions in the United States. One unique educational feature has been the establishment of three language houses—French, German, and Spanish—where students may develop conversational skills in a foreign language and participate in cultural programs. Riverside's Citrus Research Center and Agricultural Experiment Station are among the world's foremost research institutions devoted to subtropical and arid agriculture. With these and other research units, Riverside is becoming an international clearinghouse for information and research on air, land, and water resources.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

MAJOR PROJECTS [k]							
Library building alterations, step 2	–	$162,000 [c]	$32,000 [E]				
To equip the second series of alterations to the older sections of the library building undertaken to provide a learning resources center, a humanities and social science rare and fragile materials collections department, and special undergraduate and graduate reading areas.							
Utilities and site development, 1970–71	–	–	356,000 [c]	$831,000 [c]			
To prepare working drawings for and construct utilities and site development including installation of emergency electric power systems, construction of lighting and storm drainage systems, and extension of a campus access road.							
Social sciences unit 2	–	–	210,000 [W]	1,899,000 [c] 2,700,000 [F]	$570,000 [E]		
To prepare working drawings for a 68,500 asf facility containing academic and departmental administrative office space and class laboratories for the departments of anthropology, economics, political sciences, sociology and the school of administration.							
Citrus research center, laboratory air conditioning	–	–	–	226,000 [c]			
Soils building alterations	–	–	–	304,000 [c] 25,000 [E]			
Webber Hall addition	$175,000 [W]	5,588,000 [c]	–	–	500,000 [E]	$500,000 [E]	
Culture preparation building	–	–	–		174,000 [c] 32,000 [E]		
Central utilities building	–	–	–	1,547,000 [c] 1,625,000 [F]			
Glasshouse and headhouse No. 15	–	–	–	249,000 [c] 25,000 [E] 95,000 [F]			
Air condition physical education unit 1	–	–	–	99,000 [c]			
Entomology annex unit 2	–	–	–	203,000 [W]	2,490,000 [c] 3,400,000 [F] 1,000,000 [F]	1,710,000 [E]	
Webber Hall alterations	–	–	–	11,000 [W]	236,000 [c] 60,000 [E]		
Utilities and site development, 1971–72	–	–	–	377,000 [c]			
Canyon Crest Road relocation	–	–	–	–	186,000 [c]		
Agricultural operations facilities improvements	–	–	–	–	297,000 [c] 17,000 [E]		
Glasshouses and headhouses 21, 22, 23, and 24	–	–	–	–	487,000 [c] 300,000 [F]	100,000 [E]	
Humanities units 2	–	–	–	–	190,000 [W]	4,771,000 [c] 1,000,000 [F]	
Utilities and site development, 1972–73	–	–	–	–	487,000 [c]		
Biological and agricultural sciences library addition	–	–	–	–	–	1,633,000 [c] 400,000 [F]	$164,000 [E]
Air pollution research center—Fawcett laboratory, unit 2	–	–	–	–	–	101,000 [W] 1,750,000 [F]	2,846,000 [c]
Student services building, step 1	–	–	–	–	–	1,419,000 [c]	140,000 [E]
Mathematics unit 1	–	–	–	–	–	74,000 [W]	2,109,000 [c] 1,930,000 [F]
Library building alterations, step 3	–	–	–	–	–	261,000 [c] 75,000 [E]	
Utilities and site development, 1973–74	–	–	–			243,000	
Engineering building	–	–	–	–	–		205,000 [W] 1,455,000 [F]
Utilities and site development, 1974–75	–	–	–	–			243,000 [c]
Construct utilities	210,000 [c]	316,000 [c]					
Equip library unit 3	292,000 [E]	99,000 [E]					
Blaine Street and Canyon Crest Road property acquisition	–	675,000 [2]					
Construct health services unit 2	100,000 [1]						
Construct replacement for soils and plant nutrition building	108,000 [1]						
Parking improvements	40,000 [2]						
Totals, Major Projects	$925,000	$6,840,000	$598,000	$10,216,000	$10,426,000	$14,037,000	$9,092,000

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

UNIVERSITY OF CALIFORNIA—Continued

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
1								
2		**Riverside Campus—Continued**						
3	**MINOR PROJECTS** k							
4								
5–8	Telephone building expansion—construct 1,500 square foot addition to house telephone switching equipment. Addition is incremental as planned and will accommodate campus need for additional telephones	–	–	$44,400				
9–12	Geology building—fume hoods—install additional blowers and motors to serve 50 fume hoods to boost face velocity to minimum safety standards. Alter flue connections as required	–	–	15,000				
13–16	Life sciences experimental area lathhouses—construct three 20x30 ft. lathhouses, including asphaltic paving. Include 1,200 sq. ft. of growing tables, 3,600 sq. ft. of grading, and domestic water connections	–	–	15,600				
17–21	General campus safety items, step 1—install approximately 200 backflow prevention check valves on gas lines; construct ground level compressed gas cylinder storage area near chemistry loading dock; install 17 exterior walk lights in dark areas of campus walk system	–	–	15,500				
22–28	Humanities unit 1 and geology building—alter classrooms 1107, 1113, and a portion of 1117 in humanities unit 1 to create an office suite for humanities department; alter offices 1141, 1145, 1149, 1138, 1140, 1150, and 1154 in geology building to create an office suite and waiting area for physical sciences department. Relocate and alter room 1216 for soils and plant nutrition department offices	–	–	19,500				
29–32	General campus—modify exterior facilities for physically handicapped by reconstructing a minimum of 20 curb and walk intersections to permit wheelchair access from sidewalks to campus streets at crossroads, step 1	–	–	5,000				
33–37	Moreno Ranch—irrigation lines, step 2—install 3,770 feet of irrigation lines and 6,410 feet of 12-inch and 20-inch drain lines in additional experimental field areas of Moreno Ranch. Include control valves, risers and distributor arms to salvage and conserve irrigation water	–	–	33,000				
38–40	Administration building unit 1 alterations—remodel approximately 10,500 asf of recently vacated building area for offices	–	$32,500					
41–43	Life sciences experimental area—construct a 600-square-foot headhouse with water deionizer and a 4,500 gallon septic tank and seepage pit	–	29,400					
44–46	Physics building unit 1—enclose west court area, including partitioning, air conditioning, electrical and miscellaneous finish work	–	24,000					
47–50	General campus—provide and install conduit and wire to connect campus fire alarm system to City of Riverside system; provide and install transmitters and master panels in all older existing campus buildings	$21,000						
51–53	Humanities building—remodel room 2115 to provide a slide room and an art classroom; alter existing slide room to provide offices	21,000						
54–57	Glasshouses and headhouses 16 and 17—renovate and remodel by installing five 208V-30 amp lines, unit air conditioners, coolers, smog filters as needed, lighting control and partitions	32,000						
58–61	Moreno Ranch—irrigation lines, step 1—install pipelines to inter-connect three wells and reservoir; install irrigation lines in experimental fields; install drainlines and collecting risers as part of run-off system	27,000						
62–64	Biological control culture preparation building—construct an insect free building for plant storage and for preparing host-plant materials	44,000						

Alterations and improvement projects of $20,000 or less	36,000	65,300					
Totals, Minor Projects	$181,000	$151,200	$148,000

San Diego Campus

The San Diego campus is located approximately three miles north of the La Jolla community in the City of San Diego. The campus site occupies 2,035 acres and spreads from the sea front, where the Scripps Institution of Oceanography is located, across a large portion of the adjacent Torrey Pines Mesa high above the Pacific Ocean.

The campus' academic plan calls for the eventual establishment of 12 colleges with a total enrollment of 27,500 students. The unique plan of "cluster colleges" was conceived to avoid the impersonality commonly associated with large institutions, while retaining the advantages of wide diversity of faculty and facilities available only at a large university. The colleges will be organized and designed, academically and physically, so that it will be possible for a student to obtain the majority of his total university experience within his own college. Each college will include both undergraduate and graduate students and will vary from the others in academic emphases.

The Scripps Institution of Oceanography is recognized as one of the most important facilities in the world for marine science research. The scope of its research includes physical, chemical, geological and geophysical studies of the oceans as well as biological studies. Instruction is at the graduate level, with enrollment usually limited to candidates for the Ph.D.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

MAJOR PROJECTS [k]

John Muir College—building 2B	–	$400,000 [E]	$281,000 [E]	
To complete equipping building 2B at John Muir College. The building consists of 44,000 asf of classrooms, laboratories and offices for instruction and research to house the department of biology and a central services facility of 1,000 asf. Funds for construction were provided in the Budget Act of 1967, assisted by a grant from the Higher Education Facilities Act, Title I.				
Central university library building, step 1	$1,272,793 [F]	200,000 [E]	130,000 [E]	$479,000 [E]
To provide the second of three increments of equipment for the central university library building, step 1, a library of 110,225 asf to accommodate the campus' undergraduate library, and to provide the first increment of library facilities for graduate students in the humanities and social sciences. The project was funded in the Budget Act of 1967, assisted by a grant from the Higher Education Facilities Act, Title II.				
John Muir College—buildings 2C and 2C′	–	385,000 [E] 81,740 [F]	220,000 [E]	
To complete equipping buildings 2C and 2C′ to accommodate the psychology and linguistics programs for John Muir College. Construction of 2C was funded in the Budget Act of 1967, assisted by a grant from the Higher Education Facilities Act, Title I; and building 2C′ was added through a grant from HEFA, Title II. Funds for an initial increment of equipment were provided in the Budget Act of 1969. The total project will provide 63,469 asf, consisting of partially state-funded building 2C with 45,594 asf for psychology and linguistics, and federally-funded building 2C′ with 17,875 asf for graduates and postdoctoral trainees for the center for information processing and the center for language acquistion.				

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

	MAJOR PROJECTS—Continued							
	John Muir College—building 2D	2,089,300 C 695,000 F	–	110,000 E	110,000 E			
	To provide the first of two increments of equipment for building 2D, consisting of 51,730 asf for the departments of anthropology, sociology, literature, history, including 3,000 asf for the college administration. Also provided will be a 220-seat lecture hall, and classrooms and seminar rooms for general college use. The project was assisted by a grant from the Higher Education Facilities Act, Title I.							
	Initial equipment for Third College	–	–	100,000 E	334,000 E			
	To provide the first of two increments of equipment to enable the Third College to open in fall, 1970 with classes in music, anthropology and visual arts to be held in various existing buildings in the Matthews area.							
	Utilities and site development, 1970–71	–	–	239,000 C	23,000 C			
	To prepare working drawings and construct utilities and site development including extension of water system, construction of campus access roads, and installation of central control facilities in the existing central utilities building.							
	Revelle College—convert areas in Urey Hall for changed occupancy, step 5	–	–	34,000 W	531,000 C			
	To prepare working drawings for conversion of 20,659 asf previously occupied by the school of medical administration and the computer center to engineering laboratories (14,220 asf) and chemistry laboratories (6,439 asf).							
	Fine arts building	181,000 W 265,000 I	–	–	4,556,000 C	$453,000 E		
	Revelle College—convert areas in humanities—library building for other academic use	–	–	–	251,000 C			
	Matthews—renovations of and additions to temporary administration building, step 1	–	–	–	120,000 C

	270,000 2						
Land acquisition	360,000 2	360,000 2					
Basic science building—Winzer lounge	83,767 1						
Mount Soledad environmental lab	74,500 F						
University hospital patient study rooms	30,432 1						
	153,600 F						
Basic science building completion	72,591 2						
Camp Elliott transmitter station	30,181 1						
John Muir College 2E step 2	46,000 2						
Residential apartments 2B	105,000 1						
Totals, Major Projects	$8,591,164	$4,153,740	$1,114,000	$25,394,000	$13,172,000	$12,616,000	$13,344,000

MINOR PROJECTS k

Scripps Institution of Oceanography library—Install metal frame windows to prevent marine air deterioration and injury to library personnel from faulty wood frame windows. Improve heating and ventilating system to bring up to standard	–	–	$65,000				
Matthews area—building T-257—Renovate 4,750 assignable square feet and enclose space between two wings by constructing 700 asf addition to provide 5,450 asf of rehearsal/performance areas for drama department	–	–	58,000				
Revelle College—undergraduate science building—Install four island laboratory benches, one wall bench, two emergency showers and lockers below benches in room 4432 for biology department	–	–	17,200				
Matthews campus—Relocate 2 sections of building 269 and rehabilitate to provide 2,768 asf for office of auxiliary enterprises, environmental health and safety and office of naval research	–	$55,000					
Scripps Institution of Oceanography—Construct a 5,040 square foot carport-type shelter for 20 sea-going refrigerated lab vans	–	27,000					
Revelle College—humanities-library building—Construct and install 35 enclosed and 20 open language laboratory stations	–	30,000					

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

San Diego Medical

The Long Range Development Plan for the San Diego campus reserves 100 acres on the southerly edge of the main campus for the health sciences. Also for the health sciences program, the University has entered into agreements with the County of San Diego to operate the County Hospital (now known as the University Hospital of San Diego County), located in the Hillcrest area of San Diego, and use it as a major clinical resource. Supporting biomedical vivaria and animal experimentation will be accommodated at the separate Camp Elliott site. Development of facilities is planned for all locations.

Under construction on the campus is a Basic Science Building, the first on-campus unit of medical school facilities. Portions of this building were completed in September 1968 and permitted the medical school to take its first class of 48 students. Initial facilities at the University Hospital for clinical faculty and programs have also been completed or funded. Proposed for funding in 1971–72 is construction of the Clinical Science Building on the main campus and construction of additional improvements to the University Hospital. Planned for future development is a teaching and research hospital on the campus and a major addition to the University Hospital to provide additional clinical departmental space and improved outpatient facilities. Sixteen acres of the health sciences area on campus have been assigned to the Veterans Administration to construct an 850-bed hospital, which will provide the campus with additional clinical resources.

The San Diego campus has an exciting opportunity to develop its two separate locations into two distinctly different, but complementary, educational resources. The University Hospital will be representative of the best in community patient care, and the campus hospital will be developed with the most advanced medical techniques and research disciplines.

The overall medical education, research, and patient care concepts and goals are of a single nature. On campus will be accommodated the basic science functions, a highly selective medical care facility, the central medical school administrative unit, with the principal University campus orientation necessary as a focus for the school of medicine. The University Hospital offers valuable teaching and research opportunities as a general service hospital facility, provides a link with the overall community of medical care, and opens the potential for outstanding programs of study and training in paramedical and health-related disciplines.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

MAJOR PROJECTS [k]				
Improvements at University Hospital of San Diego County, 1969–70	–	$939,000 [C] 15,000 [E]	$39,000 [E]	$10,000 [E]
To provide the second of three increments of equipment for an orderly series of improvements at the University Hospital of San Diego County, including expansion of radiology areas, relocation of the emergency department, and remodeling and expansion of the operating suite.				
Remodel nursery/delivery suite at University Hospital of San Diego County	–	–	85,000 [E]	
To provide for equipping 6,444 asf of remodeled areas in the nursery-delivery suite at University Hospital. Included will be equipment for a newborn special care unit for high-risk mothers, for expanded utility and service areas,				

School of medicine utilities and site development, 1970–71	–	–	128,000 [C]	229,000 [C]			
To prepare working drawings for and construct utilities and site development including extension of campus water system, and construction of campus road and access facilities.							
Improvements at University Hospital of San Diego County, 1970–71	–	–	1,011,000 [C] 70,000 [E]	101,000 [C] 1,000 [E]			
To prepare working drawings for, construct and equip improvements at University Hospital, principally to improve basic patient care and service facilities in the hospital in order to support the developing educational programs of the school of medicine. These improvements are part of a phased plan to upgrade the hospital to enable it to serve as the University's initial primary teaching hospital. The project will provide for (1) improvements in the hospital's electrical and mechanical services and systems, (2) remodeling of various spaces for radiology-nuclear medicine and therapy, classrooms, student ward laboratories, and outpatient clinics, and (3) installation of a passenger-service elevator.							
Addition to University Hospital of San Diego County clinical faculty wing and outpatient department expansion	–	–	–	3,393,000 [C] 2,959,000 [F]	$500,000 [E]	$540,000 [E]

San Francisco Medical Center

The San Francisco Medical Center is the second oldest unit of the University and is devoted exclusively to the health sciences. The medical center is located on the northern slopes of Mount Sutro which, with its heavily wooded slopes is one of the principal natural areas of the community. Buildable land (mainly along the Parnassus shelf) is extremely limited and additional building sites must gradually be acquired to accommodate necessary expansions. Because many medical center functions demand close proximity to one another, the central campus area also must continue to develop in the intensive character of an urban center.

The San Francisco Medical Center offers professional programs in medicine, dentistry, pharmacy, and nursing and serves as a major center for graduate training in the medical specialties and the basic sciences. Health science facilities include the Herbert C. Moffitt and University of California hospitals, the Medical Sciences Building, the Medical and Dental Clinics Building, the Langley Porter Neuropsychiatric Institute (a training and research hospital operated jointly with the California Department of Mental Hygiene) and the new Health Sciences Instruction and Research Unit 1.

The expanded campus plan will accommodate enrollments of approximately 2,850 students, with approximately 550 in the school of dentistry, 500 in the school of nursing, 550 in the school of pharmacy, and 1,250 in the school of medicine. Substantial financial support is anticipated from federal grant programs for all expansion.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
19	**MAJOR PROJECTS** [k]							
21	School of nursing building	$1,620,700 [c]	–	$200,000 [E]	$100,000 [E]			
22–30	To provide the first increment of equipment for the school of nursing building, consisting of 46,040 asf of classrooms, laboratories, offices, and supporting services for the school of nursing. Construction was funded in the Budget Act of 1968, assisted by a nurses training grant under the Health Professions Educational Assistance program. The facility will permit planned enrollment increases from 376 in fall, 1966 to 520 projected for 1973–74, including 210 in graduate programs.							
31	Clinical faculty facilities, San Francisco General Hospital	–	–	215,000 [c] 243,000 [F]	143,000 [E]			
32–36	To prepare working drawings for and construct alterations to 5,800 asf in building 100 at the San Francisco General Hospital to provide laboratory, office, and support facilities for clinical faculty and related graduate students located at the hospital.							
37	Medical sciences building 2nd floor alterations	–	–	120,000 [c]	10,000 [E]			
38–41	To prepare working drawings, and construct alterations to 4,600 asf being vacated by school of nursing on 2nd floor of medical sciences building for offices for dentistry, human biology, and graduate division, and a classroom.							
42	Clinics alterations for additional dental chairs	–	–	155,000 [c]	60,000 [E]			
43–46	To prepare working drawings for and construct alterations to 1,960 asf on the 6th and 7th floors of the clinics building to relocate existing clinic dispensaries and expand the main clinics to provide additional dental chairs.							
47	Land acquisition, dentistry building	–	–	–	1,400,000 [1]

Moffitt Hospital alterations related to service block addition, step 1	–	–	–	–	–	–	94,000 W
Old Langley Porter Neuropsychiatric Institute alterations	–	–	–	–	–	–	50,000 W
Parnassus Avenue campus development	–	–	–	–	–	–	30,000 W
Unit for pharmaceutical chemistry graduate program	–	$131,000 E					
Utilities expansion—west side of campus	155,000 C						
Lab of radiobiology building addition	276,000 F						
Alterations to south med	432,000 1						
Nuclear medicine addition	127,285 1						
Alterations and expansion of radiology lab	42,782 F						
Radiology alterations at UC Hospital	42,600 F						
Improve laboratory—animal facility	37,000 F						
Addition to clinics building	132,177 C						
Maintenance shops	63,275 C						
Totals, Major Projects	$3,505,252	$131,000	$933,000	$28,989,000	$14,651,000	$4,782,000	$6,043,000

MINOR PROJECTS k

Medical sciences building—animal tower—Vermin-proof cage rooms and corridors of floors 4 to 10, approximately 8,820 assignable square feet, by replacing existing suspended acoustical tile ceilings with cement plaster ceilings, and by installing stripping at doors; provide mechanical and electrical work as required	–	–	$46,000
Medical sciences building—animal tower—Extend ventilation system of the animal tower into rooms 400L, 600L, 800L, 1000L, 1100L, 1200L, 1300L, and 1400L, a total of 522 asf, and provide individual room temperature control; adjust total ventilating system to provide 10 15 air changes per hour; rebalance ventilating system to prevent movement of airborne contaminants into animal rooms	–	–	7,800
San Francisco General Hospital—Remodel rooms 305 and 308 from laboratories into animal care areas; convert vacated office rooms 309, 309A, and 309B into laboratories, to improve space utilization	–	–	9,300
Health sciences instruction and research building—East tower—Install thermostatically controlled heaters in ventilation ducts in rooms 1220A, 1215A, 1208, 1431, 1428, 1418A, and 1416, approximately 1,738 asf, so that proper environmental conditions for vivarium animals can be maintained	–	–	9,700
Alterations for school of human biology—Remodel approximately 3,000 asf of University-owned residences adjacent to University Medical Center to render them suitable for use as offices and study areas for 9 academic staff and 18 graduate students in the school of human biology	–	–	15,000

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Santa Barbara Campus

The Santa Barbara campus is situated on a 633-acre promontory at Goleta Point, approximately 10 miles west of the City of Santa Barbara. The major academic components of the campus are the college of letters and science, the college of engineering, the school of education and the graduate division. The goal of Santa Barbara is to provide an undergraduate liberal arts program, in a residential setting, together with graduate and professional training.

In the fall of 1962, Santa Barbara enrolled 4,550 students. By July, 1969, enrollment was 11,434, an increase of over 277 percent. By 1972–73, when projects started in 1969–70 will be occupied, enrollment will be 14,060.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

	MAJOR PROJECTS [k]							
	Heating and cooling plant, engineering unit 2	–	–	$250,000 [c]				
	To prepare working drawings for and construct a heating and cooling plant including boilers, chillers, cooling towers, pumps, instrumentation and controls attached to and to service engineering unit 2 building.							
	Utilities and site development, 1970–71	–	–	359,000 [c]	$547,000 [c]

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
1–2	**Santa Barbara Campus—Continued**							
3	MINOR PROJECTS [k]							
5–9	General campus—Provide and install equipment to bring existing fire and emergency alarm systems for permanent buildings and those major temporary buildings not scheduled for early demolition, into compliance with California health and safety standards	–	–	$65,000				
10–13	Main library—Provide and install throughout building a voice and emergency alarm system for alerting occupants and conveying exiting instructions in case of natural or man-made emergencies. Correct health and safety deficiency	–	–	18,000				
14–17	Fire station—Construct a 1,500 square foot addition to house one pumper and one hook and ladder truck scheduled for delivery in 1970, for campus fire department. Correct health and safety deficiency	–	–	65,000				
18–22	North hall—Provide and install standby chillers in south wing for protection and efficient operation of computer center equipment, and air conditioning equipment to serve laboratory rooms 1122, 1122A, B, C, and D (1,070 sq. ft.) for department of anthropology. Improve mechanical services	–	–	37,400				
23–28	Athletic activities facility—Construct an asphaltic concrete pad of 30,261 square feet north of existing running track; pad to be lined and equipped for basketball and volleyball facilities to accommodate increased enrollment in required undergraduate and graduate instructional programs for department of physical activities	–	$28,000					
29–32	Chemistry building, alterations—Convert room 2111, a 395 sq. ft. conference room to a graduate class lab; convert rooms 3110 and 3126 to staff research lab and 3215 to research lab service room	–	32,000					
33–36	Chemistry building, lecture rooms 1171 and 1179—Remove existing ceiling mounted television monitor supports and install wall mounted units and install instructional equipment for which the rooms were originally designed	–	27,000					
37–39	Arts building—Convert rooms 249, 1245, and 1251 to undergraduate labs for the chemical-nuclear engineering department	$24,607						
40	Alterations and improvement projects of $20,000 or less	14,606	49,000

Santa Cruz Campus

The 2,000-acre main Santa Cruz campus is situated at the meadow-to-forest transition line in the Monterey Bay foothills, two miles northwest of the city of Santa Cruz. The campus proposes to combine learning and living, to encourage close student-teacher relationships and to provide a mode of future growth that will permit retention of a small-campus atmosphere. The tool which is to be used to accomplish these goals is the residential college, wherein the majority of students will live, dine and receive a significant portion of their course instruction. All major disciplines are represented among the faculty fellows of a college, although each college has its own academic emphasis. Undergraduates are members both of a college and of the campus as a whole. Though based in a particular college, each student has access to courses offered in the other colleges, and to central campus facilities for those subjects that require equipment not available in individual colleges.

The college system is now funded through the fifth college. Eventually there will be 20 or more liberal arts colleges, each with its own faculty and educational philosophy. Enrollment will vary in each college from 400 to 800 students.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.

MAJOR PROJECTS [k]

Alterations to existing facilities, 1969–70	–	$265,000 [c]	$79,000 [E]				
To equip approximately 4,666 asf of class and research laboratories in natural sciences unit 1 for the departments of chemistry, biochemistry, and biology.							
Applied sciences building	$1,068,000 [c]	–	200,000 [E]	$374,000 [E]			
To provide the first of two increments of equipment for the applied sciences building, consisting of a total of 105,953 asf. Of the total area, biology will occupy 7,976 asf; computer sciences, 8,500 asf; physical sciences, 25,462 asf; administrative services, 22,140 asf; academic services, 5,878 asf; and 12,346 asf will be used for general campus storage. The 23,651 asf of expansion area will remain unfinished for the present. Building construction was provided in the Budget Act of 1967, assisted by a grant from the Higher Education Facilities Act, Title I. Building completion is scheduled for spring, 1971.							
Utilities and site development, 1970–71	–	–	323,000 [c]	847,000 [c]			
To prepare working drawings for and construct utilities and site development including extension of campus water, gas, storm drain, electrical and communication systems, and installation of central control facilities in the existing central heating plant.							
College No. 7	–	31,000 [w]	21,000 [2]	901,000 [c]	$142,000 [E]

	MINOR PROJECTS k							
	Stevenson College—Remove partition between rooms 173 and 175, now used as student common spaces, and alter space to provide a 100-station classroom; install new chalkboards in classrooms 150–151 and 160–161 to permit rearrangement of the rooms to achieve increased capacity, and install a screen wall outside windows to reduce visual and noise distractions. Using non-state funds alter two existing classrooms to replace the student common spaces given up to the 100-station classroom	–	–	$12,000				
	Field House—Remove existing hazardous floor formerly used by cafeteria; provide hardwood spring floor in the gymnasium to serve the physical education athletic programs for men, and the dance-drama class laboratory requirements for women; alter doorways and relocate equipment to new floor level as required	–	–	33,000				
	Cowell College—Replace accordion type folding partitions separating rooms 152, 153 and 154 from the main dining room, with solid folding walls to permit these rooms to be used effectively as seminar rooms. Improve lighting, and install							
	Barn II and garage—Install complete fire sprinkler system in Barn II currently used for storage and storage and in	–	–	[illegible]				

Barn H and garage—Install complete fire sprinkler system in Barn H, presently used for receiving and storage, and in the adjacent maintenance garage. This project was previously funded as part of the work proposed for Barn G and H alterations step 2 in 1969–70. Increase of the scope for the latter project due to deferments of permanent facilities precluded the installation of the fire sprinkler system within the total funds available	–	–	18,000				
Mount Hamilton—Construct and install a cassegrain multipurpose spectrograph to supplement the mounting and optics for the cassegrain secondary of the Lick 120-inch telescope at Mount Hamilton	–	–	65,000				
Site development—forest maintenance for reduction of fire hazard—continue on-going program of brush clearance, debris cleanup and poison oak eradication	–	–	44,000				
Site development—forest maintenance—provide forest maintenance for fire prevention including construction of fire trails, brush clearance and cleanup of debris	–	$50,000					
Barn G and H alterations step 2—remodel 3,708 square feet of area in Barn G to house the garage workshop and motor pool dispatch office; provide storage for campus fire equipment. Alter Barn H to provide 800 square feet of office space including utilities to house receiving department	–	65,000					
Site development—main campus entrance area—install storm drainage facilities to prevent annual flooding at campus entrance and in vicinity of farm buildings housing university departments	–	37,500					
Mount Hamilton—construct and install for two 24-inch auxiliary telescopes, supporting piers, retractable housing for the telescope mountings, light path tubes to optical parts, and related electrical services; construct small building to support dome of telescope	$50,000						
University library unit 1—alter 14,175 assignable square feet of building area to be vacated when instructional services moves into the communications building	65,000						
Natural sciences unit 1—vivarium and growth chamber area, step 2—construct a building addition adjacent to the vivarium on the roof of the building	65,000						
Alterations and improvement projects of $20,000 or less	–	6,000

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
	Agricultural Field Stations							
	The University operates 10 agricultural field stations and 3 agricultural departmental experimental areas. The field stations are available to all agricultural research departments that require the precise local environment offered by the individual stations; the departmental experimental areas are for the purpose of achieving optimum environment for crops of particular interest, such as in viticulture.							
	The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the Administration. All projects reflected as funded from University overhead funds or nonstate funds are not reviewed by the Department of Finance or the Legislature.							
	MINOR PROJECTS [k]							
	Kearney Horticultural Field Station—Develop approximately 43 acres of land into research plot areas by removing existing plantings, leveling land, fumigating soil, installing irrigation system, and by constructing access roads and fences as necessary	–	–	$65,000				
	Sierra Foothill Range Field Station—Construct main interior fences to divide station into range and pasture areas; improve irrigated pastures by installing irrigation system, and by land forming, preparation, and seeding	–	–	65,000				
	Lindcove Field Station—Develop approximately 30 acres of land into research plot areas by clearing existing plantings, land forming fields, installing irrigation and drainage systems, pumping plant, and by constructing access roads and fences as required	–	–	65,000				
	Lindcove Field Station—construct a machinery repair shop and storage building, cold storage facility and a three-bedroom dwelling	–	$65,000					
	Sierra Foothill Range Field Station—construct a warehouse building of approximately 3,950 square feet, install utilities and service to buildings, construct two miles of boundary fence and 2.5 miles of access roads	–	65,000					
	West Side Field Station—install 6,600 feet of 18-in.-diameter rubber gasket joint, plain concrete irrigation pipe mainline to improve an existing mortar joint pipeline	–	33,500					
	Hopland Field Station—construct a 1,200 square foot dormitory to provide housing, cooking and laundry facilities for transient students and staff conducting investigations	–	36,800					
	Imperial Valley Field Station—construct two 126-square-foot greenhouses, one screen house and a soil storage and mixing facility	–	27,700					
	Lindcove Field Station, step 2—construct lathhouse; install drainage system; remove existing hazardous plants; provide fencing and three wind machines	$38,000						
	Sierra Foothill Range Field Station—improve irrigated pasture and range areas	36,000						
	Alterations and improvement projects of $20,000 or less	–	18,000

Hastings College of Law

The classrooms and quarters of the college are in the Hastings College of Law Building on the northeast corner of Hyde and McAllister Streets in San Francisco. The college offers systematic and thorough instruction in those branches of law which will best prepare the student for the practice of law anywhere in the United States and other common law countries. The addition and alterations to the existing structure, completed in 1969, will permit the enrollment to increase to 1,200 students.

The California State College System consists of 19 campuses. Sites for three new campuses have been purchased by the trustees in Ventura, Contra Costa, and San Mateo Counties.

It is anticipated that in the 1970–71 fiscal year 166,057 full-time equivalent students (FTE), 8 a.m. to 5 p.m., will be enrolled in the system.

The primary function of the state colleges is the provision of instruction for undergraduate students and graduate students, through the master's degree, in the liberal arts and sciences, in applied fields and in professions, including the teaching profession. The doctoral degree is being offered jointly between San Diego State and the University of California at San Diego and U.C. at Berkeley, between San Francisco State College and the University of California at Berkeley, and between California State College at Los Angeles and the University of California at Los Angeles. Faculty research is authorized to the extent that it is consistent with the primary function of the state colleges and the facilities provided for that function. Permission has been granted to several other campuses to negotiate additional joint doctoral programs.

The Board of Trustees of the California State Colleges was created by Chapter 49, Statutes of 1960, 1st Extraordinary Session, and on July 1, 1961, took over the powers, duties and functions previously vested in the State Board of Education and the Director of Education relative to the administration of the state colleges. One of the major functions of this board of trustees and its administrative staff is the planning of the physical facilities necessary to accommodate the rapidly increasing number of students in an orderly manner. This 1970–71 Capital Outlay Budget is a continuing step in that plan.

ENROLLMENTS

The construction programs for the 19 existing state colleges are based on a projected enrollment of 195,140 annual full-time equivalent (FTE) students, 8 a.m. to 5 p.m. in 1972–73. This enrollment estimate is an increase of 14,751 over the students (FTE) anticipated in 1971–72. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

These enrollments have been estimated from statistics based on prior experience of the progression of students from high schools to the colleges and through the various collegiate levels. The state college data includes a compilation of the numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university age. The projection also assumes a continual increase in the percentage of population attending college in tax-supported institutions.

The construction of facilities at each college is related to the proportionate distribution (or "mix") of the enrollment by division level (lower, upper and graduate).

The enrollment figures used in projecting the five-year construction program reflect diversion of lower division students as proposed by the "Master Plan for Higher Education in California."

The table on the following page outlines 1968–69 actual past year enrollments and estimated enrollments of students in the state colleges from 1969–70 through 1976–77. Earned FTE (e.g., physical education, military science, and other) have been netted out in this table in order that valid comparisons might be made between projected capacities and enrollments. See Table V.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

[1] Nonstate funds as submitted by the Trustees of the California State Colleges.

[2] Begin year-round schedule prior to 1967.

[3] Project funding subject to state funds released from other projects receiving federal grants.

[4] $42,774,497 of this amount financed from Higher Education Construction Bond Act of 1966 and $1,663,886 from prior bond acts.

[5] $28,301,574 of this amount financed from Higher Education Construction Bond Act of 1966 and $6,299,791 from prior bond acts

[6] These amounts represent anticipated federal reimbursements and have been netted out of budget totals as well as the individual college totals.

Adjustments for the impact of new colleges have been made at those existing colleges which seem most likely to be affected by the proximity of the presently authorized new institutions. Where colleges are approaching their master planning limits, the projections are adjusted to reflect this limit. This affects the estimates for the state colleges located at Humboldt, Long Beach, San Diego, San Fernando Valley, San Francisco, San Jose and San Luis Obispo.

Full-time equivalents (FTE) 8 a.m. to 5 p.m. are used in determining the need for capacity in instructional facilities. Full-time equivalents are calculated by dividing by 15 the aggregate number of student credit hours earned in undergraduate courses from 8 a.m. to 5 p.m. for a given term, and by dividing by 8 for graduate courses. Office capacity is based on needs developed by the application of existing staffing criteria to the various enrollment bases.

Fall Year Operation

The 1970–71 Support Budget contains provision for the 1970 summer quarter. Fourth quarter operation will then terminate in 1971 at those four colleges currently offering summer quarter programs. The summer quarter programs at Los Angeles, Hayward, Pomona and San Luis Obispo will be replaced by self-supporting summer session programs and will be reflected in the 1971–72 budget.

The method of fourth quarter operation was originally conceived as a means of maximizing the use of the physical plant facilities thereby minimizing the need for additional capital construction. Benefits of year-round operation have not fully materialized. Additional studies are currently being made on the current utilization of facilities. The 1970–71 budget has been predicated on serving the greatest number of qualified students and as a result priority has been given to accommodating more students at all colleges during the academic year than at four colleges during a summer quarter.

CAPACITY

The basic unit used to determine existing FTE capacity is the student station. Stations are weighted depending upon whether they are in lecture rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements and weighted, based upon the type facility. In this manner, an FTE capacity is derived from the student station count.

Future space needs are determined by comparing existing FTE capacity with projected FTE enrollments. Needed FTE capacity is then translated into square foot requirements by means of calculations which consider utilization rates, and square foot allocations per station, as set forth by the Coordinating Council of Higher Education publication entitled, *Space & Utilization Standards, California Public Higher Education*, adopted September 27, 1966.

The target year in which computed capacity is considered is two years after the date of providing construction funds, therefore projects funded for construction in the 1970–71 budget will provide capacity for the 1972–73 year.

The total existing and funded capacity for 1971–72 is programmed at 151,844 (FTE) students, which is shown in Table II below. The 1969–70 capacity projects (7,273 FTE) have not been included in these totals. General Funds appropriated for a large portion of the 1969–70 Capital Outlay projects have been used as offsets for the 1966 bonds still unsold. A part of the bonds were not sold because of the interest rate limitations. The 1969–70 capacity projects have been delayed a minimum of one year.

Table II [7]

Summary of Capacity*—Existing and Funded FTE (8–5)—Available in 1971–72

College	*Lecture*	*Lab*	*Total*
Bakersfield	652	74	726

Totals	131,783	20,061	151,844

* Includes leased and temporary capacity.

In accordance with results of studies of campus master plans conducted by the trustees since their organization in 1961, the following interim master plan enrollments are set up for purposes of facilities planning. Table III shows the main campus acreage at each of the schools and the current master planning limit as established by the Trustees of the California State Colleges.

[2] Began year-round schedule prior to 1967.

[7] These figures furnished by Trustees and have not been verified by the Department of Finance. Any use or reference of these figures in this budget are the sole responsibility of the Trustees

CAPACITY—Continued

Kellogg-Voorhis Campus	447	20,000
San Luis Obispo Campus	374	12,000
Total	–	309,800

The Support Budget for the State Colleges is based on annual full-time equivalent students 8 a.m. to 10 p.m. while the Capital Outlay budget is based on annual FTE 8 a.m. to 5 p.m. For Capital Outlay, enrollments and capacities shown do not include earned FTE (e.g., physical education, military science, and other) and FTE enrollments for off-campus centers. The annual FTE 8 a.m. to 10 p.m. for the Support Budget, Academic Year, is 175,240 for 1969–70 and 192,920 for 1970–71.

In 1969–70 the Capital Outlay full-time equivalent students (FTE) 8 a.m. to 5 p.m. total 151,028. By 1976–77, capacity will be needed for 238,850 students (FTE), an increase of 87,822 students (FTE) or 58 percent. Projects either in existence or funded for construction will produce a capacity of 151,844 students in 1971–72. Those projects included in the 1970–71 Governor's Budget for construction together with the 1969–70 construction projects that have been delayed one year are scheduled to produce additional capacity of 8,061 (FTE), giving a statewide total capacity of 159,905 (FTE) in 1972–73. Table IV below provides the basis of comparison between projected enrollments and construction projects contained in this five-year building program.

It should be noted that the comparisons made in this table are on an 8 a.m. to 5 p.m. basis and do not reflect the additional FTE capacity available by increasing utilization of college facilities to an 8 a.m. to 10 p.m. basis.

Table IV

Comparison of Projected Annual Full-Time Equivalent Students Attending 8–5 O'Clock With Existing and Funded Capacities of State College Campuses and the Capacity That Will Be Provided by the Projects in the Five-Year Program

STATE COLLEGE	Budget year 1969–70 / Target year 1971–72	1970–71 / 1972–73		1971–72 / 1973–74		1972–73 / 1974–75		1973–74 / 1975–76		1974–75 / 1976–77

The following table shows the lecture classroom utilization factors for the state colleges for the fall of 1968. The individual campuses may be compared with respect to each of the three measures for the time period 8 a.m. to 5 p.m.

Table V

Utilization Factor—Fall 1968

State College	*Room utilization*	*Station occupancy*	*Station utilization*
Bakersfield	–	–	–
Chico	32.8	0.75	24.1
Dominguez Hills	–	–	–
Fresno	44.4	0.57	25.1
Fullerton	39.7	0.74	29.5
Hayward	29.6	0.74	21.3
Humboldt	33.2	0.67	21.8
Long Beach	36.1	0.82	29.2
Los Angeles	38.0	0.66	25.1
Sacramento	35.2	0.73	25.8
San Bernardino	29.0	0.55	16.3
San Diego	38.2	0.72	27.1
San Fernando	33.9	0.73	24.9
San Francisco	40.2	0.66	26.2
San Jose	33.2	0.74	24.7
Sonoma	29.6	0.70	20.7
Stanislaus	35.0	0.56	19.8
Kellogg-Voorhis	31.9	0.76	23.7
San Luis Obispo	35.2	0.79	27.5
All State Colleges	35.0	0.70	24.3
CCHE Standard	34.0	0.66	22.4

PROJECTS PROPOSED FOR FINANCING IN 1970–71

All critical capacity requirements of the State Colleges are being met to permit them to accept increased enrollments. Special efforts are made to maintain the planning and design activities which are essential to future growth. Through frugal allocation of resources on a priority basis, it has been possible to assure that the State Colleges will be able to fulfill their educational objectives.

Considerable attention has been and shall continue to be given to the utilization of state college classrooms. The increasing enrollments, along with the difficulty of selling bonds and the resulting slowdown in the construction program, requires that every reasonable effort be made to maximize the utilization of existing educational facilities. Studies made to date give every indication that increased utilization is possible.

The total 1970–71 Capital Outlay Program proposed for the State College System is $34,792,600. This total amount is to be financed from the Capital Outlay Fund for Public Higher Education for both minor and major Capital Outlay Programs.

Science and Engineering Facilities

The growth of the science and engineering programs necessitates a continuing expansion of the existing facilities. Included in this budget to meet the expanding enrollments are four projects (Bakersfield, Fresno, Fullerton and San Francisco) totaling $5,798,000 which is 16.7 percent of the new Capital Outlay Program.

Library

One library project (San Fernando Valley) in the amount of $6,882,000 is included in the new Capital Outlay Program. This amounts to 19.8 percent of the Capital Outlay Program.

Educational Facilities

Two education building projects (Fullerton and San Fernando Valley) are included in the amount of $8,096,000 which is 23.3 percent of the new Capital Outlay Program.

Equipment

A total of $4,967,100 is included in this budget for initial complements of equipment and equipment for buildings and facilities which are scheduled for completion in 1970–71 or prior years. The total cost of this equipment is 14.3 percent of the new Capital Outlay Program.

Master Planning

An amount of $252,500 is included to cover the costs of master planning studies relating to the various campuses which is 0.7 percent of the new Capital Outlay Program.

Site Development and Utilities

Ten projects total $5,291,000, or 15.2 percent, of the new Capital Outlay Program for site development and utilities including central plants.

Other

The balance of the major projects totals $1,506,000 and includes preliminary planning funds for 1971–72 projects and working drawing funds and construction funds for a conversion project (Stanislaus). These projects are 4.3 percent of the new Capital Outlay Program.

Minor Capital Outlay

The final portion of the Capital Outlay Program is a total of $2,000,000, or 5.7 percent, of the new Capital Outlay Program which is included in this budget for projects for minor Capital Outlay.

STATE COLLEGES—Continued

FIVE-YEAR CAPITAL OUTLAY PROGRAM

The five-year Capital Outlay Program for the state colleges totals $646,925,300 of which $508,413,600 is unfunded and $138,511,700 is from nonstate sources.

The rapid growth of the college population has resulted in the establishment of eight new state colleges since 1957. A major share of the five-year Capital Outlay Program will be needed to continue the development of the facilities at these colleges, which will be generally of the multiple-purpose type. Construction of specialized facilities at these new colleges, as well as many of the older colleges, depend largely upon the needs of the areas served by the college and the curriculum master plan now under consideration by the staff of the board of trustees.

Five-Year Program
(in thousands)

1970–71	*1971–72*	*1972–73*	*1973–74*	*1974–75*	*Total*
$78,510	$185,104	$189,514	$103,820	$89,978	$646,926
34,793	*157,399*	*164,880*	*84,671*	*66,671*	*508,414* [a]
43,717	*27,705*	*24,634*	*19,149*	*23,307*	*138,512* [b]

[a] Capital Outlay Fund for Public Higher Education and unfunded.
[b] Federal and other nonstate funds.

It should also be noted that the last four years of the five-year building program is the state colleges' current estimate of need and does not represent a program approved by the administration.

Federal Legislation

During 1963, the Federal Congress passed Public Law 88-204, Higher Education Facilities Act of 1963. The act authorizes federal funds to assist the various states in providing physical facilities to meet the needs of the nation's youth to aspire to a higher education. This act was subsequently modified by Title VII of the Higher Education Act of 1965 which increased in scope the type of academic facilities eligible for grants.

This legislation will have an impact on the 1970–71 budget year. Applications for federal grant funds for 10 projects at eight state colleges have been requested. Grant funds requested amount to $10,000,000. The amount of funds that will be available to support Title I (HEFA) this year is still unknown, inasmuch as the federal budget has not been resolved.

Trustees of the California State Colleges

The Board of Trustees of the California State Colleges was established by Chapter 49, Statutes of 1960, First Extraordinary Session. The board is charged with the responsibility of governing the State College System including the Capital Outlay Program. This budget includes $252,500 which will be appropriated to the trustees for master planning for all colleges, $244,000 in project planning funds to be used for schematic and preliminary plans for various colleges and projects, and $2,000,000 in minor projects funds for various colleges and projects.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
MAJOR PROJECTS [k]							
Project planning (all colleges)	–	–	$244,000 [P]	$200,000 [P]	$150,000 [P]	$125,000 [P]	$125,000 [P]
Project planning funds are requested for schematic and preliminary plans for certain projects scheduled for funding of both working drawings and construction in 1971–72. These projects are chiefly for site development, utilities and remodeling. Funding for schematic and preliminary plans for major building projects is included in the funding proposed for the specific projects.							
Master planning (all colleges)	–	–	252,500	680,000	675,000	675,000	705,000
Master planning funds are requested for continuing architectural, landscape architectural and engineering master planning and consulting services. An average of $12,500 for master planning for each of the 19 operating colleges is proposed and $5,000 for continued minor planning for each of the three new state college sites.

California State College, Bakersfield

The Trustees of the California State College and the Coordinating Council for Higher Education advised the Legislature in 1965 of the need for the establishment of a California State College in Kern County.

The Legislature during that session authorized the establishment of a California State College in Kern County and appropriated funds to be used for site selection studies for this college. The site was acquired in June 1967. The college plans to open September 1970, in facilities on its permanent campus. The college name has since been changed to California State College, Bakersfield.

This budget provides equipment for previously funded projects working drawing funds for central plant II, classroom office building I, and construction funds for science building I.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Initial buildings	$26,247 [c] 69,439 [w a]	$2,506,539 [c] 181,500 [e] 561 [w a]	$463,000 [e]				
Funds for equipment are requested for 1970–71. This is the second of three phases of equipment for this project. The initial buildings are scheduled for completion in August 1970.							
Central plant II	–	–	21,000 [p w]	$451,000 [c]	$10,000 [e]		
Funds for working drawings are requested for 1970–71. This project will be the second component in a continuing program for expansion of Phase I of the central plant constructed with the initial buildings. It will add an additional 700-ton water chiller, a 200-HP boiler and distribution piping. This equipment will be housed in a portion of the existing corporation yard structure and an addition to that structure of 2,500 square feet. The project is scheduled for completion in August of 1972.							
Science building I	–	87,000 [w] (23,000) [3]	1,878,000 [c] –	100,000 [e]	143,000 [e]	$60,000 [e]	
Funds for construction are requested for 1970–71. This project will provide the first permanent laboratory science facilities for the campus. It consists of laboratories in the life and physical sciences, a nursing laboratory, three classrooms, 26 faculty offices, and auxiliary spaces yielding a capacity of 355 FTE. The building has a gross area of approximately 38,000 square feet and is scheduled for completion in September 1972.							
Classroom-office building I	–	–	100,000 [p w]	1,830,000 [c]	100,000 [e]	139,000 [e]	
Funds for preliminaries and working drawings are requested for 1970–71. This building will be the first element in the development of the universal space structure for the central core area of the campus. The structure consists of 19 general purpose lecture rooms, and several specialized facilities (i.e., two language labs, one art studio, two psychology labs, one anthropology lab, one accounting lab, and storage and support areas). The building will also have administrative areas for two deans and two division chairmen, 96 faculty offices, two conference rooms, and clerical and auxiliary spaces. The project yields 1,050 FTE, with a gross of 51,700 sq. ft. proposed for completion in July of 1973.							
Utilities and site development—1971	–	–	–	575,000 [w c]			
Corporation yard	–	–	–	200,000 [w c]	14,000 [e]		
Initial physical education facilities	–	–	–	837,000 [w c]	44,000 [e]		
Initial library addition	–	–	–	42,000 [p w]	605,000 [c]	110,000 [e]	
Outdoor physical education facilities	–	–	–	328,000 [w c]	13,000 [e]		
Utilities and site development—1972	–	–	–	–	300,000 [w c]		
Classroom—office building II	–	–	–	–	40,000 [p w]	657,000 [c]	$27,000 [e]
Science building II	–	–	–	–	177,000 [p w]	3,072,000 [c]	100,000 [e]
Remodel initial buildings	–	–	–	–	74,000 [w c] 50,000 [e]		
Gymnasium	–	–	–	–	163,000 [p w]	2,600,000 [c]	
Cafeteria	–	–	–	–	–	83,000 [p w]	1,337,000 [c]
Outdoor physical education facilities II	–	–	–	–	–	17,000 [p w]	20,000 [c] 144,000 [p w]

Chico State College

Chico State College, established in 1877, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The college is located on a site totaling 116 acres in the City of Chico, with an additional 645 acres in the college farm. The ultimate enrollment for this campus has been set at 12,000 FTE.

This budget provides construction funds for the central chiller plant.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Central chiller plant	–	$55,000 [W]	$1,110,000 [C]				
Funds for construction are requested for 1970–71. This facility, to be built to function with the boiler plant as one unit, will provide chilled water for all funded and future projects including buildings to be remodeled for air conditioning. It is scheduled for completion in September 1971.							
Library building	–	206,000 [W a]	–	$7,300,000 [C]	–	$500,000 [E]	$500,000 [E]

California State College, Dominguez Hills

The State College, Dominguez Hills, was established as South Bay State College by Chapter 65, Statutes of 1960, First Extraordinary Session. The name was redesignated to California State College at Palos Verdes by the Trustees of the California State Colleges on July 12, 1963, and again redesignated in August 1966. A site in the Dominguez area of southwest Los Angeles was selected by the Trustees of the California State Colleges and acquired by the state.

The initial buildings were opened in the fall of 1968. The college is also operating in rented quarters across the street from the site where the college will be built, until major building projects of the necessary capacity are built and opened. Because of the projected rapid growth in enrollment and since it is a new institution, the college has been asked to investigate a program that will utilize the college fa-

cilities on a year-round basis. To assist in meeting that objective the instructional program has been developed on a quarter system basis.

The instructional program is being developed within the guidelines of the master curricular plan established by the Board of Trustees. The initial undergraduate program, within the framework of the liberal arts and sciences, will include a basic studies program in the lower division and nine majors in the upper division, distributed among the general areas of science and mathematics, humanities and art and the social and behavioral sciences. These three general areas are the nucleus round which the entire instructional program will be developed and interrelated to all disciplines.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Fresno State College

Fresno State College is a five-year institution offering programs in agriculture and general education, and credential programs in elementary and secondary education. The college is located on a site of 1,433 acres northeast of the city of Fresno. The main campus totals 243 acres on which is master planned an ultimate enrollment of 20,000 students (FTE). The balance of 1,190 acres is devoted to agricultural use.

This budget provides funds for equipment for art building and construction funds for the industrial arts building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75

California State College at Fullerton

The State College at Fullerton is located on a site of 235 acres in the City of Fullerton with a master planned ultimate enrollment of 20,000 FTE to be contained within the existing site. Funds for construction of the first permanent building were appropriated in 1961. This facility, a 6-story science building, was completed in the fall of 1963, and housed all the programs of the college.

A music-speech-drama building, funded in 1962, was occupied in August 1965. The gymnasium was occupied in September 1965. The library and audio-visual building, funded in 1963, was occupied in September 1966. Conversion phases I, II, and III of the science building classrooms to laboratories and various site development project phases have also been completed.

The cafeteria, funded in 1965, was occupied in August 1967. The humanities social science building, funded in 1966, was occupied in July 1969. The outdoor physical education facility, phase III, funded in 1966, was completed in November 1967. The art building, funded in 1967, was completed in December 1969.

This budget provides for the final phase of equipment for the adminitration-business administration building; art building; first and only phase of equipment in the library third floor conversion; and the fourth of six phases of equipment for the engineering building, and the final phase of construction funds for utilities—1969, construction funds conversion of science building—phase IV, and the education classroom building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]							
Convert library third floor	–	$165,000 [c]	$124,000 [E]				
Funds for equipment are requested for 1970–71. This request will provide equipment for the initial and only phase in the library third floor conversion. This building will be occupied by September 1970.							
Administration—business administration building	–	–	282,000 [E]				
Funds for equipment are requested for 1970–71. This request will provide equipment for the initial and only phase in the administration-business administration building. This building will be occupied by January 1971.							
Art building	$296,953 [c F]	436,796 [c F]	95,200 [E]				
Funds for equipment are requested for 1970–71. This request will provide equipment for the final phase of two phases in the art building. This building was occupied by December 1969.	–285,083 [c a]	–166,163 [c a] 210,300 [E]	–				
Engineering building	–	–	116,400 [E]	$200,000 [E]	$175,000 [E]		
Funds for equipment are requested for 1970–71. This request will provide equipment for the fourth phase of six phases in the engineering building. The engineering department is temporarily occupying space in the letters and science building. The engineering building will be occupied by September 1971.							
Utilities—1969	–	–	502,000 [W c]				
Funds for the balance of the construction are requested for 1970–71. This project will provide utilities and utility tunnel to the Engineering Buildings. The Engineering Building is scheduled for occupancy in September 1971.							
Convert Science Building IV	–	39,500 [W]	790,000 [c]	355,000 [E]			
Funds for working drawings and construction are requested for 1970–71. This is to convert temporary administrative space into 10 lecture rooms, 1 seminar and 12 laboratories with 691 FTE. The project is scheduled for occupancy in September, 1971.							
Education—Classroom building	103,842 [W]	25,158 [W]	3,636,000 [c]	–	277,000 [E]		
Funds for construction are requested for 1970–71. The proposed building will have a total instructional capacity of 1,747 FTE which consists of 36 lecture rooms and 16 laboratories. This building will serve the School of Education and the English Department. The building will have approximately 93,000 square feet. The project is scheduled for occupancy in September, 1972.							
Humanities-Social sciences building addition	–	–	–	245,000 [P W]	4,655,000 [c]	–	$435,000 [E]
Art building addition	–	–	–	90,000 [P W]	1,637,000 [c]	–	187,000 [E]
Convert library—second floor	–	–	–	15,000 [P W]	221,000 [c]	$210,000 [E]	
Outdoor physical education facilities IV	–	–	–	7,000 [P W]	99,000 [c]	4,000 [E]	
Warehouse building	–	–	–	10,000 [P W]	165,000 [c]	6,000 [E]	
Site development and utilities—1971	–	–	–	316,000 [W c]			
Convert science classroom building to Laboratories V	–	–	–	25,000 [P W]	255,000 [c]	155,000 [E]	
Library building addition	–	–	–	222,000 [P W]	3,634,000 [c]	–	692,000 [E]
Boiler plant addition IV	–	–	–	–	53,000 [P W]	810,000 [c]	
Music-Speech-Drama Building—Phase II	–	–	–	–	128,000 [P W]	2,340,000 [c]	
Women's physical education building	–	–	–	–	103,000 [P W]	1,563,000 [c]	
Convert Science building classroom to Laboratories VI	–	–	–	–	–	33,000 [P W]	328,000 [c]
Administration-business administration addition	–	–	–	–	–	41,000 [P W]	741,000 [c]
Engineering addition	–	–	–	–	–	79,000 [P W]	1,455,000 [c]
Humanities-social sciences addition II	–	–	–	–	–	–	82,000 [P W]
Parking	321,405 [c 1]	677,013 [c 1]	338,000 [c 1]	240,000 [c 1]	244,000 [c 1]	244,000 [c 1]	250,000 [c 1]
Health center	–	–	1,581,000 [c 1]				
Library audio-visual building—Phase II	17,810 [E a]						
Science Building—Phase II	31,942 [E a]						
Music-Speech-Drama Building—Phase II	–2,288 [E a]						
Conversion of Science Building, C.R.—Phase III	–12,800 [c a]

State College at Hayward

The State College at Hayward was established by Chapter 1681, Statutes of 1957, as the State College for Alameda County. On July 12, 1963, the Trustees authorized the change in name of State College at Hayward. This college offers courses in occupational and professional curricula, and liberal arts leading to a bachelor's degree in various fields, and also offers an elementary and secondary education credential program. This college occupied its permanent 173 usable acre site in the fall of 1963. Current plans call for campus development on the existing acreage to accommodate an ultimate enrollment of 15,000 students (FTE).

This budget includes funds for the seventh of eight phases of science equipment; working drawings and construction for utilities—1970; and preliminary plans and working drawings for conversion of the science building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
14	**MAJOR PROJECTS** [k]							
16	Science building	$148,892 [E] –579 [E a]	$100,000 [E]	$85,000 [E]	–	$100,000 [E]		
18–21	Funds for equipment are requested for 1970–71. This request will provide equipment for the seventh phase of eight phases in the science building. This building was occupied in September, 1963.							
23	Utilities—1970	–	–	200,000 [W C]				
24–28	Funds for working drawings and construction are requested for 1970–71, to repair the East Creek storm sewer in order to prevent further damage and resultant costs. It will enable the state to turn over the maintenance of said structure to the Alameda County Flood Control.							
30	Convert science building	5,922 [W a]	762,502 [C F]	15,000 [P W]	$100,000 [E] 135,000 [C]			
31–38	Funds for working drawings are requested for 1970–71. The proposed building will have a total instructional capacity of 260 FTE which consists of 200 lecture FTE and 8 laboratories with 60 FTE and also provides 50 faculty stations. This building will serve the division of science by converting space to its permanent master planned use. The project is scheduled for occupancy in September, 1972.

Humboldt State College

Humboldt State College is a five-year insitution offering both graduate and undergraduate programs in liberal arts, teacher education and vocational training curricula. The latter, includes curriculums in forestry management, fisheries, game management and oceanography. The college is located on a site approximately of 124 acres in the City of Arcata. The college's marine laboratory is located on an additional 1.9 acres in the city of Trinidad 15 miles north of the main campus. The college is master planned for an ultimate enrollment of 5,000 students (FTE).

This budget provides equipment for the biological science addition, and working drawings and construction for utilities—1970.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Biological science addition	$1,361,963 C a	$918,060 C F	$489,000 E				
Funds for equipment are requested in 1970–71. This is the final phase of two phases of equipment for this project. The building is scheduled for completion in September 1970.	93,513 E	41,714 C a					
Utilities—1970	–	–	114,000 W C				
Funds for working drawings and construction are requested in 1970–71. This project provides sewage and electrical/communications duct system to funded projects. This project is scheduled for completion in June 1971.

State College at Long Beach

The State College at Long Beach was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953, was authorized to offer lower division courses. It is now a 5-year multipurpose college offering instruction for undergraduate students and graduate students, through the master's degrees, in the liberal arts and sciences in applied fields and in the professions, including the teaching profession. The college helps serve the educational needs of the metropolitan areas of southern California.

In 1951 the college was permanently located on a 320-acre site donated by the City of Long Beach which is adequate to support the ultimate master plan enrollment of 20,000 (FTE).

This budget provides equipment for previously funded projects, and working drawings and construction for utilities—1970.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]							
Library building II	$282,475 [c F]	$1,493,300 [c F]	$210,000 [E]				
Funds for equipment are requested for 1970–71. This is the second of two phases of equipment for this project. The building is scheduled for completion in November 1970.	4,359,114 [c a]	–1,001,517 [c a] 400,000 [E]					
Psychology building	109,760 [c F]	705,445 [c F]	100,000 [E]				
Funds for equipment are requested for 1970–71. This is the second of two phases of equipment for this project. The building is scheduled for completion in May 1970.	2,601,148 [c a]	–570,053 [c a] 300,000 [E]					
Engineering building II	1,981,325 [c a]	1,013,776 [c F]	534,800 [E]	$375,000 [E]

State College at Los Angeles

The State College at Los Angeles, established in 1947, offers courses in business, education, fine arts, applied arts, music, social sciences, physical education, natural sciences, engineering and special education.

The college moved to its present 116-acre site in 1956 to accommodate the increase in student enrollments.

The campus is master-planned for an enrollment of 16,800 students (FTE) with an anticipated incremental purchase of 12 additional acres of land to support this figure.

To accommodate the projected growth in enrollment, this budget includes equipment funds for classroom building No. 2 and administration addition.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

Sacramento State College

Sacramento State College, established in 1947, offers courses in liberal arts, general education, and occupational curriculums leading to the bachelor of arts degree, the master of arts degree, or preparation for the professions through graduate work, and an elementary and secondary education credential program. Bachelor's degrees are offered in business, engineering, government services, laboratory technology, nursing, social service and teacher education. Master degrees are offered in business administration, public administration, applied life science, social work, engineering, applied mathematics, education, and psychology. The college offers preprofessional curriculum preparatory to postgraduate study in law, medicine, dentistry and others.

The college, currently master planned for an ultimate enrollment of 20,000 FTE students, moved to its present 288-acre site in 1953.

This budget provides for the initial and only phase of equipment for the teacher education building, working drawing funds for the utilities 1970, and the preliminary and working drawing funds for the business classroom building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]							
Teacher education building	$2,014,552 [W C a]	$653,536 [C F] –519,459 [C a]	$196,800 [E]				
Funds for equipment are requested for 1970–71. This is the complete complement of equipment needed for this project. This project is scheduled for completion in September 1970.							
Utilities—1970	–	–	45,000 [W]	$793,000 [C]			
Funds for working drawings and construction are requested for 1970–71. This project will provide utilities including tunnel extension to the library building, scheduled for occupancy in September 1972, and the extension of the campus drainage system. This project is scheduled for completion in May 1972.							
Business classroom building	–	–	210,000 [P W]	3,977,000 [C]	$230,000 [E]	$308,000 [E]	
Funds for preliminary plans and working drawings are requested for 1970–71. The proposed building will have a total instructional capacity of 2,186 FTE which consists of 29 lecture rooms and three laboratories. This project							

serve the School of Business Administration. The building will have approximately 109,000 square feet. The project is scheduled for occupancy in September 1973.

San Bernardino State College

California State College at San Bernardino was authorized by Chapter 64, Statutes of 1960, First Extraordinary Session. It is scheduled to be a fully accredited 5-year state college with its programs designed to meet the needs of the service area consisting primarily of San Bernardino and Riverside Counties.

The college opened in the fall of 1965, in its initial complement of facilities, on the permanent site of 429 acres. The permanent campus will be large enough to accommodate the ultimate enrollment of 20,000 students (FTE) planned for this campus.

This budget includes funds for equipping the library.

The last four years of the five-year building program are the agency's current timate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Library Classroom Building	$178,523 [C F] 4,110,620 [C a]	$1,242,834 [C F] –869,660 [C a] 368,900 [E]	$246,900 [E]		
Funds for equipment are requested for 1970–71. This request will provide equipment for the final phase of three phases in the library classroom building. This building will be occupied by July 1970.					
Convert initial building	–	9,100 [W]	–	$30,000 [E]	
Cafeteria	5,700 [W a]	200 [W] (1,245,100 [C]) [3]	–	200,000 [C] 1,380,000 [C]	$150,000 [E]
Convert physical science building	–	–	–	78,000 [W C]	125,000 [E]

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

[1] Nonstate funds as submitted by the Trustees of the California State Colleges.

[3] Project funding subject to state funds released from other projects receiving federal grants.

San Diego State College

San Diego State College is located on a 268-acre site that will become the population center of metropolitan San Diego. The college offers 54 approved undergraduate majors, 33 master degree curriculums, and one joint doctorate. Enrollments have increased in all academic areas.

A master plan figure of 20,000 FTE has been set. This campus and future incremental purchase of approximately 15 additional acres is anticipated by the trustees to allow development to meet this figure.

This budget provides equipment for the second of two phases in the library classroom building, and construction funds for the central chilling plant I and utilities—1969.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Library classroom building	$510,879 [c F]	$2,012,976 [c F]	$427,500 [E]				
Funds for equipment are requested for 1970–71. This request will provide equipment for the second phase of two phases in the library classroom building. This building will be occupied by September 1970.	–570,000 [c a] 99,701 [E]	1,394,700 [c a] 300,000 [E]					
Central chilling plant and utilities 1969	–	103,000 [W] (27,000 [W]) [3]	2,659,000 [c]				
Funds for construction are requested for 1970–71. The utility study recommends a central chiller plant for the campus. This project will provide chilled water and the utility distribution system for the library and art buildings. In addition, all future air conditioning projects in existing buildings will be serviced by this facility. The building is scheduled for completion in September 1971.

San Fernando Valley State College

San Fernando Valley State College became a separate state college July 1, 1958, by authority of Chapter 2265, Statutes of 1957. This college offers degrees at both the bachelor and master levels in business, liberal arts, science and engineering, and also offers a credential program in education. The campus, located in Northridge, comprises approximately 344 acres, and will accommodate the ultimate enrollment of 20,000 FTE.

This budget provides construction funds for the library building and education building and preliminary and working drawing funds business and economics building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Library building (54A)	$5,520 [W a]	$2,480 [W a]	$6,882,000 [C]	$300,000 [E]	$300,000 [E]	$300,000 [E]
Funds for construction are requested for 1970–71. This project will provide a permanent library for the college designed for an enrollment of 10,320 FTE to be reached in 1973. The space vacated in the present library will be converted into college administration space, instructional space and faculty offices to meet the needs of the college. Also this project will provide for facilities for the honor study and library science program with a total of 120 FTE. This building will have a gross area of approximately 210,400 square feet. The project provides 2,580 reader stations and stack capacity for 493,320 volumes. This project is scheduled for occupancy in September 1972.						
Education building	–	138,000 [W]	4,460,000 [C]	150,000 [E]	150,000 [E]	
Funds for construction are requested for 1970–71. This project will provide the permanent instructional facilities for the School of Education. Interim space for home economics and speech will be provided, also. The building will have a total capacity of 1,952 FTE, which consists of 36 lecture rooms and 14 laboratories. Also included are 183 faculty office stations. The building will have a gross area of approximately 123,850 square feet. The building is scheduled for occupancy in September 1972.						
Business and economics building	–	–	196,000 [P W]	3,682,000 [C]	450,000 [E]	
Funds for preliminary plans and working drawings are requested for 1970–71. The proposed building will have a total instructional capacity of 2,930 FTE which consists of 47 lecture rooms and three laboratories. This project also provides 183 faculty stations. This building will serve the School of Business and Economics. The building will have approximately 102,300 square feet. The project is scheduled for occupancy in September 1973.						
Health science building	–	–	–	80,000 [P W]	1,179,000 [C]	210,000 [E]
Physical education and classroom addition	–	–	–	140,000 [P W]	2,345,000 [C]	140,000 [E]
Utilities—1971	–	–	–	130,000 [W C]		
Social science building	–	–	–	145,000 [P W]	2,100,000 [C]	170,000 [E]

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

STATE COLLEGES—Continued

San Francisco State College

San Francisco State College, established in 1899, is a multipurpose coeducational institution which offers a full range of degree and credential programs at the baccalaureate and master's degree level.

The college moved to the present 93-acre site near Lake Merced in 1954 in order to be better able to meet the demands placed upon it by continually increasing student enrollments. The current master-planned ultimate enrollment figure is 16,000 FTE.

This budget includes equipment funds for the library addition, and construction funds for the life science building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
	MAJOR PROJECTS [k]							
	Library addition	$2,334,550 [C a]	$1,000,000 [C F] 20,000 [C a]	$400,000 [E]	$225,000 [E]			
	Funds for equipment are requested for 1970–71. This request will provide equipment for the first phase of two phases in the library addition. This building will be occupied by November 1970.							
	Life science building	–204,700 [C a]	1,000,000 [C F] 33,385 [C a]	780,000 [C]	500,000 [E]	$500,000 [E]	$500,000 [E]	$750,000 [E]
	Funds to complete construction are requested for 1970–71. This request augments the basic project appropriations to furnish built-in laboratory case work and environmental chambers which were deferred from the original project prior to the second bid solicitation for this building. The building is scheduled for completion in September 1971.							
	Physical science building	50,000 [C]	2,346,000 [C F] 3,538,500 [C] (3,493,500 [C]) [3]	– –	750,000 [E]	500,000 [E]	500,000 [E]	300,000 [E]

San Jose State College

San Jose State College was established in 1857. It is a five-year accredited college which provides both undergraduate and graduate instruction in the liberal arts and sciences, applied fields, and in the professions. The college is located on a 146-acre site in the City of San Jose and is master-planned for an ultimate enrollment of 17,000 students (FTE). This budget includes funds for equipment of the business classroom building and corporation yard. Working drawings and construction funds for utilities—1970; and to remodel administration building for home economics.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

	MAJOR PROJECTS [k]							
	Business classroom building	$3,076,545 [C a]	$1,000,000 [C F]	$150,000 [E]				

Funds for equipment are requested for 1970–71. This request will provide equipment for the only phase in the business classroom building. This building will be occupied by July 1971.							
Corporation yard	2,765 E a	–	65,000 E				
Funds for equipment are requested for 1970–71. This request will provide equipment for the second phase of two phases in the corporation yard. This building will be occupied by February 1970.							
Utilities—1970	–	–	80,000 W C				
Funds for working drawings and construction are requested for 1970–71. This project will provide a new on-campus waterwell at the central plant to replace the existing well in the center of the campus which is to be abandoned when the central library project starts. It is scheduled for completion in August 1971.							
Remodel administration building for home economics	–	–	44,000 W	$678,000 C	$80,000 E		
Funds for working drawings and construction are requested for 1970–71. The proposed building will have a total instructional capacity of 275 FTE which consists of four lecture rooms, and 10 laboratories. This project also provides 24 faculty stations. This building will serve the home economic department. The building will have approximately 20,000 square feet. This project is scheduled for occupancy in May 1972.

Sonoma State College

Sonoma State College is a fully accredited 5-year institution with programs in the liberal arts, and sciences and in the professional fields of teacher education and enterprise management. Its primary service area is Marin, Napa, Sonoma, and the southern parts of Lake, Mendocino, and Solano Counties.

Sonoma State College was established by Chapter 66, Statutes of 1960, First Extraordinary Session of the California Legislature. It opened its doors in September of 1961 in rented quarters in what is now the city of Rohnert Park. The college moved from these steadily-expanding rented quarters to the permanent campus two miles east of Rohnert Park in August of 1966.

This budget includes equipment funds for the science building; working drawings and construction of utilities 1970; preliminary plans and working drawings for classroom building No. 2 and physical science-mathematics building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

STATE COLLEGES—Continued

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
	Sonoma State College—Continued							
	MAJOR PROJECTS [k]							
	Science building I	$60,941 [E a]	–	$134,000 [E]				
	Funds for equipment are requested for 1970–71. This request will provide equipment for the final phase of the science building. This building was occupied in February 1967.							
	Utilities—1970	–	–	210,000 [W C]				
	Funds for working drawings and construction are requested for 1970–71. This project will provide a flood control system to meet county flood control requirements.							
	Classroom-office building 2	–	–	120,000 [P W]	$1,600,000 [C]	$150,000 [E]		
	Funds for working drawings are requested for 1970–71. The proposed building will be type V, initial complement cost, shorter construction time facility. It will have a total instructional capacity of 750 FTE which consists of 17 lecture rooms, and four laboratories. This project also provides 100 faculty stations. This building will serve campus-wide lecture needs. The building will have approximately 50,000 square feet. The project is scheduled for occupancy in September 1972.							
	Physical science-mathematics building	–	–	300,000 [P W]	6,000,000 [C]	300,000 [E]	$500,000 [E]	$500,000 [E]
	Funds for preliminary plans and working drawings are requested for 1970–71. The proposed building will have a total instructional capacity of 1,381 FTE which consists of 1,145 lecture FTE space and 355 laboratory FTE. This project also provides 140 faculty stations. This building will serve the chemistry, geology, math, physics and astronomy departments. The building will have approximately 150,000 square feet. The project is scheduled for occupancy in September 1973.

Stanislaus State College

Stanislaus State College is an accredited institution with programs in the liberal arts and sciences and in the professional fields of teacher education and business administration. Its primary service area is Calaveras, Mariposa, Merced, San Joaquin, Stanislaus, and Tuolumne Counties.

Stanislaus State College was established by Chapter 1681, Statutes of 1957, and opened its first classes in rented facilities on the Stanislaus County Fairgrounds on September 10, 1960. It began full operations on the permanent campus in July 1965. This campus is master planned for 12,000 (FTE) without any anticipated increase in the existing 220-acre site.

This budget includes equipment funds for the performing arts complex and working drawing and construction funds for convert classroom building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Performing arts complex	$2,229,521 [W C a]	$778,806 [C F] –660,401 [C a]	$264,000 [E]				
Funds for equipment are requested for 1970–71. This request will provide equipment for the initial and only phase in the performing arts complex. This complex is scheduled to be occupied in September 1970.							
Convert classroom building	–	–	127,000 [W C]	–	$12,000 [E]		
Funds for working drawings and construction are requested for 1970–71. The project will convert space vacated by the performing arts disciplines into classroom and laboratory space for the psychology department and speech correction program. The project will also include space converted to serve general administrative and audio-visual functions. This conversion contains a gross area of approximately 19,400 square feet. The project is scheduled for occupancy in January 1971.							
Physical education facility—pool	–	–	–	$210,000 [W C]	10,000 [E]		
Cafeteria	–	–	–	52,000 [P W]	836,000 [C]	$42,000 [E]

California State Polytechnic College—Kellogg-Voorhis

California State Polytechnic College, Kellogg-Voorhis, provides accredited educational programs at the college level in agriculture, arts, business, engineering, science and the preparation of elementary and secondary teachers.

The Kellogg campus originally founded by W. K. Kellogg as an Arabian horse ranch in 1925, was given to the State of California in 1949 for use by California State Polytechnic College. Academic instruction began on the 816-acre campus in 1956. A master plan to accommodate 20,000 full-time equivalent students has been approved. To accommodate the projected growth in enrollment, this budget includes equipment for the agricultural classroom addition.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

Agriculture classroom addition	$4,795 [W a]	$112,300 [E]	$102,000 [E]				
Funds for equipment are requested for 1970–71. This is the second and final phase of the agriculture classroom addition. The project is scheduled for completion in June 1970.	1,706,160 [C]	115,340 [C]

California State Polytechnic College—San Luis Obispo

California State Polytechnic College provides accredited educational programs with emphasis on the applied fields of agriculture, engineering, business, and home economics, together with the closely related supporting fields of physical sciences, natural sciences and mathematics. A program of required general education courses and a strong cocurricular program combine with the college's occupationally centered instruction to prepare graduates for citizenship, leadership and constructive community living.

The college is located just outside San Luis Obispo at the foot of the Santa Lucia mountain range, 12 miles from the Pacific Ocean, on a campus which has been gradually augmented to its present 5,171 acres of which 374 acres compose the main campus and the balance is agricultural land.

This budget includes equipment funds for remodeling science building I and preliminary plans and working drawings for life science building.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [k]

STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
Remodel science building I	–	$160,000 [w c]	$90,000 [e]	$90,000 [e]			
Funds for equipment are requested in 1970–71. This is the first of two phases of equipment. The remodeling is scheduled for completion in September 1970.							
Life science building	–	–	150,000 [p w]	2,576,000 [c]	–	$300,000 [e]	$200,000 [e]
Funds for preliminary plans and working drawings are requested in 1970–71. This project will provide additional laboratory facilities for the life sciences and will contain lecture classrooms and laboratories for 528 FTE, 35 faculty office stations and necessary auxiliary spaces. The building will have a gross area of approximately 52,175 square feet and is scheduled for completion in July 1973.

MARITIME ACADEMY

The Maritime Academy is located in Vallejo near the north end of the Carquinez Bridge and will have an average enrollment of 250 students in 1970–71. The campus occupies 67 acres, and permanent facilities consists of two classroom buildings, engineering building, library, administration buildings, seamanship building, messhall, residence hall, and a gymnasium with pool.

The construction program for 1970–71 consists of one major project; equipment for the library. Also included are two minor projects totaling $47,400 to correct deficiencies and improve the physical plant. They are: (1) Replace deck and catwalk of wharf and install fire stops, $40,000; and (2) Repair earthquake damage to Faculty Road, $7,400.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the Administration.

GENERAL ANALYSIS

California now has 92 community colleges administered by 68 separate local governing districts offering local educational services in 1969 to over 700,000 students. In addition to offering a full range of lower division courses equivalent to those provided in the state's four-year colleges, each community college attempts to satisfy the continuing and rapidly changing educational needs particular to each community, by offering vocational technical programs, and a continuing adult education and community enrichment program.

Rapidly rising enrollments, created by an increasing emphasis placed upon continuing education beyond the secondary level, placed a serious financial burden upon the community college districts as they endeavored to provide physical facilities to house these students. The Legislature, therefore, recognizing that the community colleges would need capital outlay assistance, established, in the 1961–62 budget year, a temporary program—the Junior College Tax Relief Act, and appropriated five million dollars to fund it. The following year, an additional five million dollars was appropriated. This program provided grants to local districts to be used:

(a) For payment of interest and redemption of outstanding bonds issued for junior college purposes or for loans from the county school service fund for capital outlay purposes;

(b) For purchase or improvement of junior college sites, or the planning or construction of junior college buildings on a matching basis, not to exceed one part state funds for four parts district funds.

In addition, the Legislature in 1962, adopted a bond issue proposal for 270 million dollars to be used for higher education capital construction purposes. The bond issue, which included 20 million dollars for junior college capital outlay assistance, was approved in November, 1962. The 1963 Legislature appropriated the 20 million dollars and provided for its distribution through the Junior College Facility Construction Law of 1963 (SB 1515, Chapter 1790, Statutes of 1963) on a formula basis providing for state and local participation in the construction of necessary educational facilities, matching one state dollar for district funds of three dollars or less, depending upon the formula.

The Junior College Facility Construction Law further provided for a joint study to develop a continuing program of state financial assistance for the construction of junior college facilities based on ability, effort and need. The study committee was composed of representatives of junior colleges, the Department of Education, the Legislative Analyst, the Coordinating Council for Higher Education and the Department of Finance. While the committee was preparing the report, the Legislature approved another bond issue proposal, which the voters adopted in November 1964. This 380-million-dollar bond construction act earmarked 50 million dollars for the junior colleges.

The Legislature then enacted the Junior College Construction Act of 1965 (SB 318), which provided for a construction assistance program in which state and local college districts share in the cost of educational facilities on the basis of one state dollar for each local dollar on a statewide average. District dollar entitlements were computed on growth in estimated weekly student contact hours and relative district ability based on assessed valuation per weekly contact hour.

During the 1966 Budget Session, SB 4 was passed, which revised the basic act by liberalizing district requirements for participation and redefining the use of federal funds in the determination of state entitlements, but limited its application to those entitlements approved prior ot June 30, 1967.

In order to give the same liberalization on federal funds to the 1967–68 and 1968–69 appropriations, SB 623 was passed in 1968.

Recognizing the difficulty in developing a junior college capital outlay program which met the needs of all parties involved, Senate Concurrent Resolution 14 was adopted by the Legislature, directing the Coordinating Council for Higher Education to study the existing program of state assistance for junior college construction, and to prepare statutory proposals based upon the recommendations of this study. Special consideration was to be given to the inadequacies of Senate Bill 318. In response to the recommendations contained in this study titled, "Financing California's Public Junior Colleges," published in June, 1967, the Legislature enacted SB 691, the Junior College Construction Act of 1967, which superseded the provisions of SB 318, when the act became effective for the 1969–70 fiscal year. The 1967 Legislature, recognizing a continuing need for state support of the community colleges capital outlay programs, also enacted the Junior College Construction Bond Act of 1968 which was approved by the electorate and provided 65 million dollars solely for community college capital outlay projects.

In August 1967, the Governor signed into law SB 669, which established a Board of Governors of the California Community Colleges to be composed of 15 members. The board, commencing on July 1, 1968, succeeded to the duties, powers, purposes, responsibilities and jurisdiction heretofore vested in the State Board of Education, the Department of Education, and the Superintendent of Public Instruction with respect to the management, administration, and control of the junior colleges. In addition, SB 669 directed the Coordinating Council for Higher Education to undertake a study of all the duties, powers, responsibilities and jurisdiction in the management, administration, and control of the junior colleges and to report to the Governor and to the Legislature on or before December 1, 1968, on the appropriate functions which should be performed (a) by local school boards maintaining junior colleges, and (b) by the Board of Governors of the California Community Colleges.

In the past year, the Legislature budgeted capital outlay funds for 34 districts and in the current year 42 districts received capital outlay appropriations. Included in the 1970–71 Budget are 35 districts with a proposed total capital outlay program of $38,034,076. Of this amount, a state appropriation of $19,064,322 to be provided from reserve funds as authorized by Chapter 784, Statutes of 1969 is proposed to be used as matching funds for $15,569,754 of district funds. It is anticipated that 3.4 million dollars of federal grant funds will be made available during the 1970–71 fiscal year.

The following constitutes a breakdown of the dollar amounts and percentages of state funds for the types of projects proposed.

[1] This amount is treated as an expenditure in current year when transferred from General Fund and is therefore not included in overall budget totals.

COMMUNITY COLLEGES—Continued

LINE	SUMMARY	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75

GENERAL ANALYSIS—Continued

Land Acquisition

Land acquisition totaling $1,368,312 for the expansion of existing and new campuses is included for four districts and represents 7 percent of the total 1970–71 Capital Outlay Program.

Site Development, Utilities and Physical Plant

Site development projects totaling $1,015,007 including off-site development, utilities, and physical plant facilities are included for five districts and represent 5 percent of the new Capital Outlay Program.

General Academic and Lecture Facilities

General academic and lecture facilities projects totaling $2,416,352 in eight districts, representing 12 percent of the 1970–71 Capital Outlay program have been included.

Science and Vocational Technology Facilities

Science and vocational technology programs have been expanding rapidly in all districts. Included in the 1970–71 Budget are additional facilities for 13 districts totaling $5,452,772 which represents 26 percent of the total 1970–71 Capital Outlay program.

Libraries and Resources Material Centers

The state matching funds for construction of new and expansion of existing library and resource material centers in nine districts total $2,577,201 and represent 12 percent of the 1970–71 Capital Outlay program. Provision for audio-visual facilities and equipment are included in this total.

Physical Education Facilities

Physical education projects, totaling $5,162,133 and representing 25 percent of the 1970–71 Capital Outlay program for 14 districts, have been included.

Other Projects

A total of $2,772,545 has been included for the construction of administrative and cafeteria facilities. This balance of projects represents 13 percent of the total 1970–71 Capital Outlay program.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

STATE BUILDING PROGRAM. EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75
Antelope Valley Joint Junior College District	–	$60,862	–				
Butte Junior College District	$231,332	–	$883,267				
Butte College:							
Site development, Phase I, consisting of grading, drainage and general site improvement	–	–	*627,515*				
Off-site development consisting of Campus Road and drives, Clark Road intersection, Durham Pentz Road intersection, and lighting	–	–	*34,451*				
Funds for working drawings are requested for 1970–71. This project will provide physical education facilities with 44,710 assignable square feet	–	–	*78,305* W				
Funds for working drawings are requested for 1970–71. The project will provide life, health and agriculture science building with 11,950 assignable square feet	–	–	*30,122* W				
Funds for working drawings are requested for 1970–71. The project will provide chemistry, physics and physical science building with 15,550 assignable square feet	–	–	*34,250* W				
Funds for working drawings are requested for 1970–71. The project will provide engineering and technology building with 20,500 assignable square feet	–	–	*34,809* W				
Funds for working drawings are requested for 1970–71. The project will provide library, audio-visual, book processing, and graphic building with 22,830 assignable square feet	–	–	*43,815* W				
Cabrillo Junior College District	29,183	–	29,471				
Cabrillo College:							
Construct 1,300 lineal feet of perimeter road, 160 lineal feet of secondary road, and provide storm drains and lighting	–	–	*29,471*				

Cerritos Junior College District	161,588	–	124,440
Cerritos College:			
Construct physical education addition of 2,123 assignable square feet locker space	–	–	*35,375*
Construct and equip physical education room (weight lifting, gymnastics and wrestling), of 4,523 assignable square feet	–	–	*89,065*
Chaffey Union Junior College District	87,334	35,690	14,141
Chaffey College:			
Construct and equip covered art patio with 1,492 gross square feet	–	–	*14,141*
Citrus Junior College District	173,167	145,105	162,679
Citrus College:			
Construct addition to women's physical education locker and shower building with 7,211 assignable square feet	–	–	*162,679*
Contra Costa Junior College District	387,109	531,079 254,536 F	1,389,646
Diablo Valley College:			
Equip engineering technology center of 27,149 assignable square feet	–	–	*123,374*
Construct academic arts complex of 33,919 assignable square feet	–	–	*908,226*
East College:			
Site development consisting of grading, sewer, electrical service, irrigation, water, gas, storm sewer, road, lighting, walks, fencing, and erosion control	–	–	*271,000*
Funds for working drawings are requested for 1970–71. The project will provide classroom and business facility of 17,325 assignable square feet	–	–	*13,070* W
Funds for working drawings are requested for 1970–71. The project will provide drama and music facility of 7,385 assignable square feet	–	–	*7,179* W
Funds for working drawings are requested for 1970–71. The project will provide a graphic arts and personal service facility of 13,100 assignable square feet	–	–	*10,768* W
Funds for working drawings are requested for 1970–71. The project will provide instructional-student service facility with 8,130 assignable square feet	–	–	*6,566* W
Funds for working drawings are requested for 1970–71. The project will provide resource materials center with 17,660 assignable square feet	–	–	*16,196* W
Funds for working drawings are requested for 1970–71. The project will provide science facility with 11,780 assignable square feet	–	–	*10,943* W
Funds for working drawing are requested for 1970–71. The project will provide student center and cafeteria facility with 15,340 assignable square feet	–	–	*12,694* W
Funds for working drawings are requested for 1970–71. The project will provide technology facility with 12,210 assignable square feet	–	–	*9,630* W
El Camino Junior College District	–	525,998	
Fremont-Newark Junior College District	563,223	455,692	
Gavilan Joint Junior College District	99,008	273,275	
Grossmont Junior College District	–	196,245	
Hartnell Joint Junior College District	433,616	135,096	1,153,258
Hartnell College:			
Construct physical education facilities which will include: gym, locker and shower rooms, and four handball courts with 35,410 assignable square feet; and remodeling of existing physical education building of 19,389 assignable square feet	–	–	*600,000*
Construct standard outdoor 42x75 foot swimming pool and related aquatic facilities	–	–	*76,939*
Construct drama music building of 21,475 assignable square feet	–	–	*476,319*

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Napa Community College District	–	498,629	115,193
Napa College:			
Equip Little Theater of 12,794 assignable square feet	–	–	*115,193*
North Orange County Junior College District	361,715	3,483,116 321,750 [F]	1,492,463
Cypress College:			
Equip science facility of 63,486 assignable square feet	–	–	*275,837*
Equip business education building of 33,011 assignable square feet	–	–	*154,516*
Construct men's shower and locker and vocational technical building consisting of 33,467 assignable square feet	–	–	*940,486*
Fullerton Junior College:			
Rehabilitation of the print shop consisting of 11,213 assignable square feet	–	–	*121,624*
Oceanside-Carlsbad Junior College District	83,070		
Orange Coast Junior College District	2,113,326	1,851,693	84,583
Golden West College:			
Equip police science building of 2,516 assignable square feet	–	–	*5,263*
Equip theater arts building of 13,841 assignable square feet	–	–	*30,065*
Equip food service building of 3,219 assignable square feet	–	–	*7,426*
Orange Coast College:			
Equip physical education building of 4,520 assignable square feet	–	–	*29,848*
Equip food service building of 2,773 assignable square feet	–	–	*11,981*
Palo Verde Unified School District	58,380		
Pasadena Area Junior College District	–	1,043,509	514,709
Pasadena City College:			
Remodel existing physical science building (E) which consists of 24,285 assignable square feet	–	–	*514,709*
Peralta Junior College District	–	579,183	706,793
College of Alameda:			
Construct outdoor physical education facilities, grading, walks, track, tennis courts, volleyball and basketball courts, fencing, backstops, baseball fields, landscaping, irrigation, turf	–	–	*363,535*
Merritt College:			
Construct gymnasium of 13,002 assignable square feet	–	–	*343,258*
Redwoods Junior College District	–	1,141,855 244,750 [F]	572,157
College of the Redwoods:			
Construct student service center (formerly called administration building) of 16,007 assignable square feet	–	–	*572,157*
Riverside Junior College District	283,880	315,069	228,802
Riverside City College:			
Acquisition of approximately 2 acres. This project will provide the final parcel to be purchased for a perimeter road along the southern boundary of the campus	–	–	*151,313*
Construct and equip music building addition of 1,857 assignable square feet	–	–	*55,873*
Remodel and equip 1,960 assignable square feet of existing band room area into drama facilities	–	–	*21,616*
San Bernardino Junior College District	252,443	–	81,184
San Bernardino Valley College:			
Equip humanities building of 24,447 assignable square feet	–	–	*81,184*

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

GENERAL ANALYSIS

The Department of Human Resources Development did not include a Capital Outlay request in either the 1968–69 or the 1969–70 fiscal year budget and no new request is included in the 1970–71 fiscal year.

The department is pursuing the policy of recovering the cost of the construction of buildings and building additions through rental amortization which results in restoring money to the funds from which the capital expenditures were made.

In 1970–71, the Department of Employment Contingent Fund will recover $161,945 and the Unemployment Insurance Trust Fund $389,379, for a total of $551,324.

Facilities Financed by Loans From Treasury Funds

DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT BUILDING, LOS ANGELES

(Unemployment Compensation Disability Fund) [1]

Investment of money from the Disability Fund was authorized by Chapter 16, Statutes of 1954 (First Extraordinary Session), for the acquisition of real property and the construction and equipment of a building or buildings and appurtenant facilities for the use of the Department of Employment (now the Department of Human Resources Development) as a branch office in Los Angeles. Expenditures will be repaid through rental payments by the occupying agency.

DEPARTMENT OF HUMAN RESOURCES DEVELOPMENT BUILDING, SACRAMENTO

(Unemployment Compensation Disability Fund) [1]

Investment of money from the Disability Fund was authorized by Chapter 1603, Statutes of 1951, for the construction and equipment of a building or buildings and appurtenant facilities for the use of the Department of Employment (now the Department of Human Resources Development) as a central office in Sacramento. Expenditures will be repaid through rental payment by occupying agencies.

Investment of money from the Disability Fund was authorized by Chapter 1814, Statutes of 1955, for the acquisition and development of a parking lot adjacent to the new central office building. Expenditures will be repaid through charges to persons using the parking lot.

For the list of standard (lettered) footnotes see the end of the Capital Outlay section of the budget.

[1] Trust Fund receipts and expenditures are not included in the overall budget totals. Statement of fund condition appears in the Department of Human Resources Development support budget.

[2] Exceeds the amount reported by the State Controller as transferred to the General Fund by $24,320 which represents the transfer after June 30, 1969, relating to the 1968–69 fiscal year.

[3] Section 19.1 of the Budget Act provides that all surplus in excess of $1,000,000 is to be transferred to the General Fund.

1970–71—1974–75

The Department of Mental Hygiene operates state facilities for the care and treatment of the mentally ill and the mentally retarded. On June 30, 1969, the capacity was 30,222 throughout the state. These facilities include: five hospitals exclusively for the mentally ill, five hospitals for the mentally ill and mentally retarded, four hospitals for the mentally retarded only, and two training and research institutes. One hospital for the mentally ill, Modesto, will cease operations on or about June 30, 1970, reducing the rated capacity by 1,539. The Neuropsychiatric Institutes are operated in conjunction with the University of California. They were established for teaching and research to provide the clinical settings for research and the training programs of the department and the University's medical schools.

INTRODUCTION

Program Summary and Analysis

The Lanterman-Petris-Short legislation has reduced the projected population for the Department of Mental Hygiene state facilities for the mentally ill, and the five-year construction program reflects a reduction in the need for beds for these patients. Different types of facilities will be required to take care of the known needs of difficult-to-treat patients, both mentally ill and retarded.

One million dollars will be expended during the 1970–71 fiscal year for air conditioning and ward renovation to accommodate mentally retarded patients. Approximately $1,400,000 will be expended for minor construction and remodeling improvements in all hospitals.

The remainder of the five-year capital outlay program is devoted to a projection of approximately $2,000,000 a year for minor capital outlay improvements, the construction of a replacement for the inadequate and obsolete Chamberlain Hospital at the Sonoma facility ($5,000,000), and approximately $6,000,000 for upgrading utilities services, feeding and ancillary facilities. Approximately $175,000 is required for schools and demolition of substandard or unneeded structures.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

RECAPITULATION OF PROGRAM CATEGORY

Five-Year Program

	Amount	*Percent of total*
Ward renovation and air conditioning	$11,849,304	36.8
Utilities, services, feeding and ancillary facilities	5,719,600	17.8
Replacement of an inadequate mentally retarded hospital building	4,932,000	15.3
Mentally retarded schools facilities	87,500	0.3
Demolition of substandard and unneeded structures	85,000	0.3
Minor construction and remodeling	9,500,430	29.5
Total	$32,173,834	100

GENERAL PROGRAM ANALYSIS

The total population of the department's hospitals for the mentally ill will be be 12,383 on June 30, 1970, and 10,969 on June 30, 1971. This is a marked reduction from the June 30, 1958, total of 36,297. This reduction is due to the effect of the Lanterman-Petris-Short legislation and to several other factors. Among these other factors are more intensive short-term care and greater use of chemotherapy. It is estimated the future rate of admissions will remain at the current 180.8 patients per 100,000 statewide population on June 30, 1970.

An effort is being made to reduce the number of mentally retarded patients in state hospitals for the mentally retarded to the rated capacity of those facilities by placing them in appropriate community facilities, transferring them to available facilities in the hospitals for the mentally ill closer to their homes, and by limiting admissions to a ratio of one admission for each two patients leaving the hospitals.

An increase from 55 to 70 square feet of bed space per patient was authorized in the 1968–69 fiscal year, and the department has applied this standard which produced a rated bed capacity for the mentally ill of 22,526 and for the mentally retarded of 10,517. Applying these standards in a survey of physical facilities, correcting mathematical errors, abandoning inadequate buildings and converting beds from mentally ill to mentally retarded usage has resulted in a rated bed capacity on June 30, 1969 of 19,406 for the mentally ill and a rated bed capacity of 10,523 for the mentally retarded.

The table below outlines the changes which were made prior to June 30, 1969.

Facilities for the Mentally Ill

Decreases:	
a. Deactivate ward buildings	–862
b. Convert multiple bed areas from capacity to other usage	–1
c. Convert ward units from mentally ill to mentally retarded units	–72
d. Loss: Correction of mathematical errors	–9
e. Convert adolescent unit from 70 square feet to 110 square feet departmental standard	–99
Total Decrease—Facilities for the Mentally Ill	–1,043
Increases:	
a. Activate ward buildings	206
b. Convert multiple bed areas from other usage to capacity	6
c. Convert ward units from mentally retarded to mentally ill units	29
d. Gain: Correct mathematical errors	4
e. Temporary, pending reevaluation of Children's Unit	68
Total Increase—Facilities for the Mentally Ill	313
Net Decrease—Facilities for the Mentally Ill—1968–69 Fiscal Year	–730

DEPARTMENT OF MENTAL HYGIENE—Continued

LINE	STATE BUILDING PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	PROJECTED 1973–74	PROJECTED 1974–75

GENERAL PROGRAM ANALYSIS—Continued

Facilities for the Mentally Retarded

Decreases:	
a. Convert ward units from mentally retarded to mentally ill units	–29
Total Decrease—Facilities for the Mentally Retarded	–29
Increases:	
a. Convert ward units from mentally ill to mentally retarded units	72
b. Gain: Correct mathematical errors	2
Total Increase—Facilities for the Mentally Retarded	74
Net Increase—Facilities for the Mentally Retarded	45

It is proposed that as beds become vacant, wards and buildings will be deactivated in order to maintain approximately 5 percent capacity over population to allow for flexibility of operations. The table above reflects this policy and accounts for the increase in the number of beds devoted to mental retardation programs throughout the first five years of the period of time covered.

Based on the revised total rated bed capacity of hospitals for the mentally ill there was an excess capacity of 3,635 on June 30, 1969, and an anticipated excess capacity of 2,702 on June 30, 1970. Based on the revised total rated bed capacity in the facilities for the mentally retarded, there was a shortage of 2,059 beds on June 30, 1969, and an anticipated shortage of 628 beds on June 30, 1970. On June 30, 1971 and thereafter, approximately 500 beds in excess of population will be maintained.

Projects Proposed for Financing in 1970–71

A total of $2,408,430 is proposed for the 1970–71 fiscal year to be financed from the General Fund. Major construction projects account for $1,008,000. The balance of $1,400,430 pertains to minor construction projects.

Equipment

Equipment funds in the amount of $8,000 are included to equip ward units remodeled for mentally retarded patients at Napa State Hospital.

Improvements to the Physical Plants

The budgeted amount of $1,000,000 is scheduled for a remodeling project in the program for the mentally retarded at Agnews, and air conditioning projects at Agnews, Stockton, Napa, Mendocino, and Porterville State Hospitals.

Minor Projects

Minor projects to correct deficiencies and improve the physical plants total $1,400,430.

SUMMARY OF POPULATION AND CAPACITY AT END OF YEAR (June 30)

Neuropsychiatric Institutes

LANGLEY PORTER NEUROPSYCHIATRIC INSTITUTE

This institute, in conjunction with the University of California School of Medicine in San Francisco, operates a research, training and treatment center in Northern California. It had a rated capacity of 105 as of June 30, 1969, and in addition operates a large outpatient clinic. No major projects are proposed for the 1970–71 fiscal year. A total of $82,600 is provided for minor construction projects in 1970–71 to correct deficiencies and improve the physical plant.

Remodeling of third floor patients unit	–	–	$30,000 [c]				
Remodel second floor to treatment research unit	–	–	25,000 [c]

NEUROPSYCHIATRIC INSTITUTE AT UNIVERSITY OF CALIFORNIA, LOS ANGELES

This institute, constructed as a wing of the Medical School at the University of California at Los Angeles, operates a research, training and treatment center. It had a rated capacity of 188 as of June 30, 1969, and in addition operates a large outpatient clinic. The original facility was completed in December 1960, with the first patient admission in January 1961. A recently completed mental retardation addition will increase the rated capacity to 248. No major projects are proposed for the 1970–71 fiscal year. A total of $45,000 is provided for minor construction projects in 1970–71 to correct deficiencies and improve the physical plant.

MAJOR PROJECTS [b]

Equip mental retardation addition	$41,043 [E]	$17,534 [E]					
Equip mental retardation addition	91,755 [E]	218,245 [E]					
Totals, Major Projects, Neuropsychiatic Institute U.C.L.A.	$132,798	$235,779					

MINOR PROJECTS [b]

Hospitals for the Mentally Ill

AGNEWS STATE HOSPITAL

This hospital for the mentally ill and the mentally retarded had a rated capacity of 2,455 for the mentally ill and 467 for the mentally retarded as of June 30, 1969. Two major projects, alterations to wards for mentally retarded patients and complete air conditioning of R and T building are proposed for the 1970–71 fiscal year. A total of $167,000 is provided for minor construction projects in 1970–71 to correct deficiencies and improve the physical plant.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [a]

Remodel wards for mentally retarded patients—Wards 85, 86, 91 and 92 *(General Fund)*	–	–	$125,000 [c]	
Complete air conditioning of R and T building, east area *(General Fund)*	–	–	250,000 [c]	
Remodel ward building 52 for mentally retarded patients	–	–	–	$865,000 [c]
Install ward service elevators (4) buildings 51 and 52, east area	–	–	–	210,000 [c]
Construction commissary warehouse, west area	–	–	–	300,000 [c]
Equip commissary warehouse, west area	–	–	–	10,000 [E]

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

Hospitals for the Mentally Retarded

FAIRVIEW STATE HOSPITAL

This hospital for the mentally retarded had a rated capacity of 1,915 as of June 30, 1969. No major projects are proposed for the 1970–71 fiscal year. A total of $62,200 is provided for minor construction projects in 1970–71 to correct deficiencies and improve the physical plant.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [a]							
Air condition receiving and treatment building	–	–	–	$601,000 [c]			
Install mechanical ventilation in buildings J, K, L, and M	–	–	–	–	$600,000 [c]		
Improve primary (4,160 volt) distribution system	–	–	–	–	–	$70,000 [c]

GENERAL ANALYSIS

The Military Department organizes and administers the State Militia which, in the form of the National Guard, is immediately available to the Governor in the event of major civil disturbances, or for military support to civil authority in local or statewide disasters. It also stands ready to augment the federal military forces during national emergencies.

The Capital Outlay program of the Military Department comprises the construction of armories, warehouses, rifle ranges, and other facilities essential to the organization, training and morale of the California Army National Guard and the California Air National Guard. The long-range construction program will provide armories and other facilities to adequately house and train all units.

The federal government under Public Law 783, Eighty-first Congress, has participated in the construction of armories on a cost-sharing basis. Federal funds have been made available on the basis of up to 75 percent of qualifying phases of the construction. In addition to federal participation in the construction of armories, certain facilities such as motor vehicle storage buildings, warehouses, airplane hangars, aircraft parking aprons, and shop buildings primarily for the care and maintenance of federal equipment issued for state use are financed entirely from funds except for the preparation of plans and supervision of construction which is provided by the state.

The Capital Outlay program for 1970–71 provides for minor projects, which include repairs to various existing armories, paving of yards and related work.

The last four years of the five-year building program are the agencies current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [b]

Preparation of plans and supervision of projects financed by federal government.							
General Fund	$149,735 [p]	$165,000 [p]	–	$215,140 [p]	$125,000 [p]	$125,000 [p]	$125,000 [p]
This project will provide funds for plans and construction supervision of projects where construction funds are provided by federal funds. These will consist of motor vehicle storage buildings, warehouses, airplane hangars and shop buildings used primarily for maintenance and care of federal equipment.							
Other federal construction funds	(1,232,526)	(1,767,000)	(1,953,000)	(2,172,000)	(1,510,000)	(1,155,000)	(1,360,000)

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

DEPARTMENT OF PROFESSIONAL AND VOCATIONAL STANDARDS

Departmental Administration

GENERAL ANALYSIS

The purpose of this department is to protect the public health, welfare and safety by licensing only persons and firms of demonstrated knowledge and abilities to perform services for the public, to prevent unauthorized practices upon the public, and to discipline those licensees who fail in their public trust.

There are in excess of 30 boards, bureaus and commissions of this department which are responsible for regulating in excess of 700,000 persons practicing more than 50 professions and vocations in the State of California.

Departmental administration coordinates and supervises the administrative and financial affairs of its member boards, bureaus and commissions.

Section 403 of the Business and Professions Code provides that the costs of building operations, maintenance, repairs and other reasonable and necessary expenses shall be paid from rentals and that the building will be subject to the supervision of the Department of Professional and Vocational Standards in accordance with rules and regulations established by the department and the Department of General Services.

The department operates two state office buildings in Sacramento. These buildings house a majority of the member boards, bureaus and commissions and also the State Board of Equalization.

DEPARTMENT OF PROFESSIONAL AND VOCATIONAL STANDARDS—Continued

Facilities Financed by Loans from Treasury Funds

BUSINESS AND PROFESSIONS BUILDING ANNEX, SACRAMENTO

(Various Funds)

This building was constructed by advances from special funds and the General Fund in accordance with Sections 400 to 404 of the Business and Professions Code. The cost of operating and maintaining the building is defrayed out of the rentals from the state agencies occupying space in the building and fees paid by users of the parking facilities. Generally, the remaining receipts are apportioned back to the boards contributing to the cost of the building in proportion to their respective investments.

Repayments to investing boards are estimated on an accrual basis. Actual repayments are made semiannually after the close of the period in which net rentals occurred.

Investigating Agencies	Investment as of July 1, 1969	Estimated repayments 1969–70	Estimated repayments 1970–71
Department of Professional and Vocational Standards:

GENERAL ANALYSIS

Program and Objectives

The Division of Forestry is charged with the protection of over 38,000,000 acres of state and private lands having statewide interest with regard to timber production, rangeland, recreational use and watershed value. Direct fire protection is provided for approximately 29,000,000 of the above acres as well as protection of 6,000,000 additional acres of rural agricultural land under contract with 26 counties which provide for reimbursement of costs.

The Division of Forestry's construction needs are governed by the authorized level of personnel and equipment. At the present time, the division operates 232 forest fire stations, 77 lookouts and 13 primary and 14 secondary air attack bases. The division maintains 29 ranger unit headquarters (all but Owens Valley have fire stations), six district headquarters, 33 conservation camps, a headquarters nursery at Davis along with two branch nurseries, equipment shops, eight state forests and numerous radio repeater sites. In addition, the division is responsible for maintenance of 1,071 miles of telephone lines, 3,892 miles of fire access roads, 84 bridges and 12 miles of powerlines.

The Division of Forestry constructs and maintains forestry conservation camps for the use of the Department of Corrections and Department of Youth Authority. Inmates living in these special camps engage in conservation work projects such as fire hazard reduction; construction and maintenance of fire access roads and trails, as well as powerlines and other projects beneficial to the enhancement and management of natural resources. The inmate capacities of these camps are reflected in the capacity figures for the respective departments.

The 1970–71 budget proposes a total of $170,893 for one major construction project and five land acquisitions, and $474,107 for minor projects that will provide for construction required by the Division of Forestry's field activities.

MAJOR PROJECTS

FORESTRY FIELD FACILITIES

MAJOR PROJECTS [b]

FORESTRY FIELD FACILITIES

District I			
Oak Ridge Lookout—site acquisition	–	$5,000 [L]	
Klamath Forest Fire Station—new facility on new site	$123,826 [C] 2,274 [E]	8,618 [C] 335 [E]	
Additions to Boggs Mountain and Jackson State Forests	108 [L]	6,550 [L]	
Elk Camp Forest Fire Station—site for replacement facility	–	8,000 [L]	
District II			
Eagle Lake Forest Fire Station—standard 14-man barracks; messhall; three-bay equipment building with office; and a gas and oil house To be constructed on new site. Present structures on leased land not worth relocating.	–	–	$133,190 [C] 4,203 [E]
Bieber Forest Fire Station—replace barracks-messhall on existing site	–	135,700 [C] 1,890 [E]	
Robinson Mills Forest Fire Station (Hurleton)—replace facility on new site	156,495 [C]	9,970 [C] 5,605 [E]	
Alturas Forest Fire Station—additional facilities—12-man barracks-messhall, two-bay equipment building	15,273 [C] 5,069 [E]		
District III			
Nevada-Yuba Ranger Unit Headquarters—radio and auto shop building—replace facility	–	87,000 [C] 665 [E]	
Copperopolis Forest Fire Station—replace facility	11,016 [C] 377 [E]		
Telegraph Hill Lookout—site acquisition	–	15,000 [L]	
Sierra Vista Lookout—site acquisition	52 [L]	14,948 [L]	
District IV			
Tyler Creek Forest Fire Station—site acquisition To purchase two acres adjacent to present fire station site for planned permanent facilities. Present leased site is under high water mark of Tyler Creek.	–	–	5,000 [L]
Piedra Forest Fire Station—site acquisition	14 [L]	5,986 [L]	
District V			
Tularcitos Forest Fire Station—site acquisition To purchase two acres to replace present site that will be flooded when new dam will be completed. Present structures old war surplus buildings not worth salvaging.	–	–	10,000 [L]
Sandy Point Forest Fire Station—site acquisition To purchase present 1.17 acres under short term lease. Funds are presently appropriated to purchase adjacent two acres for planned replacement of present facilities. This request will provide additional land to provide needed parking space, a gas and oil house, and other improvements.	–	4,000 [L]	2,000 [L]
Almaden Forest Fire Station—site acquisition	–	12,500 [L]	
Sunshine Forest Fire Station—new facility	135,242 [C]	18,008 [C] 8,337 [E]	
Monterey Ranger Unit Headquarters—replace barracks-messhall *(State Construction Program Fund)*	4,665 [C] 2,569 [E]		

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

STATE LANDS DIVISION

GENERAL ANALYSIS

The State Lands Division administers policies established by the Legislature and the State Lands Commission in managing the lands belonging to the state. These consist of school lands, swamp and overflow lands, lands underlying navigable rivers and lakes, and other sovereign lands.

Funds have been appropriated in past years to remove beach and underwater obstructions from state-owned tidelands and submerged lands near Summerland, Santa Barbara County.

MINOR PROJECTS b

For removal of beach and underwater obstructions	$51,400	$50,000	–

13	TOTAL, FIVE-YEAR BUILDING PROGRAM							$694,150

Expenditures under the State Building Program provide for state construction activity not directly related to the State Water Project.

The one major project proposed involves the restoration of the flood carrying capacity of Cherokee Canal through the removal of sediment debris. The minor projects include the relocation of the Sacramento Maintenance and Repair Yard to available space at the Bryte Laboratory, improvement of the surfacing at the Sutter Maintenance Yard, replacement of a snow survey shelter cabin in cooperation with the U.S. Forest Service, and elimination of a maintenance problem at the Northern District Headquarters in Red Bluff. *The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the Administration.*

A two-acre site in El Monte has been acquired for a new motor vehicle emissions control laboratory. The 1970–71 budget provides funds for constructing and equipping this building.

The Air Resources Board is responsible for providing a coordinated statewide Air Pollution Control effort in California. The board's activities include the evaluation of air quality; the establishment of air quality standards; establishment of vehicle emissions standards; and certification of vehicle emissions control systems.

GENERAL ANALYSIS

The California Highway Patrol is a statewide law enforcement organization with the responsibility of providing adequate patrol of the highways at all times of the day and night to assure the safe, lawful, rapid and economical use of the highway system of the State of California. The department is headquartered in Sacramento and has field offices throughout the state. Its jurisdiction is principally limited to streets and highways outside of incorporated areas and all freeways.

The 1970–71 Budget request includes funds for general site preparation, for the new Academy; for the construction of an area office building at West Valley; for the purchase of the relocatable buildings being used at the Academy; for the purchase of the substation office at Los Banos; for the purchase of an office/warehouse building at San Diego; funds for radio communications equipment and facilities; and for construction program planning.

Minor construction funds are proposed for modifying the air conditioning at Headquarters Building A, the office building at Indio, the headquarters cooling plant, and the heating and cooling plant at Zone V in Los Angeles. Funds are also provided for paving, landscaping and storm drainage work at Fresno.

When a field office is to be established, or upon the expiration of an existing lease, a determination will be made whether to continue in the existing leased office, to acquire a new leased office, or to establish a state-owned facility. The determination as to the need for a new office will be based on the stability of the highway routing, population expansion, and the traveling distance and time from existing field offices nearest the area to be patrolled. A determination will be made as to the probable length of occupancy and the projected officer strength during the time of occupancy. An analysis will determine the most economical approach in the particular area.

Consideration has been given to constructing state-owned field offices in Williams, Chico, and Napa, however, the latest analysis indicates that acquisition of new leased offices in 1970–71 would be more economical.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

6	*State's share of project*	–	*580,000*	*1,123,522*	*1,908,557*			
7	This project will provide for the development of a completely							
8	new academy. In 1969–70 land will be acquired, working							
9	drawings, plans and specifications will be developed. In							
10	1970–71 provision is made for general site preparation,							
11	utilities, grading, paving, high speed track and street net-							
12	work, and landscaping. In 1971–72 construction of build-							
13	ings and remainder of facilities is to be completed.							
14	Area office building—West Valley (Los Angeles)	–	–	403,000 [W C]				
15	This project is for the purpose of providing funds for a state-							
16	constructed facility in the vicinity of Van Nuys-Encino							
17	to replace an existing leased facility which is inadequate							
18	for continued operations.							
19	Relocatable building purchase—academy	–	–	80,000				
20	This project provides for the acquisition of the relocatable							
21	leased classroom and dormitory facilities new being used							
22	for temporary housing. The lease provides for purchase							
23	as of January 31, 1971, for the sum of $80,000. This							
24	lease expires January 31, 1972, and the need for the							
25	facilities will continue until construction of the new							
26	academy is completed in mid or late 1972.							
27	Substation office acquisition—Los Banos	–	–	120,000				
28	This project provides funds for acquisition of the Los Banos							
29	substation facility under the terms of the lease-purchase							
30	option. The lease permits acquisition at the stipulated							
31	amount, at the second anniversary date of the lease which							
32	is May 1, 1971. The Department of General Services has							
33	prepared an economic analysis which indicates that ac-							
34	quisition of the property on the second anniversary date							
35	of the lease is in the best interest of the state.							
36	Office-warehouse building acquisition—San Diego	–	–	110,000 [L]				
37	This project is for the purpose of providing funds for the							
38	acquisition of an office-warehouse building in San Diego.							
39	The facility will be remodeled to provide office and oper-							
40	ating accommodations for the San Diego area operations.							
41	The property is presently under the jurisdiction of the							
42	Department of Public Works, Division of Bay Toll							
43	Crossings, and is surplus to their needs.

GENERAL ANALYSIS

This service and tax collection agency, headquartered in Sacramento, functions through a network of field offices located in population centers throughout the state. The department will register and collect taxes and fees on 13,776,000 vehicles and issue new and renewal drivers' licenses to approximately 4,410,000 individuals during the budget year. The 1970–71 fiscal year budget provides for construction of field offices in or near Anaheim, northeast Sacramento, Westminster, Salinas, Whittier, and San Mateo (including overbuilding to house another state agency), and preparation of additional parking facilities at Sacramento headquarters. Acquisition of land for a new office building and parking facilities is proposed for the Hawthorne area. The budget also includes funds for construction program planning.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS

GENERAL ANALYSIS

The Veterans Home, a 2,378-bed facility, is located in Yountville, Napa County. It is a home for aged and disabled honorably discharged former members of the armed forces. The site of the home is on a hillside with both single- and two-story buildings and a four-story hospital. Hospital and intermediate care facilities are totally occupied. Bed vacancies are in domiciliary sections only.

Capital outlay proposed is 10 minor projects at a total estimated cost of $180,490. Projected capital outlay includes a water treatment plant at Rector Dam. The California Department of Health and Sanitation and the Water Resources Department have recommended this project as it is very likely to be required by law to fully treat this water in the near future.

Additional projected capital outlay needs are to replace water, sanitary, and steam lines in the main hospital building which is over 40 years old. Projected needs also include a 28-bed hospital ward for women.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

GENERAL ANALYSIS

Lump sum appropriations for project planning, increased cost of construction and miscellaneous repairs, improvements and equipment have been provided from which allocations to agencies are made as needed. The expenditures from such allocations are included in the individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations, is included here as an expenditure.

Funds for preparation of complete project planning are proposed to continue the presently authorized procedures for securing sound cost estimates for subsequently budgeted projects.

Expenditures from available appropriations are estimated for allocation to state agencies upon approval of the State Public Works Board as prescribed by Sections 16409 and 16354 of the Government Code and for increased cost of construction when the lowest bid on a project is in excess of the available funds for such project. Savings from completed projects are transferred to these funds and are available by law for such allocations.

The amount of $49,479,208 was transferred from the General Fund during the 1969–70 fiscal year in accordance with the provisions of Chapter 784, Statutes of 1969. The amount of $26,914,886 is shown under the Community Colleges as an expenditure and the remaining balance of $22,564,322 is shown in this budget as an expenditure.

Appropriations are proposed to finance the preparation of complete project planning during the 1970–71 fiscal year from the General Fund, $150,000.

Expenditures proposed to finance increased cost of construction during 1970–71 fiscal year are shown in three parts, General Fund Section 16409, Government Code, $500,000, State Construction Program Section 16354, Government Code, for allocations applicable to the 1964 and prior bond issues, $500,000, and $2,500,000 for allocations to the 1966 bond issue.

Funds are proposed for miscellaneous repairs, improvements and equipment to be allocated to agencies upon subsequent determination of requirements.

Projected needs of the State Construction Program Fund will require General Fund advances to be made during the 1969–70 and 1970–71 fiscal years. The interest cost necessary to repay those advances are included herein in the amounts of $908,000 during 1969–70 and $1,755,000 during 1970–71 fiscal years.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

[1] This amount is treated as an expenditure in current year when transferred from General Fund and is therefore not included in overall budget totals.

[2] Reserved for School Lunch Program.

[3] This amount is composed of (1) $73,216 Department of Youth Authority, (2) $3,307,517 for increased cost of construction for prior bond acts and $4,976,884 for the Higher Education Construction Program Bond Act of 1966.

[4] The surplus available for appropriation as of June 30, 1970 and June 30, 1971, in the Bond Act of 1966, has a temporary deficit balance. Anticipated federal funds in excess of those needed for funding purposes will be reverted to the surplus of the fund.

[5] The deficit balance as of June 30, 1969 represents funds appropriated from the General Fund for augmentation of the Capital Outlay Fund for Public Higher Education by Item 321, Budget Act of 1968 which will be transferred in the 1969–70 fiscal year as required to meet the actual cash requirements of this fund.

District Agricultural Associations

GENERAL ANALYSIS

Chapter 3, Part 3, Division 3, of the Agricultural Code fixes the boundaries of 51 agricultural districts.

Each of the district agricultural associations is a state institution administered by a board of 9 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Part 3, Division 3, of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under allocations approved by the Director of Agriculture and budgets approved by the Department of Finance. The Audits Division of the Department of Finance audits the premium awards made at the fairs and makes postaudits as well.

DISTRICT FAIR CONSTRUCTION PROGRAM

Expenditures for Capital Outlay at district agricultural fairs are met from the continuing appropriation made by Business and Professions Code Section 19630, the allocation of which is approved by the State Public Works Board. These funds were augmented by Budget Act appropriations to meet increases for capital expenditure at fairs during 1966–67.

The amount budgeted for Capital Outlay at county agricultural fairs and citrus fruit fairs is reported in Local Assistance, Subventions for Agriculture.

See Budget Supplement for District, County, and Citrus Fruit Fairs for budget detail.

TOTAL EXPENDITURES, CAPITAL OUTLAY	$1,395,427	$3,083,856	$1,191,700

47					

48 NOTE: The statements on this Annual Budget Report, prepared and submitted in accordance with Sections 143.1 and 143.2 of the Streets and Highways Code, reflect the
49 segregation of Current Expenditures from Capital Outlay, to conform with similar format in the Governor's Budget.

50 [1] Section 186 of the Streets and Highways Code as amended by Chapter 329/69 limits highway maintenance and general administration expenditures in the 1968–69 and 1969–70
51 Fiscal Years to an amount equal to the revenue derived in the same year from $0.0125 per gallon tax on motor vehicle fuel and on the use of fuel. Following is a com-
52 parison of such revenue in the 1968–69 Fiscal Year with such expenditures:

53 Revenue	$108,124,888
54 Expenditures	89,595,305
56 Excess	$18,529,583

57
58 [2] Payments of Tort Claims and judgement are exempt from $0.0125 limitation by Chapter 329 dated 6/30/69.
59 [3] The Division of Highways has participated financially in the Bay Area Transportation Study from the Division's annual Highway Planning Budget items as follows:

60 *Fiscal year budget*	*Amount*	*Fiscal year budget*	*Amount*
61 1963–64	$10,000	1967–68	425,000
62 1964–65	310,000	1968–69	599,667
63 1965–66	2,480,000		
64 1966–67	516,668		$4,341,335

Detail of Major Project Allocations for Construction of Highways and Bridges as Recommended by the California Highway Commission for the 1970–71 Fiscal Year

LINE	COUNTY	ROUTE & POST MI.	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
			NORTHERN GROUP OF COUNTIES		
4–5	Alameda	24 1.8/4.2	Route 580 to Keith Avenue (on Broadway) in Oakland; resurface prior to relinquishment	2.4	$150,000
6–7	Alameda, Contra Costa	80 7.6/8.0; 0.0/6.0	0.4 mile south of Contra Costa county line to Hilltop Drive in Richmond; grind outside pavement lanes	6.4	270,000
8–9	Alameda	580 9.9/17.5	0.2 mile west of Vasco Road near Livermore to 0.4 mile east of Tassajara Road; 8-lane freeway (total estimate $13,200,000; $1,000,000 1969–70 fiscal year, $6,200,000 1971–72 fiscal year)	7.6	6,000,000
11–12	Amador	104 2.2/5.4	Southern Pacific Railroad to 5.4 miles east of Sacramento county line; 2-lane expressway	3.2	550,000
13–14	Amador	104, 88 5.4/8.2R; 7.3/7.6	5.4 miles east of Sacramento county line to Route 88; on route 88 between 0.1 mile west to 0.2 mile east junction Route 104; 2-lane conventional (48′-52′ street in Ione) (cooperative project, total estimate $740,000)	3.1	727,00
17–18	Colusa	5, 20 R14.3/R30.8; 20.1/R23.3	Route 5 from 0.9 mile south of Husted Road, south of Williams to 1.1 miles north of Wadleigh Road and Route 20 from Salt Creek to 0.1 mile east of Husted Road; 4-lane freeway (total estimate $13,741,000; $3,500,000 1969–70 fiscal year, $5,241,000 1971–72 fiscal year)	14.7	5,000,000
22–23	Contra Costa	4 10.4/10.6	Morello Avenue to Vine Hill Way in Martinez; construct south frontage road	0.2	200,000
24–25	Contra Costa	4, 84 27.3/30.6; 9.3/11.4	"G" Street to Route 84 and on Route 84, new Route 4 to Antioch Bridge; 4-lane freeway (total estimate $8,889,000; $6,000,000 1969–70 fiscal year)	5.4	2,889,000
27–28	Contra Costa	4 32.7	At Empire Avenue; improve alignment	–	105,000
29–30	Contra Costa	24, 680 1.3/9.1; 14.4	West of Orinda to Route 680; pay back BARTD for remainder of State's share of freeway improvement and expansion previously financed by BARTD	7.8	3,500,000
32–33	Del Norte	101, 199 27.1/31.6; 0.0/0.8	On Route 101 between 0.1 mile north of Northcrest Drive and 1.1 miles north of Route 101/199 junction and on Route 199 between junction of Route 101/199 and 0.8 mile east; 4-lane freeway	5.7	3,800,000
36–37	Fresno	5 30.5/66.2	Derrick Avenue to Merced county line; 4-lane freeway (total estimate $10,854,000; $2,714,000 1971–72 fiscal year)	36.2	8,140,000
38–39	Humboldt	101 R45.9/R48.7	5.1 miles south to 2.7 miles south of Scotia; 4-lane freeway	2.4	3,300,000
40–41	Humboldt	169 27.6	At Rube Creek, about 6.3 miles west of Route 169/96 junction near Weitchpec; replace Bridge No. 4-215 and approaches; 2-lane conventional	0.2	135,000
43–44	Humboldt	255 0.0/2.0	Route 101 at 5th Street in Eureka to Route FAS 967 County Road near Samoa; 2-lane expressway (total estimate $5,337,000; $4,400,000 1969–70 fiscal year)	2.0	937,000
46–47	Lake	29 41.2/50.8	0.1 mile south Route 175 near Lakeport to 1.7 miles south of junction Route 20; 4-lane freeway (total estimate $7,000,000; $3,000,000 1971–72 fiscal year)	9.4	4,000,000
49–50	Lassen	139 0.0/1.8	Junction Route 36 in Susanville to 1.8 miles north; 2-lane interim improvement on existing alignment	1.8	300,000
51–52	Lassen	395 108.5/115.1	Ravendale to 0.1 mile south of Termo; 2-lane conventional, widen, base and surface—minor realignment at SPRR Crossing	6.6	1,040,000
53–54	Madera	99, 145 11.7, 0.0	Fresno River Bridge No. 41-52 L&R and San Joaquin River Bridge No. 41-23; repair bridge decks	–	210,000
55–56	Mariposa	49 2.1/3.3	2.1 to 3.3 miles north of Madera county line; 2-lane expressway	1.2	1,410,000
57–58	Mariposa	49 29.8/32.5	0.5 mile north of Bear Valley to 1.7 miles south of Merced River; grade and surface; (casual labor)	2.7	100,000
59–60	Mendocino	101 13.1/17.3	2.3 miles north to 6.5 miles north of Hopland; 2-lane conventional, interim widening project	4.2	500,000
61–62	Mendocino, Humboldt	101 103.9/107.7, 0.0/0.3	1.5 miles south of Piercy to 0.3 mile north of Humboldt county line; 4-line freeway (total estimate $5,850,000; $5,000,000 1969–70 fiscal year)	3.7	850,000
64–65	Merced	5 0.0/17.4	Between Fresno county line and Route 152; 4-lane freeway (total estimate $8,600,000; $3,300,000 1971–72 fiscal year)	17.4	5,300,000
66–67	Merced	59 28.5/30.3	4.5 to 2.7 miles west of Snelling; 2-lane conventional	1.8	311,000
68–69	Modoc	395 14.6/R21.1	0.5 mile south of Jones Lane to Carlos Street in Alturas; 2-lane expressway on new alignment. Split financed (total estimate $2,620,000; $1,020,000 1971–72 fiscal year)	6.5	1,600,000
71–72	Monterey	101, 198 R21.1/R32.9; R0.0/0.9	1.8 miles south San Ardo to 0.8 mile north Route 198 near San Lucas and proposed Route 101 to 0.5 mile east of San Lucas; 4-lane freeway on Route 101, 2-lane conventional on Route 198 (total estimate $10,000,000; $3,000,000 1969–70 fiscal year)	13.4	7,000,000
75–76	Napa	12 0.2/3.3	Kelly Road to Solano county line; widen and resurface	3.1	280,000
77–78	Napa	29 11.6	First Avenue in Napa; northbound on-ramp	–	135,000
79–80	Nevada, Sierra	80 13.2/31.8; 0.0/1.6	In Nevada and Sierra counties at various locations between Donner Park Overcrossing near Truckee and Nevada state line; guardrail	10.0	450,000

Reserve for Undistributed Accrued Revenue	–	–	–	–	–	–	–	–	–
Accumulated Surplus, June 30	–	–	–	–	–	–	–	–	–

1 Represents 1968–69 tax collected in that year plus 1967–68 tax collected in 1968–69.
2 Represents estimated tax to be levied and collected in the same year (excludes both uncollected accrued taxes at June 30 and current year collections of taxes levied in prior year)
NOTE: Estimated amounts shown above for 1970–71 are based on Department of Finance estimate dated January 6, 1970.

Additional Statements of Expenditures and Obligations and Revenues for 1968–69 and 1969–70 Fiscal Years. Submitted Pursuant to Section 143.2, Streets and Highways Code

Statement 1—Comparison of proposed expenditures and obligations to be incurred for the 1969–70 fiscal year in the current budget with proposed expenditures and obligations to be incurred for the 1969–70 fiscal year as shown in the budget submitted to the 1969 Session of the Legislature.

Statement 2—Expenditures and obligations incurred for state highway purposes against the 1968–69 fiscal year, state highway budget compared to budget allocations presented to the 1968 and 1969 Sessions of the Legislature.

Statement 3—Detail of major project allocations for construction of highways and bridges for the 1969–70 fiscal year, compared to budget allocations.

Statement 4—Detail of major project allocations for construction of highways and bridges for the 1968–69 fiscal year, compared to budget allocations.

Statement 5—Expenditures for maintenance by routes for the 1968–69 fiscal year.

Statement 6—Comparison of revised revenue estimates for the 1969–70 fiscal year with budget estimates submitted to the 1969 Session of the Legislature.

	Butte	99 33.2/34.5	On the Esplanade (existing Route 99) between Big Chico Creek and 9th Avenue in the City of Chico; improve intersections and resurface (state's share)	1.3	–	31,000	31,000 [g, k]
	Butte	162 15.5/15.8	On the Lower Thermalito Bridge across the Feather River; construct a pedestrian walkway	–	–	103,000	103,000 [h, k]
	Calaveras	4 41.2/42.3	Arnold to Moran Road; 2-lane conventional and expressway (32 feet AP)	1.1	450,000	382,500	–67,500 [a]
	Calaveras	12, 26 0.7/2.1 5.2/9.7	At various locations on Route 12 between 0.7 mile and 2.1 miles east of the San Joaquin county line and on Route 26 between 5.2 miles and 9.7 miles east of the San Joaquin county line; improve drainage	–	–	23,000	23,000 [j]
	Calaveras	49 7.2/7.4	Between Angels Creek and Pine Street in the City of Angels; remove the excessive crown	–	–	42,100	42,100 [k]
	Colusa	5, 20 15.2/29.9, 20.2/R23.3	On Route 5 from 0.9 mile south of Husted Road south of Williams to 1.1 miles north of Wadleigh Road and on Route 20 from Salt Creek to 0.1 mile east of Husted Road; 4-lane freeway and 2-lane conventional (total estimate $15,000,000; $7,000,000 1970–71 fiscal year and $4,500,000 1971–72 fiscal year)	17.8	–	3,500,000	3,500,000 [p]
	Colusa, Glenn	5 29.6/34.3, 0.0/7.1	0.8 mile north of Wadleigh Road to about 1.5 miles south of Willows; 4-lane freeway (total estimate $6,200,000; $3,500,000 1968–69 fiscal year	11.8	2,700,000	2,700,000	–
	Contra Costa	4 4.4/4.6	Approximately 0.2 mile west of Cummings Skyway; construct a median barrier	–	–	30,000	30,000 [m]
	Contra Costa	4 5.6	In the vicinity of McEwen Road undercrossing; install horizontal drains	–	–	6,500	6,500 [j]
	Contra Costa	4, 84 27.3/30.6, 9.3/11.4	"G" Street to Route 84 and on Route 84, New Route 4 to Antioch Bridge; 4-lane freeway (total estimate $9,200,000; $3,200,000 1970–71 fiscal year)	5.4	4,140,000	6,000,000	1,860,000 [f]
	Contra Costa, Marin	17 6.2/L2.5	Under the expansion gratings on both decks of the Richmond-San Rafael Bridge; install access walkways	–	–	27,208	27,208 [k]
	Contra Costa	24 1.3/9.1	West of Orinda to Route 680; pay BARTD for portion of state's share of freeway improvement and expansion previously financed by BARTD ($3,500,000 to be financed in future budgets)	7.8	2,500,000	2,500,000	–
	Contra Costa	80 6.7/7.2	Between 0.7 mile and 1.2 miles north of Hilltop Drive Overcrossing near Pinole; reconstruct	0.5	–	840,000	840,000 [p]
	Contra Costa	80 7.5	In the vicinity of Appian Way Overcrossing; install horizontal drains	–	–	20,000	20,000 [j]
	Contra Costa	80 8.5/8.6	At Pinole Valley Road Interchange in the City of Pinole; widen and construct channelization	–	–	29,000	29,000 [m, k]
	Contra Costa	680 15.4/15.7	Between 0.2 mile south and 0.1 mile north of North Main Street Overcrossing in the City of Walnut Creek; upgrade the landscaping	0.3	–	40,000	40,000 [v]
	Del Norte	101 23.5/25.3	Between 2.2 miles and 0.4 mile south of the south city limits of Crescent City; widen	1.8	–	93,760	93,760 [l, k]
	Del Norte	199 4.2	At Smith River Bridge No. 1-06 about 7.5 miles east of Crescent City; modify sway bracing	–	–	28,000	28,000 [k]
	El Dorado	49 14.5/14.7	Between 0.3 mile and 0.1 mile east of Route 50 in Placerville; grade, pave and improve drainage	–	–	24,000	24,000 [l, j]

			TOTALS, MAJOR PROJECT ALLOCATIONS		$431,193,000	$492,468,167	$61,275,167

REASONS FOR REVISIONS

[a] Savings—funds in excess of project requirements.
[b] Project or portion of project deferred.
[c] Decrease due to change in scope of work.
[d] Decrease project or portion of project financed from other funds.
[e] Additional funds to cover increases in project costs or to advance construction.
[f] Additional funds required because of revision of design standards or scope of work.
[g] Additional funds required because of low budget estimate or higher construction costs.
[h] Additional project; transfer from prior budget.
[i] Additional project to improve deficient roadway or structure.
[j] Additional project to improve drainage.
[k] Additional project to improve traffic safety or traffic service.
[l] Additional project to relieve traffic congestion.
[m] Additional project to install or revise traffic regulatory or safety devices.
[n] Additional project to repair, replace or remove a deteriorated roadway or structure.
[o] Additional project to restore or reconstruct roadway at slipout.
[p] Additional project for freeway or expressway construction.
[q] Additional project for erosion control and/or restoration.
[r] Additional project to stabilize slide area or remove underground water.
[s] Additional project to place roadway in acceptable condition for relinquishment.
[t] Additional project to construct weighing facilities or loadometer stations.
[u] Additional project to acquire material site or disposal site for use on construction.
[v] Additional project for landscaping.
[w] Additional project to comply with fish and game requirements.
[x] Additional project for archaeological salvages.
[y] Additional project for commemorative markers.
[z] Additional project for roadside rests.

REASONS FOR REVISIONS

[a] Savings—funds in excess of project requirements.
[b] Project or portion of project deferred.
[c] Decrease due to change in scope of work.
[d] Decrease project or portion of project financed from other funds.
[e] Additional funds to cover increases in project costs or to advance construction.
[f] Additional funds required because of revision of design standards or scope of work.
[g] Additional funds required because of low budget estimate or higher construction costs.
[h] Additional project; transfer from prior budget.
[i] Additional project to improve deficient roadway or structure.
[j] Additional project to improve drainage.
[k] Additional project to improve traffic safety or traffic service.
[l] Additional project to relieve traffic congestion.
[m] Additional project to install or revise traffic regulatory or safety devices.
[n] Additional project to repair, replace or remove a deteriorated roadway or structure.
[o] Additional project to restore or reconstruct roadway at slipout.
[p] Additional project for freeway or expressway construction.
[q] Additional project for erosion control and/or restoration.
[r] Additional project to stabilize slide area or remove underground water.
[s] Additional project to place roadway in acceptable condition for relinquishment.
[t] Additional project to construct weighing facilities or loadometer stations.
[u] Additional project to acquire material site or disposal site for use on construction.
[v] Additional project for landscaping.
[w] Additional project to comply with fish and game requirements.
[x] Additional project for archaeological salvages.
[y] Additional project for commemorative markers.
[z] Additional project for roadside rests.

5	County of San Francisco to Route 480 in San Francisco; Route 101 near the southerly end of Marin Peninsula to	
6	Route 101 near Fernbridge via the coast route through Jenner, Westport, and Ferndale	$3,165,674
7	2. Route 1 near Santa Monica to Route 101; Route 101 to Route 138 via the vicinity of Avenue 36 in Los Angeles	
8	and via Glendale and Wrightwood	763,998
9	3. Route 36 near Peanut to Route 299 near Douglas City; Route 299 near Weaverville to Route 5 near Yreka;	
10	Route 5 near Yreka to Montague	505,181
11	4. Route 80 near Hercules to Route 99 near Stockton via north of Concord and via Antioch; Route 99 near Stockton	
12	to Route 49 near Altaville via the vicinity if Copperopolis; Route 49 near Angels Camp to Route 89 near Mount	
13	Bullion via Murphys, Calaveras Big Trees, and Dorrington	1,137,198
14	5. The international boundary near Tijuana to the Oregon state line via National City, San Diego, Los Angeles, a	
15	point on Route 99 south of Bakersfield, the westerly side of the San Joaquin Valley, and via Yreka; also passing	
16	near Santa Ana, Norwalk, Elysian Park in Los Angeles, Glendale, Woodland, and Red Bluff	4,505,645
17	6. Route 395 near Bishop to the Nevada state line near Montgomery Pass	104,208
18	7. Route 1 to Route 210 in Pasadena	434,249
19	8. Route 5 in San Diego to Yuma via El Centro	771,876
20	9. Route 17 near Santa Cruz to Route 17 near Los Gatos via Waterman Gap and Saratoga Gap and along the ridge	
21	between the San Lorenzo and Pescadero Creeks	179,679
22	10. Route 1 in Santa Monica to Route 105 near Soto Street; Route 101 in Los Angeles to the Arizona state line at	
23	the Colorado River via the vicinity of Monterey Park, Pomona, Colton, Indio, and Shaver's Summit, and via Blythe	1,974,576
24	11. San Pedro to Route 248 in Pasadena	801,699
25	12. Route 1 near Valley Ford to Route 121 near Sonoma via Santa Rosa; Route 29 in the vicinity of Napa to Route 80	
26	near Cordelia; Route 80 near Fairfield to Route 84 to Rio Vista; Route 84 near Rio Vista to Route 99 near Lodi;	
27	Route 99 near Lodi to Route 88 near Lockeford; Route 88 near Clements to Route 49 near San Andreas	458,611
28	13. Route 61 near the Oakland International Airport to Route 61 near Emeryville via the vicinity of Lake Temescal	110,896
29	14. Route 1 north of the intersection of Sunset Boulevard northwest of Santa Monica to Route 5 near Tunnel Station;	
30	Route 5 at Los Angeles near Tunnel Station to Route 58; Route 58 to Route 395 near Little Lake via the vicinity	
31	of Antelope Valley	383,699
32	15. Route 10 in San Bernardino to the Nevada state line near Calada via Barstow	747,451
33	16. Route 20 to Route 5 near Woodland via Rumsey and Woodland; Route 5 near Woodland to Sacramento; Route 50	
34	near Perkins to Route 49 near Drytown	304,620
35	17. Route 1 near Santa Cruz to Route 80 in Oakland; Route 80 near Albany to Route 101 near San Rafael via the	
36	Richmond-San Rafael Bridge	2,304,963
37	18. Route 10 near San Bernardino to Route 138 via San Bernardino, Waterman Canyon, Big Bear Lake, Baldwin	
38	Lake and near Victorville	707,872
39	19. Route 1 near Long Beach to Route 164 near Pico Rivera	141,903
40	20. Route 1 near Fort Bragg to Route 101 at Willits; Route 101 to Route 80 near Emigrant Gap via Williams	
41	and Colusa	785,481
42	21. Route 680 at Benicia to Route 80 near Cordelia	42,421
43	22. Route 1 near Long Beach to Route 405; Route 405 to Route 55 near Orange	282,253
44	23. Route 1 near Aliso Canyon to Route 101 near Triunfo; Route 101 near Newbury Park to Route 118; Route 118	
45	to Route 126 near Fillmore	168,007
46	24. Route 17 near Castro Street in Oakland to Route 580; Route 580 in Oakland to Route 680 in Walnut Creek;	
47	Route 680 near Walnut Creek to Route 4 near Pittsburg	521,925
48	25. Route 198 to Route 180 near Paicines	102,446
49	26. Route 4 to Route 99 near Stockton; Route 99 near Stockton to Route 12; Route 12 to West Point via Mokelumne	
50	Hill	143,749
51	27. Route 1 near Topanga Beach to Route 118 at or near Chatsworth	115,818
52	28. Route 89 at Tahoe City along the northern boundary of Lake Tahoe to the Nevada state line at Crystal Bay	146,248
53	29. Route 80 near Vallejo to Route 20 near Upper Lake via the vicinity of Napa, via Calistoga, via Lower Lake,	
54	passing south of Kelseyville and via Lakeport	478,189
55	30. Route 210 near San Dimas via the vicinity of Highland northeasterly to Route 18	288,110
56	31. Route 91 near Corona to Route 15 near Devore passing near Milliken Avenue at its junction with Route 10	52,370
57	32. Route 5 near Orland to Chico; Route 99 near Chico to Route 36 near Deer Creek Meadows	251,357
58	33. Route 101 near Ventura to Route 150; Route 150 to Route 5 near Oilfields via the vicinity of Cuyama Valley and	
59	Maricopa, and via Coalinga; Route 5 to Route 152 via the vicinity of Mendota; Route 152 to Route 140; Route 140	
60	to Route 205 near Tracy	719,719
61	34. Route 1 vetween Point Mugu and the City of Oxnard to Route 118 near Somis	39,504
62	35. Route 17 to Route 92 via Skyline Boulevard; Route 280 via Skyline Boulevard to Route 280 in San Francisco	186,604
63	36. Route 101 near Alton to Route 5 near Red Bluff passing near Forest Glenn and Peanut; Route 5 at Red Bluff to	
64	Route 395 via Mineral, via the vicinity of Morgan and via Susanville; Route 139 north of Susanville to Route 395	
65	near Termo	1,219,279

DIVISION OF BAY TOLL CROSSINGS

TOLL BRIDGE CONSTRUCTION AND REVENUE FUNDS

Toll bridge construction funds consist of proceeds from sale of revenue bonds, the issuance of which is authorized by the California Toll Bridge Authority; and, as in the case of the Vincent Thomas Bridge, such other funds as are provided by statute. Such funds are expended for construction, reconstruction or improvements of toll bridges in accordance with the applicable bond resolutions and/or statutes.

Toll revenue funds consist of toll collections, rents, roadway service collections and interest on investments. Such funds are expended for operating expenses, for debt service, and for improvements not financed by construction funds.

The physical maintenance of all toll bridges is financed from the State Highway Fund pursuant to Section 188.3 of the Streets and Highways Code.

San Francisco-Oakland Bay Bridge

The California Toll Bridge Authority issued $100,000,000 in bonds in January 1966 to finance construction of a rapid transit tube between the City and County of San Francisco and the County of Alameda under provisions of Sections 30770–30782 of the Streets and Highways Code. Additional bond issues may be necessary to complete financing of this project. Section 30778 of the Streets and Highways Code pledged revenues received since February 1, 1966 of the San Francisco-Oakland Bay Bridge, the San Mateo-Hayward Bridge and the Dumbarton Bridge to finance repayment of tube bonds. Revenues of these bridges received between January 1, 1965 and January 31, 1966 were likewise obligated for tube construction costs in accordance with Sections 30770–30782 of the Streets and Highways Code. Revenues received prior to January 1, 1965, are continuing to pay for the cost of alterations and improvements to the bridge authorized by Chapter 2316, Statutes of 1957, and the rehabilitation and improvement of the San Mateo-Hayward Bridge pursuant to Chapter 1784, Statutes of 1959. Revenues prior to January 1, 1965, were also used to pay for a planning study for a Southern Crossing pursuant to Chapter 2138, Statutes of 1959, and Chapter 970, Statutes of 1965, a planning study for alterations or reconstruction of the Dumbarton Bridge pursuant to Chapter 1870, Statutes of 1965, and a planning study for a Marin Crossing pursuant to Chapter 1885, Statutes of 1965. A portion of the cost of planning and design of a proposed Southern Crossing will be financed from this same source of funds pursuant to Item 389.5, Chapter 2, of the Budget Act of 1966. (See Southern Crossing Planning and Design Appropriation.)

The cost of constructing the rapid transit tube including approaches has been estimated as $180,000,000 of which the San Francisco Bay Area Rapid Transit District will repay the state the cost of approaches estimated to be $40,000,000.

Chapter 1341/68 (Section 30792.1 and 30792.2 of the Streets and Highways Code) appropriates up to a total of $1,750,000 from the State Highway Fund for studies and preliminary work necessary in connection with construction of a new Dumbarton Bridge. Funds so expended (with interest) shall be repaid from the first sale of revenue bonds issued for said bridge.

In addition to toll revenues of the San Francisco-Oakland Bay Bridge received prior to January 1, 1965, is the residue of bond proceeds, in a separate fund designated as the San Francisco-Oakland Bay Bridge Construction Fund which is being used for improvements to the San Francisco-Oakland Bay Bridge.

Carquinez Strait Bridges

The Carquinez Strait Bridges comprise the two parallel Carquinez Bridges and the Benicia-Martinez Bridge, and are operated as a unit.

Construction of the additional Carquinez Bridge and improvement of the original bridge were financed by the issuance of $46,000,000 of toll revenue bonds pursuant to a resolution of the California Toll Bridge Authority dated October 4, 1955. Construction of the Benicia-Martinez Bridge was financed by the issuance of $34,000,000 of toll revenue bonds pursuant to a supplemental resolution of the authority dated April 23, 1959.

Carquinez Strait Bridges Series "A" Refunding Toll Revenue Bonds in the amount of $75,000,000 authorized by California Toll Bridge Authority Resolution adopted September 25, 1963, were issued on December 1, 1963. In addition to providing funds to retire the outstanding Series "A" and "B" bonds, the refunding issue provided $10,000,000 to construct a northerly freeway approach from Interstate Route 80 to Cordelia to the Benicia-Martinez Bridge.

Although the construction work on the bridges has been completed for several years, residual bond funds are being held in the Carquinez Strait Bridges Construction Fund to cover several right-of-way contingent liabilities and miscellaneous construction projects.

Vincent Thomas Bridge (formerly named San Pedro-Terminal Island Bridge)

Chapter 74/1958 as amended by Chapter 1961/59 (Sections 30680–30684 of the Streets and Highways Code) authorized the construction of this bridge and provided for its financing. Toll revenue bonds amounting to $5,000,000 were sold pursuant to resolution of the California Toll Bridge Authority dated February 28, 1961, and $16,400,000 were advanced from the Highway Users Tax Fund and the State Highway Fund, as authorized by the statute. Construction is completed and the bridge was opened to traffic on November 15, 1963. On June 1, 1964, $1,400,000 of excess Construction Fund money was returned to the State Highway Fund. The remaining balance in the Construction Fund is reserved for miscellaneous construction work.

Vincent Thomas Bridge Construction

California Toll Bridge Authority Resolution adopted December 17, 1967, authorized the issuance of Vincent Thomas Toll Bridge revenue bonds, Series "A" bonds, in the amount of $7,400,000. Proceeds from this sale of bonds was to provide supplementary funds for the retirement of the San Pedro Terminal Island Toll Bridge Revenue Bonds issued in 1961, on their first redemption date July 1, 1970, and to provide funds for constructing additional approaches and improvements to the existing facilities of the bridge. After providing supplementary funds for retirement of outstanding bonds there was a balance of $5,279,900 which was deposited with the State Treasurer and designated as "Vincent Thomas Bridge Construction Fund" for approaches and improvements of the bridge.

San Diego-Coronado Bridge

Chapter 1697/1955 as amended by Chapter 876/1965 authorized the construction of this bridge and provided for its financing. Toll revenue bonds amounting to $47,600,000 were sold pursuant to resolution of the California Toll Bridge Authority dated November 15, 1966.

All major construction work on the bridge has been completed with the exception of the overhead lighting system. The bridge was opened on August 3, 1969.

Southern Crossing Planning and Design Appropriation

Item 389.5, Chapter 2, Statutes of 1966 appropriates for Planning and Design the following:

a. $3,500,000 from the surplus of the SFOBB Toll Revenue Fund as of January 1, 1965.
b. $3,000,000 from an authorized Revenue Bond Issue.
c. $10,000,000 less the funds available from foregoing a and b, from the State Highway Fund under Streets and Highways Code Section 187.

Planning and design work by the Division of Bay Toll Crossings engineers is being carried out under the $10 million Legislative appropriation. The planning phase is nearing completion and the design work is underway, developing contract plans, specifications, and estimates.

The Toll Revenue Bonds to finance the construction of the bridge are estimated to go on sale sometime in the latter part of 1971. The estimated total cost of the bridge excluding the San Leandro approach will be approximately $285 million.

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

GENERAL ANALYSIS

The Department of Fish and Game is the agency responsible for the protection, propagation, preservation, and investigation of the state's fish and game resources, including ocean fisheries and marine products, for the utilization, general benefit and recreation of the people of California.

In the 1970–71 budget no major capital outlay items are proposed. In 1970–71, $900,000 will be deposited in the Fish and Game Preservation Fund under the provisions of the Federal Anadromous Fish Act. These funds are for the Glenn-Colusa Fish Screen Project and will replace state funds expended in 1969–70.

Minor projects include construction of additional hatchery and rearing ponds, installation of a water treatment system at Crystal Lake Hatchery, construction of a fish screen on the San Joaquin River at El Solyo and the relocation and expansion of the Newell Creek Fish Planting Base. Also proposed are various repair and improvement projects for the hatchery program.

Projected requirements are designed to fulfill the department's responsibilities and include construction of regional offices, replacement of hatchery rearing ponds, and replacement of a boat and aircraft.

The projections for fiscal year 1971–72 through fiscal year 1974–75 are subject to change since they must be related annually to support requirements and Fish and Game Preservation Fund resources.

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS [1]							
Replace radio system	$28,539						
Replace patrol boats and purchase aircraft	474,579 [c]	$15,421 [c]

GENERAL ANALYSIS

The Wildlife Conservation Board is authorized to acquire, restore and maintain in a high state of productivity, areas which can successfully sustain wildlife and provide adequate and suitable recreation for the people of the state. Two programs have been carried out by the board. With the approval by the voters of the State Beach, Park, Recreational, and Historical Facilities Bond Act of 1964, the board was allocated $5,000,000 under this program to be used for acquisition and development of real property. It is administered in addition to their regular program authorized under the Wildlife Conservation Law of 1947. The two programs are shown separately in the discussions below.

WILDLIFE CONSERVATION PROGRAM

Continuation of the acquisition, construction and improvement of wildlife conservation projects is planned. The $9,000,000 appropriated by Chapter 1327, Statutes of 1947, the $3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, and the revenue of $750,000 each fiscal year provided by subsequent legislation such as Chapter 1313, Statutes of 1955, and Chapter 1828, Statutes of 1959, has been or will be allocated to projects by the Wildlife Conservation Board. The budget reflects the actual expenditure for the 1968–69 fiscal year, and the estimated expenditures, based on anticipated allocations by the Wildlife Conservation Board, for fiscal years 1969–70 and 1970–71. Specific projects for 1971–72 through the 1974–75 fiscal years cannot be delineated at this time.

In addition to the Wildlife Conservation Board regular funding, it is expected that federal funds will become available on a 50 percent reimbursable basis, and such funds will be reported annually as received. In fiscal year 1968–69 a total of $95,671 was received.

Responsibility for providing fishing access sites in connection with the State Water Project Aqueduct was delegated to the Wildlife Conservation Board by the 1968 Legislature. The discharge of this responsibility is being included as an extension of the board's fishing access program.

MAJOR PROJECTS [2]

Fish hatchery and stocking projects For construction and equipping of facilities for hatching and stocking.	$68,410	$80,000	$200,000				
Fish habitat development and improvement projects For acquisition and development of warmwater lakes; for reservoir construction or improvements; stream clearance and improvements; stream flow maintenance dams; marine habitat; fish screens; ladder and weir projects.	194,430	164,025	80,000				
Fishing access projects For the preservation and restoration of coastal access; river, stream and bay access; lake, reservoir and Salton Sea access; piers.	657,864	350,000	338,500				
Game habitat and development projects For the preservation and restoration of waterfowl management areas and other wildlife areas.	393,963	143,500	100,000				
Hunting access projects To provide access to popular hunting areas.	91,000	41,000	30,000				
Special projects For project evaluation, land acquisition, and engineering studies of potential projects.	–1,836	1,500	1,500				
Projected requirements	–	–	–	$750,000	$750,000	$750,000	$750,000
Total Expenditures, Wildlife Conservation Program	$1,403,831	$780,025	$750,000	$750,000	$750,000	$750,000	$750,000
Wildlife Restoration Fund	*1,308,160*	*780,025*	*750,000*				
Federal funds—Anadromous Fish Act	*95,671*	–	–				
TOTAL, FIVE-YEAR PROGRAM							$3,750,000

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

WILDLIFE CONSERVATION BOARD—Continued

STATE BEACH, PARK, RECREATIONAL AND HISTORICAL FACILITIES BOND ACT PROGRAM

The $5,000,000 of this 1964 bond act made available to the Wildlife Conservation Board, has been programmed for (1) modernization and expansion of fish hatcheries (2) acquisition of key lands for preservation of wildlife and recreational access, and (3) construction of artificial reefs around piers in southern California.

During the 1968–69 fiscal year, $80,000 was received as a federal reimbursement under the Anandromous Fish Act.

A repayment of $1,066,500 to the Fish and Game Preservation Fund from the State Beach, Park, Recreational and Historical Facilities Fund is reflected in 1970–71. This will return to the Fish and Game Preservation Fund an advance which is being used to construct the Mad River Hatchery. This project is now funded; therefore priority of available State Beach, Park, Recreational and Historical Facilities Fund bond proceeds is being given to projects not yet underway, both state and local. As a consequence the Fish and Game Preservation Fund will not receive repayment before 1970–71.

LINE	WILDLIFE CONSERVATION PROGRAM EXPENDITURES	ACTUAL 1968–69	ESTIMATED 1969–70	PROPOSED 1970–71	PROJECTED 1971–72	PROJECTED 1972–73	1973–74 PROJECTED	PROJECTED 1974–75
13	**MAJOR PROJECTS**							
15	Fish Hatchery Projects:							
16	Fillmore Hatchery	$148,476						
17–18	This project provides for ponds and related work to increase production of trout.							
19	American River Hatchery	2,055						
20–22	This project provided a new modern trout hatchery at Nimbus Dam. It will produce 6,000,000 fingerling trout annually as well as 1,000,000 catchable-size fish.							
23	Mad River Hatchery	–	–	$1,066,500				
24–26	This project will provide a new hatchery to produce 1,000,000 salmon and steelhead trout yearlings and 5,000,000 fingerling king salmon annually.							
27	Bishop Creek Hatchery (Owens Valley)	2,437						
28–30	Preliminary studies and site surveys for this hatchery have not borne out the feasibility of its construction at this site.							
31	Imperial Valley Warmwater Hatchery	–	$1,181,349					
32–36	The fishing pressure in heavily-populated Southern California has been steadily increasing over the years. This project will provide a new hatchery to produce catchable-size half-pound channel catfish for stocking in Southern California reservoirs and lakes.							
37	Game Habitat and Wildlife Area Projects:							
38	Mojave River Wildlife Area	3,247	15,260					
39	This project will provide a fishing and wildlife area primarily for public recreational use with a hatchery site to be retained for Department of Fish and Game use if required.	763,000

TOTAL, FIVE-YEAR PROGRAM							$2,518,450

GENERAL ANALYSIS

Program and Objectives

The Department of Navigation and Ocean Development is authorized to prepare plans for, and acquire, construct, develop and improve, small craft harbors, facilities in connection therewith, and connecting waterways. The department may also make loans and grants to local agencies for these purposes. To date the department has encouraged the development of small craft harbors and boating facilities through its loan and grant programs. The department has also relied upon federal participation in these projects.

The current year projects represent a capital outlay approach to meeting the boating facility deficiencies. The department is undertaking the planning of two harbor of refuge projects.

The budget year and subsequent years represent the shifting of capital outlay responsibility for planning and development of boating facilities from the Department of Parks and Recreation as provided in the Governor's Reorganization Plan No. 2 of 1969. Projected requirements reflect only the continuation of the funding level previously available to the Department of Parks and Recreation under provisions of Section 85.2 of the Harbors and Navigation Code.

MAJOR PROJECTS [1]							
Coxo Harbor	–	$240,000 [P]	–				
Investigation and project planning prior to construction of a harbor of refuge in Coxo Bay, 1 mile east of Point Conception.							
Fort Bragg area	–	45,000 [P]					
Preliminary investigation to determine a suitable location in the Fort Bragg vicinity for a harbor of refuge.							
Castaic Reservoir	–	–	$100,000 [C]				
Boating and parking facilities development.							
Mokelumne River Berms	–	–	25,500 [L]				
Acquisition of three Mokelumne River islands, 16.7 acres, for development as anchorages for delta boaters.							
Silverwood Lake	–	–	247,535 [C]				
Boating facility development.							
Projected requirements	–	–	–	$400,000	$400,000	$400,000	$400,000
Totals, Major Projects	–	$285,000	$373,035	$400,000	$400,000	$400,000	$400,000
MINOR PROJECTS [1]							
Oroville Reservoir State Recreation Area:							
Floating sanitary and emergency call station	–	–	$25,000				
Shoreline facility for removing waste	–	–	15,000				
Repayment of prior construction costs of Department of Water Resources	–	–	44,415 [C]				
San Luis Reservoir State Recreation Area—Boat launching area parking lot	–	–	61,000				
Projected requirements	–	–	–	$100,000	$100,000	$100,000	$100,000
Totals, Minor Projects	–	–	$145,415	$100,000	$100,000	$100,000	$100,000
TOTAL EXPENDITURES, CAPITAL OUTLAY *(Harbors and Watercraft Revolving Fund)*	–	$285,000	$518,450	$500,000	$500,000	$500,000	$500,000
TOTAL, FIVE-YEAR PROGRAM							$2,518,450

RECONCILIATION WITH APPROPRIATIONS

Harbors and Watercraft Revolving Fund

APPROPRIATIONS			
Budget Act appropriation (Major projects)	$285,000	–	$373,035
Budget Act appropriation (Minor projects)	–	–	145,415
Prior Year Balances Available:			
Budget Act of 1968, Item 357	–	$285,000	–
Total Available	$285,000	$285,000	$518,450
Balance available in subsequent years	–285,000	–	–
TOTAL EXPENDITURES	–	$285,000	$518,450

GENERAL ANALYSIS

Program and Objectives

The Department of Parks and Recreation, under policy direction from the State Park and Recreation Commission, is responsible for the acquisition, development, and operation of the state park system. A number of units of this system are operated under agreement by other governmental agencies. The three essential objectives of the department in administering the state park system are to make the necessary plans, investigations, and surveys which will enable them to acquire and develop areas of statewide importance.

Department proposals for the acquisition of additional state park property and for the development of recreational facilities are the product of the Statewide Recreation Planning program, which considers both the demand for outdoor recreation facilities and the supply. The program identifies the general recreation needs throughout the state, regardless of particular source of supply, that is, state, local, private, or federal.

Within the framework established by the Statewide Recreation Planning program a State Park System Plan has been developed which provides 5-year and 20-year projections, project priorities, and project development requirements. Pursuant to this, specific project plans can be prepared that lead directly to proposals for acquisition and development of units to be added to the State Park System. Once a unit is established as part of the State Park System, capital outlay expenditures for maintenance and upkeep are necessary.

Budget Year Discussion

This budget proposes expenditures of $4,183,122 for the purpose of providing the essential planning and development funds to meet the needs of the State Park System for the 1970–71 fiscal year.

Projects eligible for funding out of the State Beach, Park, Recreational and Historical Facilities Fund have been deferred for one year. Many projects, for which appropriations were made in prior years, have not been accomplished due to the inability to sell bonds. Proceeds from future sale of bonds will be used to fund these projects on a priority basis. The budget does, however, include project planning funds necessary to continue the planning for bond fund projects.

Major construction costs include development of day use and camping facilities at San Clemente State Beach, sewage treatment facilities at Silverwood Lake, maintenance at Hearst San Simeon State Historic Monument and the payment for work on recreational facilities at Oroville Reservoir accomplished by the Department of Water Resources. Minor construction projects are also proposed for a number of units within the State Park System.

Capital Outlay projects proposed for funding out of the Harbors and Watercraft Revolving Fund are included in the budget of the Department of Navigation and Ocean Development. The Department of Navigation and Ocean Development will be responsible for the planning, design and development of boating facilities as provided in the Governor's Reorganization Plan Number 2 of 1969.

Projected Requirements

The last four years of the five-year building program are the agency's current estimate of need and do not represent a program approved by the administration.

MAJOR PROJECTS							
Angel Island State Park	–	–	–	$1,000,000 [C]	$700,000 [C]	$600,000 [C]	
General Fund	$51 [C]						
Harbors and Watercraft Revolving Fund	271,000 [C]						
The past year amounts provide for area restoration, water system survey, pier replacement, and dredging of Ayala Cove. Projected years are for continuing development.							
Anza-Borrego Desert State Park—inholding acquisitions	–103,650 [L]	–	–	500,000 [L]	500,000 [L]	500,000 [L]	$500,000 [L]
Austin Creek State Recreation Area—continuing development	–	–	–	–	400,000 [C]	315,000 [C]	
Avila State Beach—sanitary facilities	65,000 [C]						
Beach property—acquisition	–	–	–	–	–	5,100,000 [L]	
Benicia Capitol State Historical Monument	–	–	–	–	100,000 [C]		
Big Basin Redwoods State Park	–	–	–	–	2,000,000 [L]		
Bolsa Chica State Beach—beach erosion	–	$86,625 [C]	–	700,000 [C]			
Bothe-Napa Valley—inholding acquisition	–	–	–	–	375,000 [L]		
Brannan Island—continuing development							
Butano State Park—continuing development	–	386,700 [C]					
Capitola State Beach—groin construction	–	146,100 [C]					
Carlsbad Beach—initial development	–	–	–	1,000,000 [C]			
Carpinteria State Beach	727,433 [C]	1,432,767 [C]					
The past and current year funds provided for continued development.							
Castaic Reservoir	–	–	–	–	–	1,000,000 [C]	
General Fund	–23 [C]	2,372,500 [C]	–				
Harbors and Watercraft Revolving Fund	–	163,600 [C]					
Past and current year funds provided for continued development.							
Clear Lake State Park	–	–	–	47,000 [L]			
				500,000 [C]			
General Fund	119,275 [C]	4,555 [C]					
Harbors and Watercraft Revolving Fund	125,000 [C]						
Continued boating facility development. Projected funds for inholding acquisition and completion of development.							
Coastal Dunes—acquisition	–	–	–	–	6,000,000 [L]		
Columbia State Historic Park	53,909 [C]	–	–	100,000 [C]	500,000 [C]	100,000 [C]	
The past and projected year amounts provide for continuing historic building restoration and land acquisition.				130,000 [L]			
Cuyamaca Rancho State Park—continuing development	–	–	$60,000 [W]	590,000 [C]			
Del Norte Coast Redwoods State Park	75,217 [C]						
The past year amount provided for the completion of necessary facilities and access road.							
Del Valle Reservoir	–	–	–	400,000 [C]	1,000,000 [C]		
Harbors and Watercraft Revolving Fund	–	188,950 [C]					
Current year funds for boating facility development. Projected amounts are for initial and continuing development.							
Doheny State Beach—continuing development	546,450 [C]	146,550 [C]					
El Castillo Project—acquisition	–	–	–	115,000 [L]			
Folsom Lake State Recreation Area							
Harbors and Watercraft Revolving Fund	–	595,800 [C]					
The current year amount provides for development at Brown's Ravine Marina.							
Fort Humboldt State Historical Monument—continuing acquisition and development	–	–	–	27,000 [L]	110,000 [C]	500,000 [C]	
Fort Ross State Historic Park	–	75,000 [C]	–	619,000 [L]			
Entrance road and parking, continuing reconstruction and acquisition.				300,000 [C]			
Grizzly Valley Reservoir	–600 [C]	100,000 [C]					
The current year amount provides for access road.							
Hearst San Simeon State Historical Monument—restoration of artifacts	–	50,000 [C]	–	75,000 [C]			
Continuing program of restoration and rehabilitation	–	–	100,000 [C]	100,000 [C]			
Henry Cowell Redwoods State Park—continuing development	–	–	–	200,000 [C]			
Humboldt Redwoods State Park	1,079 [C]	–	–	625,000 [L]	375,000 [L]	750,000 [L]	750,000 [L]
The past year amount provides for restoration, erosion control, and bank protection. Projected amounts are for inholding acquisitions.

Silverwood Lake *(General Fund)*	–	–	200,000 C	1,402,000 C	1,200,000 C		
Budget year amount is for proportional share of the effluent outfall line. The projected amount for 1971–72 includes the proportional amount for the sewer treatment plant and pump station. Projected amounts for continuing development.							
Sonoma Coast State Beach	523,000 C						
The past year amount provided for the construction of 50 picnic units and a 150-car parking area at Bodega Bay.							
Sonoma State Historic Park—continuing acquisition and development	–	–	–	–	100,000 C	100,000 C	325,000 C
Trinidad State Beach—continuing development	–	–	–	–	–	1,000,000 C	
Wayside Parks							
Orestimba Wayside	18,096 L	4,004 L					
DEFERRED MAINTENANCE	52,196 C						
This amount provided for deferred maintenance on state park facilities. This includes repairs to public use facilities that have suffered physical depreciation beyond the reach of normal maintenance.							
EXPORT OF SEWAGE FROM LAKE TAHOE AND DONNER LAKE BASINS	–	2,000,000 C					
To provide for exporting all domestic sewage from the state parks within the Lake Tahoe and Donner Lake Basins.							
IMMEDIATE PUBLIC USE	237,129 C						
This provided for the immediate construction of temporary public use facilities which allow interim use of newly acquired park units during the time necessary for planning, budgeting, and constructing permanent facilities.							
RESERVOIR RECREATION DEVELOPMENT PLANNING STATE WATER FACILITIES	142,681 P	110,991 P					
The amounts provide for continuation of preliminary and development planning for state water project recreational facilities pursuant to the provisions of the Davis-Dolwig Act.							
OPPORTUNITY PURCHASE	243,804 L	283,105 L	–	150,000 L	150,000 L	150,000 L	150,000 L
Throughout the year various parcels of land which are critical to the State Park System become available at favorable prices. This item provides funds to take advantage of these opportunities.							
LAND EXCHANGE	–	199,325 L					
This provides for completion of an exchange of state lands in Antelope, Frenchman, and Lake Davis Reservoirs for U.S. Forest Service lands in Squaw Valley State Recreation Area and Plumas-Eureka State Park.							

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

42	The funded acquisition project provides for a portion of							
43	the acquisition of a 17-mile-long river complex, mul-							
44	tiple-use recreation area which services the San Jose-							
45	San Francisco Metropolitan area. A critical need to be							
46	met in this project is the enroute camping for the							
47	intrastate and the interstate traveler.							
48	Delta Meadows Project	–	–	–	250,000 C	250,000 C		
49	*State Beach, Park, Recreational and Historical Facili-*							
50	*ties Fund*	–	320,000 L					
51	The funded acquisition project will provide 1,265 acres of							
52	an outstanding example of original delta landscape, in-							
53	cluding 14 miles of waterways. Public use facilities							
54	proposed are 245 camp units, 210 picnic units, 280							
55	additional parking spaces, 1.5 miles of nature trails							
56	and nine miles of bicycle and hiking trails.							
57	Drum Barracks Project							
58	*State Beach, Park, Recreational and Historical Facili-*							
59	*ties Fund*	–178 L	20,206 L					
60	The acquisition provides for a significant historic building							
61	which figures prominently in California history. This							
62	building represents the highly explosive Civil War era							
63	of California. Federal troops stationed at the barracks							
64	were a vital factor in keeping southern California in							
65	the Union.							

El Presidio de Santa Barbara						
State Beach, Park, Recreational and Historical Facilities Fund	–	450,000 [L]				
The acquisition provides for the addition of three parcels on each side of two parcels held in trust within approved acquisition boundary.						
Emma Wood State Beach	–	–	–	–	–	2,100,000 [C]
State Beach, Park, Recreational and Historical Facilities Fund	–	1,425,000 [L]	–	450,000 [C]		
The current acquisition will add 32 (+ –) acres and 4,000 feet of ocean front to the existing park. Budget year and projected amounts are for continuing development.						
Gaviota-Refugio Complex—Expansion						
State Beach, Park, Recreational and Historical Facilities Fund	1,637,803 [L]					
The project provided for a coordinated acquisition plan at the Gaviota-Refugio State Beach area.						
Refugio State Beach—Day use, overnight and beach development	–	–	–	800,000 [C]	500,000 [C]	
Water supply system	–	225,200 [C]				
Humboldt Redwoods—acquisition						
State Beach, Park, Recreational and Historical Facilities Fund	4,903 [L]					
Malibu Lagoon State Beach—additions	–	–	–	–	850,000 [C]	
State Beach, Park, Recreational and Historical Facilities Fund	–	–	–	550,000 [C]		
Parking structure and day use facilities						
Mitchell Caverns State Reserve—expansion						
State Beach, Park, Recreational and Historical Facilities Fund	–	18,650 [L]				
The funded acquisition project provides for 6,400 acres of extremely scenic and usable "high desert" land in the Providence Mountains.						
Montgomery Woods State Reserve—expansion						
State Beach, Park, Recreational and Historical Facilities Fund	–	65,500 [L]				
The funded acquisition provides for a proper and safe access into the existing reserve. It will also provide for multiple use recreation facilities and will make a complete operational unit of the existing park area. Projected development includes parking and picnicking facilities and campsites.						
Mount Tamalpais State Park—expansion						
State Beach, Park, Recreational and Historical Facilities Fund	136,161 [L]					
The funded acquisition provided for needed recreation land brought about by the demand pressures generated within the San Francisco Bay metropolitan area. Projected development includes camping and picnicking facilities, parking, service area and access.						
Old River Island Project						
State Beach, Park, Recreational and Historical Facilities Fund	–	525,000 [L]				
The funded acquisition provides for a river-oriented recreation area in a part of the state where existing facilities are lacking and where the need is high. The 980 acres of land and nine miles of waterways will provide an exceptional amount of multiple use recreation for the citizens of the state.						

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

5								
6	Old Sacramento State Historic Park Project	–	–	–	–	131,750 L		
7						500,000 C		
8	*State Beach, Park, Recreational and Historical Facilities Fund*	58,000 L	369,971 L	–	250,000 C			
9		347,931 C	27,069 C					
10	*Motor Vehicle Transportation Tax Fund*	431,000 C	78 C					
11	This project provides for the preservation, rehabilitation and reconstruction of buildings within the historic area of Sacramento that are of historic importance. The number and condition of the existing buildings afford an unusual opportunity of establishing an authentic historic scene. This proposed project is for initial restoration and reconstruction of historic buildings in the project area. The initial phase will include structural stabilization of the Dingley Spice Mill, area clearing with safety barricade erection in the demolition zone, parking area development, planning for the Hasting's Building, and general area architectural, archeological, and historical planning.							
12	Pfeiffer Big Sur State Park—additions	–	–	–	1,000,000 C			
13	*State Beach, Park, Recreational and Historical Facilities Fund*	1,025,344 L	191,043 L					
14	The funded acquisition project will provide for an addition of 2,140.3 acres to the existing park. This will provide 400 additional camp units, 290 picnic units, 5 group camps, and room for a large concessions area. Besides the upland area with its 2.5 miles of stream, three miles of ocean shoreline will be acquired by this project.							
15	Molera property—initial development							
16	Picacho State Recreation Area—expansion	–	–	–	400,000 L			
17	*State Beach, Park, Recreational and Historical Facilities Fund*	63,950 L						
18	The funded acquisition project provides for 12,162 acres of prime recreation land bordering on the Colorado River. This area extends three miles along the river and affords exceptional opportunities for multiple-use recreation in an area where the demand is high and the supply is low.							
19	Point Mugu Project	–	–	–	–	500,000 C		
20	*State Beach, Park, Recreational and Historical Facilities Fund*	–	2,927,150 C	–	4,000,000 C			
21	*General Fund*	1,400,000 L	370,000 L					
22		–	246,550 C					
23	The funded acquisition project will provide upland recreation as well as beach-associated activities on the 7,350 acres to be acquired. 22,000 lineal feet of ocean shoreline will also be acquired. At maximum development there will be 2,330 camp units, 800 picnic units, and beach parking for 3,000 cars. Funded initial development will provide 450 campsites, 300 picnic units and related facilities. The projected work will provide additional facilities.							
24	Salt Point Project							
25	*State Beach, Park, Recreational and Historical Facilities Fund*	126,139 L	–1,421					
26	This project includes the 3,000 acre Salt Point Ranch and 50 acres surrounding Stump Beach; with adjacent Kruse Rhododendron Reserve the unit will total 3,367 acres. This acquisition includes outstanding examples of rocky northern shoreline (3.75 miles of ocean front-							

age) with accompanying wooded upland area.

San Diego "Old Town"	–	–	–	500,000 [c]	
State Beach, Park, Recreational and Historical Facilities Fund	133,054 [c]	250,995 [c]			
General Fund	316,617 [c]	33,383 [c]			
This funded acquisition project provides for the purchase of approximately 19.2 acres of land together with existing buildings within the City of San Diego. This area is representative of the Mexican-American transition in American history. The City and County of San Diego will participate in the development of this project as a typical town of this early California period. The proposed project is for initial restoration and reconstruction of historic buildings in the project area. The initial phase will include complete restoration of the Stewart House, partial restoration of the Estudillo House, research and planning for buildings of the Mexican period, and commencement of a general interpretative program.					
Historic building, restoration, access, parking and sanitary facilities.					
San Onofre—initial development	–	–	–	3,000,000 [c]	
Santa Monica Mountains Project	–	–	–	1,200,000 [c]	700,000 [c]
State Beach, Park, Recreational and Historical Facilities Fund	1,064,284 [L]	4,662,071 [L]			
The funded acquisition project provides for approximately 1,450 acres of land on the western boundary of the City of Los Angeles. It will provide open space and recreation facilities for the public in this region.					
Sugar Pine Point State Park	–	–	–	650,000 [c]	
State Beach, Park, Recreational and Historical Facilities Fund	760,208 [c]	992,094 [c]			
General Fund	70,550 [c]				
The acquisition of this project provided for a park of 1,975 acres and 7,700 feet of shoreline along Lake Tahoe. Public facilities planned for this area include 1,200 camp units, 500 picnic units, 10 group camps and a 300-car beach parking area. The funded initial development will provide 100 campsites, 100 picnic units and related facilities.					
Phase II—Access, sanitary, utility and safety facilities.					
Topanga Canyon Beach Project					
State Beach, Park, Recreational and Historical Facilities Fund	–	–	–	–	1,500,000 [c]
Initial development.					
Torrey Pines State Reserve					
State Beach, Park, Recreational and Historical Facilities Fund	–	900,000 [L]			
This acquisition project will comprise an area of 180 acres. In addition to preservation of additional groves of scarce torrey pines, the project will help to meet the deficit in recreation facilities near two large southern California population centers. Eventual development will include picnic units, day-use parking, and hiking and nature study trails. Expenditure of these funds by the state is contingent on an agreement with a local organization which provides for contributions to assure a project that conforms to the department's February 1966 project report.					

For the list of standard (lettered) footnotes, see the end of the Capital Outlay section of the budget.

CALIFORNIA WATER DEVELOPMENT PROGRAM

The Capital Outlay Budget presents a summary of expenditures for the California Water Development Program and special projects. A general explanation of the state projects under the California Water Development Program is presented in the Support Budget beginning on page 1090 with a description of the significant units of each project as well as detailed expenditure information.

California Water Facilities and Special Projects

The major portion of the California Water Development Program involves design, right-of-way acquisition, and construction for the following major features of the State Water Project:

1. Upper Feather River Basin reservoirs.
2. Oroville Dam and related facilities.
3. Delta water facilities, which will provide for transporting water around the Delta to the state and federal pumping plants in the southern Delta.
4. North Bay Aqueduct, which will serve Napa and Sonoma Counties.
5. South Bay Aqueduct, which will serve Alameda and Santa Clara Counties.
6. California Aqueduct, which serves the areas from the Sacramento-San Joaquin Delta to southern California. Near the midpoint between the Delta and the Tehachapi pumping plant is the joint federal-state San Luis Dam and Reservoir.

The Tehachapi-West Branch Crossing will convey water from the valley floor to the southside of the Tehachapi Mountains and into the Tehachapi Afterbay to Castaic Reservoir, near the town of Castaic.

The Mojave Division and Santa Ana facilities will transport water from the Tehachapi Afterbay to Perris Reservoir in Riverside County.

The coastal branch conveys water from the California Aqueduct near Avenal to a terminus near the town of Santa Maria.

Other expenditures under the California Water Development Program relate to advanced planning for authorized projects, including operation studies, the operation and maintenance of existing facilities, and the Davis-Grunsky program.

The inability to market general obligation bonds at the 5 percent statutory maximum interest rate has complicated the State Water Project fiscal picture. In order to insure no interruption in the project before June 1970 when the people vote on the proposition to increase the statutory interest limit to 7 percent, a General Fund loan commitment up to $100,000,000 as required has been made. Repayment of this loan, plus interest, will be made out of initial sales of water development bonds.

MAJOR PROJECTS

Department Cost (For Detail See Program Expenditures Detail Section of Budget):							
State water project planning and investigations	$2,543,265	$2,457,929	$2,309,350	$2,935,000	$2,770,000	$2,315,000	$1,609,000

Sacramento-San Joaquin River Drainage Basin Projects—Reclamation Board

Through the State Reclamation Board, the state cooperates with the federal government in the construction of flood control projects in the Sacramento-San Joaquin River drainage basin. The extent of the state participation is determined by the several acts adopting and approving specific projects and for which appropriations to meet the state's cost are made as necessary. Generally, such participation consists of the acquisition of rights-of-way, easements, and flowage rights; the cost of replacement or relocation of permanent improvements as necessitated by the construction of flood control works; and the enforcement of sound maintenance practices and standards over the completed works.

Flood control activities of the board were assigned to the Department of Water Resources in 1969–70. Expenditures for that year are therefore split between the Reclamation Board (see program budget page 1164) and the Department of Water Resources (see program budget page 1126). In 1970–71 proposed expenditures are shown on page 1126 of the Department of Water Resources' program budget.

SUPPLEMENT FOR DISTRICT, COUNTY, AND CITRUS FRUIT FAIRS 1970-71

Submitted by

RONALD REAGAN

Governor

to the

CALIFORNIA LEGISLATURE

1970 Regular Session

District, County and Citrus Fruit Fairs

INTRODUCTION

Presented in this supplement to the Budget document proper are the complete and detailed data on expenditures for district agricultural association, county and citrus fruit fairs. Summary schedules of state support, capital outlay and local assistance expenditures for the state's fair program with some written explanation and appropriation history also appear in the appropriate sections of the main Budget document. Like other supplements to the Budget document, this volume has been prepared in order to reduce the quantity of detail in that document and to simplify the mechanics of Budget preparation and printing.

The Budgets for the California State Fair and Exposition, the California State Exposition and Fair Executive Committee and California Museum of Science and Industry do not appear in this supplement, but are printed in their entirety in the main Budget. The California Museum of Science and Industry was transferred from the Department of Agriculture to the Department of Commerce. The Budgets of the remaining 76 fairs are summarized with program explanation and interpretation on the following pages. The material is organized with the district agricultural associations in numerical order followed by the county fairs in alphabetical order with the 2 citrus fruit fairs ending the presentation.

Fair Program

The District, County and Citrus Fruit Fair Program consists of 50 district fairs, 24 county fairs, and 2 citrus fruit fairs. The fair season extends from February to November. The sites of these 76 institutions are located in 54 of the 58 counties.

The fairs are established for the purpose of holding fairs, expositions and exhibitions of all of the industries and industrial enterprises, resources, and products in the state with the purpose of improving, exploiting, encouraging, and stimulating such production. All-year use of fairgrounds for community gatherings, recreational activities, cultural events, conventions, livestock sales, 4-H and Future Farmer meetings, sports events, school sessions, farm labor camps, and disaster relief use are encouraged. These uses are continually increasing.

In an effort to improve the fair program, the Division of Fairs and Expositions in the Department of Agriculture cooperates in the conduct of schools of instruction for managers and directors; holds annual meetings with Future Farmers and 4-H officials and with representatives of breed associations and exhibitors groups to revise rules and regulations in the Master Premium List which details amounts that can be paid for many classes and types of exhibits.

Supervision of Fairs

The Department of Agriculture, through its Division of Fairs and Expositions, supervises the activities of 73 of the 74 district and county fairs. The Los Angeles County Fair, as well as the 2 citrus fruit fairs, do not come within the supervisory jurisdiction of the department.

The financial transactions of all of the fairs are reviewed by the Audits Division, Department of Finance. This review usually consists of reviewing premium awards before payment and a financial review of the fairs records.

District fairs are administered by district agricultural associations which are state agencies. Each association is governed by a board of 9 directors appointed by the Governor for terms of 4 years.

District Fairs

The boundaries of the 50 districts are established by Sections 3851 to 3902, inclusive, of the Agricultural Code. The powers, duties and responsibilities of the boards are contained in Division 3 of the Agricultural Code. The associations are also governed by other laws, rules and regulations that apply to state agencies generally.

The districts conduct annual fairs which attracted about 3¾ million persons during 1968. The fairgrounds are used for a variety of purposes during the nonfair period serving about 7 million people in 1968.

Each of the fairs employs a full-time manager and such other employees as may be required. Most fair employees are used only for a limited time during preparation of the annual fair.

County Fairs

The majority of the county fairs are conducted by nonprofit associations acting as agents of the respective boards of supervisors under the provisions of Section 25905 or 25906 of the Government Code. In a few cases, the fairs are conducted directly by the county.

The reported attendance at the 24 county fairs was over 3 million for 1968. The fairgrounds are also used extensively during the nonfair period, serving more than three million people in 1968.

Citrus Fruit Fairs

Sections 4601 to 4704, inclusive, of the Agricultural Code and Section 19626 of the Business and Professions Code define the requirements that must be met to qualify for financial assistance. The National Orange Show and the Cloverdale Citrus Fair are the 2 nonprofit corporations that meet these legal requirements.

These fairs reported their 1968 combined attendance to be about 500,000. Facilities of these fairs are used extensively during the nonfair period, serving just under 500,000 during 1968.

Financing of the Fair Program

Fair activities are financed by state appropriations, contributions from other governmental sources, donations, and revenues produced from the fairs' use of their facilities.

Business and Professions Code Sections 19622, 19626, 19627, and 19630 appropriate a part of the Fair and Exposition Fund revenues for the fairs.

Business and Professions Code Section 19622 makes annual appropriations to the following four agencies:

Support of the California State Exposition and Fair	$265,000
Support of the Los Angeles County Fair	250,000
Support of the 1-A District Agricultural Association	250,000
Support of the 48th District Agricultural Association	125,000

Section 19626 provides that 5 percent, but not more than $180,000, of the balance remaining in the fund after deducting certain appropriations shall, subject to statutory limitations, be paid to citrus fruit fairs. Section 19627 provides that 40 percent but not more than $4,680,000, of the first balance shall, subject to statutory limitations, be apportioned for encouragement of county and district agricultural fairs under the provisions of Section 4401 of the Agricultural Code.

Business and Professions Code Section 19630 appropriates $2,250,000 annually from the remaining balance of the Fair and Exposition Fund for capital outlay purposes at county, district, and citrus fruit fairs. These funds are allocated by the director of Agriculture upon approval of the State Public Works Board. The California State Exposition and Fair, the Museum of Science and Industry, the 1-A and the 48th District Agricultural Associations and the Los Angeles County Fair are not eligible to receive allocations from this appropriation.

The funds allocated for the encouragement of district and county agricultural fairs under the provisions of Section 4401 of the Agricultural Code and Section 19627 of the Business and Professions Code are apportioned on the basis of premiums paid. The maximum amount which may be apportioned to any one fair during any fiscal year is limited to the amount required on the basis of need as determined by the Department of Agriculture, but not to exceed $65,000. Funds apportioned under the provisions of Section 4401 of the Agricultural Code and Section 19627 of the Business and Professions Code are distributed to the fairs monthly from current revenue paid into the Fair and Exposition Fund.

The fairs which expect to receive allocations under the provisions of Section 4401 of the Agricultural Code submit their proposed premium lists for review by the Division of Fairs and Expositions before the premium lists are printed. The proposed premium lists are reviewed to determine whether they comply with the Master Premium List and to determine the suitability of the proposed offerings for the individual fair.

The detailed budgets of the fairs on the following pages reflect the reductions made by the Budget Acts.

These budgets cannot be readily compared to the summary expenditure statements since they reflect expenditure of nontreasury funds and most of these budgets are presented on a calendar year basis.

The following is a summary of the total state allocations for the district, county and citrus fairs program with page references to the budget document proper:

	1968–69	*1969–70*	*1970–71*
District Agricultural Associations:			
Current expense (See page 157, Support Budget)	$2,999,970	$3,058,000	$3,157,500
Capital Outlay (See page 202, Capital Outlay Budget)	1,395,427	3,083,856	1,191,700
Totals	$4,395,397	$6,141,856	$4,349,200
County and Citrus Fruit Fairs:			
Current expense (See page 159, Support Budget)	$1,605,600	$1,731,100	$1,750,000
Capital Outlay (See page 159, Support Budget)	751,395	1,417,800	783,300
Totals	$2,356,995	$3,148,900	$2,533,300
TOTAL EXPENDITURES, ALL FAIRS	$6,752,392	$9,290,756	$6,882,500
General Fund	*–183,921*	*–100,000*	*–275,000*
Fair and Exposition Fund	*6,936,313*	*9,390,756*	*7,157,500*

Following the fund condition summary, budget detail is arranged into two sections on the following pages. Fund conditions of each fair appear in the first section which begins on page 1 and capital outlay projects appear in the Fair Construction Program Section which begins on page 77. Distribution of Fair and Exposition Fund Revenues appears on page 86.

SUMMARY OF FUND CONDITIONS—DISTRICT, COUNTY, AND CITRUS FRUIT FAIRS

2nd DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the San Joaquin County Fair)

GENERAL ANALYSIS

The association was formed in 1922 and has sponsored the San Joaquin County Fair since 1936. Prior to that time, the history of the fair is traceable back to 1860. The fairgrounds site consists of 189 acres located in the City of Stockton. The County of San Joaquin gift-deeded approximately 70 acres of this to the state. Racing with parimutuel wagering has been a continuing feature of the fair. The 1969 fair was conducted from August 13th to August 23rd. Thirteen thousand eight hundred seventy-two exhibits entered by 2,474 exhibitors were judged at the fair. The 1970 fair dates are August 12th to August 24th.

22nd DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Southern California Exposition at Del Mar)

GENERAL ANALYSIS

The present activities of the 22nd District Agricultural Association date from 1933. Annual shows are conducted on the association's fairgrounds located at Del Mar consisting of general livestock and other exhibits and a national horse show.

The district leases its facilities for commercial horseracing purposes.

Section 4155 of the Agricultural Code provides that up to $250,000 of the horseracing rental revenue shall be available each year for support of the district's annual fair. Funds in excess of this are to be held by the district for the preparation and carrying out of a master capital outlay plan as approved by the State Race Track Leasing Commission.

The 1969 fair was conducted from June 25th to July 6th. Twenty thousand nine hundred seventy-one exhibits entered by 5,405 exhibitors were judged at the fair. The 1970 fair is to be held June 24th to July 5th.

34th DISTRICT AGRICULTURAL ASSOCIATION

(Conducting the Modoc County Fair at Cedarville)

GENERAL ANALYSIS

Present activities of the association date from 1938. Annual fairs are conducted on property leased from the County of Modoc for $1 a year and a small parcel of land owned by the association located in the City of Cedarville. Lease and options expire in 1990. The 1969 fair was held from August 22nd to August 24th and consisted of general livestock and other exhibits. Four thousand and forty exhibits entered by 494 exhibitors were judged at the fair. The 1970 dates are August 28th to August 30th.

This fair charges no admission to the grounds.

Present activities of the fair date from 1937. Annual fairs are held on county fairgrounds, located in the City of Placerville and known as Bennett Memorial Park, under a contract with the El Dorado County Fair Association under the provisions of Government Code Section 25905. The 1969 fair was conducted from August 14th to August 17th and consisted of general livestock and other exhibits. Two thousand two hundred and four exhibits entered by 666 exhibitors were judged at the fair. The 1970 fair dates are July 16th to July 19th.

HUMBOLDT COUNTY FAIR

(Conducting the Humboldt County Fair at Ferndale)

GENERAL ANALYSIS

The fair is conducted by the Humboldt County Fair Association under an agreement with Humboldt County. The directors of the association are elected from the membership of the association which was founded in 1897 and which has assisted or conducted county fairs each year since that time with the exception of the war-years period. Annual fairs are conducted at the county fairgrounds located in the City of Ferndale. The 1969 fair was conducted from August 2nd to 9th and featured general livestock and other exhibits with particular emphasis on dairy cattle and sheep. Five thousand three hundred fifty-six exhibits entered by 1,512 exhibitors were judged at the fair. The 1970 fair dates are August 1st to August 8th. For many years a feature of the show has been horseracing and pari-mutuel wagering.

LOS ANGELES COUNTY FAIR

(Conducting the Los Angeles County Fair at Pomona)

GENERAL ANALYSIS

The fair is conducted by the Los Angeles County Fair Association under an agreement with Los Angeles County under the provisions of Government Code, Section 25906. The Los Angeles County Fair Association was incorporated as a nonprofit corporation in 1940 and succeeded to the Los Angeles County Fair, a nonprofit stock corporation, at that time. Los Angeles County receives allocations for conducting the fair under the provisions of Section 19622 of the Business and Professions Code and under its agreement with the Los Angeles County Fair Association, reimburses the association for expenditures to the extent of the state appropriations. The 1969 fair was conducted from September 12th to September 28th. The 1970 fair dates are September 18th to October 4th.

Present actitivies of the fair date from 1937. Annual fairs are held on the county's fairgrounds located in the City of Roseville by the Placer County Fair Association under a contract with the board of supervisors under the provisions of Government Code, Section 25905. The 1968 fair was held July 23rd to July 27th and consisted of general livestock and other exhibits. Four thousand five hundred and two exhibits entered by 947 exhibitors were judged at the fair. The 1970 fair dates are July 22nd to July 26th.

PLUMAS COUNTY FAIR

(Conducting the Plumas County Fair at Quincy)

GENERAL ANALYSIS

The present activities of the fair date from 1940. Annual fairs are held under the direction of the board of supervisors on county fairgrounds partially owned by the county and partially leased from the United States Forest Service, located just outside the City of Quincy. The 1969 fair was conducted from August 6th to August 10th and consisted of general livestock and other exhibits. Two thousand nine hundred and fifty exhibits entered by 830 exhibitors were judged at the fair. The 1970 fair dates are August 12th to August 16th.

There is no charge for admission, but the county contribution is partially based on the actual attendance during the fair.

SAN MATEO COUNTY FAIR

(Conducting the San Mateo County Fair and Floral Fiesta at San Mateo)

GENERAL ANALYSIS

Sponsorship of the fair by the County of San Mateo dates from 1929. Annual fairs are held on county fairgrounds located just north of Bay Meadows racetrack, San Mateo, by the San Mateo County Fair Association under a contract with the board of supervisors under the provisions of Section 25905, Government Code. The fairs feature floricultural and agricultural exhibits and some junior livestock exhibits. A horseracing meeting is conducted on Bay Meadows racetrack under a contract with the California Jockey Club. The 1969 fair was conducted from July 28th to August 9th. Four thousand eight hundred eighty-seven exhibits entered by 1,825 exhibitors were judged at the fair. The 1970 fair dates are July 27th to August 8th.

SOLANO COUNTY FAIR

(Conducting the Solano County Fair at Vallejo)

GENERAL ANALYSIS

Activities of the fair date from January 1946, although no allocations were received by the association under Section 4401 of the Agricultural Code until 1950. Annual fairs are conducted on approximately 150 acres of land north of the City of Vallejo by the Solano County Fair Association under agreements with the board of supervisors under the provisions of Section 25905 of the Government Code. A particular feature of the fair has been a race meeting with parimutuel betting. The 1969 fair was held from June 16th to June 28th and consisted of general livestock and other exhibits. Four thousand five hundred twenty-three exhibits entered by 768 exhibitors were judged at the fair. The 1970 fair dates are June 15th to June 27th.

CLOVERDALE CITRUS FAIR

(Conducting the Cloverdale Citrus Fair at Cloverdale)

GENERAL ANALYSIS

This fair receives an annual state allocation under Section 19626 of the Business and Professions Code, the first such allocation being made in 1945. The Cloverdale Citrus Fair was incorporated as a nonprofit organization in 1951, prior fairs having been conducted by the Cloverdale Chamber of Commerce.

Annual shows, featuring citrus displays, are conducted in the association's pavilion located in the City of Cloverdale. The 1969 show was held from February 21st to February 23rd. The 1970 dates are February 20th to 23rd.

NATIONAL ORANGE SHOW

(Conducting the National Orange Show at San Bernardino)

GENERAL ANALYSIS

The National Orange Show was incorporated in 1922 and is a continuation of a nonprofit association with some modifications formed in 1910. It appears that the early history of citrus fairs in San Bernardino can be traced back to 1879. The association receives an allocation under the provisions of Section 19626 of the Business and Professions Code but does not come under the jurisdiction of the Government Code or other codes pertaining to state organizations, its action being governed by the Corporations Code. Under the provision of Section 4704 of the Agricultural Code the National Orange Show is required to file with the Department of Agriculture by January 20th each year, a statement of operations in the previous calendar year. Annual fairs are conducted by the association on grounds owned by the association and located in the City of San Bernardino. The 1969 show was held from March 6th to March 16th. The 1970 show dates are April 2nd to April 12th.

FAIR CONSTRUCTION PROGRAM

GENERAL ANALYSIS

The detailed expenditure of funds available for capital outlay at district and county agricultural fairs and citrus fruit fairs are included in this supplement for the purpose of showing the total program for capital improvements at fairs in one place. The amount budgeted for capital outlay at county agricultural fairs and citrus fruit fairs is reported in the budget document in Local Assistance, Subventions for Agriculture.

Expenditures for capital outlay at district and county agricultural fairs and citrus fruit fairs are met from the continuing appropriation made by Business and Professions Code Section 19630, the allocation of which is approved by the State Public Works Board. These funds were augmented by Budget Act appropriations in 1966–67.

The projects shown for each fair are those included in the recommended five-year program for fairs.

ACTUAL 1968–1969, ESTIMATED 1969–70 AND PROPOSED 1970–71 EXPENDITURES [a]

EXPENDITURES	ACTUAL 1968-69	ESTIMATED 1969-70	PROPOSED 1970-71
1st District Agricultural Association, Oakland			
Minor Project:			
Relocate and improve warehouse facilities	$639	$30,361	–
1-A District Agricultural Association, San Francisco			
Alteration and improvements to Cow Palace building and site development (partial cost) *(General Fund)*	$41,459	–	–
Repayments on loans for alterations and improvements to Cow Palace building and site development *(General Fund)*	–125,380	–$100,000	–$125,000
